**Dostoevsky in Context** Oct 06 2021 This volume explores the Russia where the great writer, Fyodor Dostoevsky (1821–81), was born and lived. It focuses not only on the Russia depicted in Dostoevsky's works, but also on the Russian life that he and his contemporaries experienced: on social practices and historical developments, political and cultural institutions, religious beliefs, ideological trends, artistic conventions and literary genres. Chapters by leading scholars illuminate this broad context, offer insights into Dostoevsky's reflections on his age, and examine the expression of those reflections in his writing. Each chapter investigates a specific context and suggests how we might understand Dostoevsky in relation to it. Since Russia took so much from Western Europe throughout the imperial period, the volume also locates the Russian experience within the context of Western thought and practices, thereby offering a multidimensional view of the unfolding drama of Russia versus the West in the nineteenth century.

Criminality in Context Dec 20 2022 In this groundbreaking book that is built on decades of work on the front lines of the criminal justice system, expert psychologist Craig Haney encourages meaningful and lasting reform by changing the public narrative about who commits crime and why. Based on his comprehensive review and analysis of the research, Haney offers a carefully framed and psychologically based blueprint for making the criminal justice system fairer, with strategies to reduce crime through proactive prevention instead of reactive punishment. Haney meticulously reviews evidence documenting the ways in which a person's social history, institutional experiences, and present circumstances powerfully shape their life, with a special focus on the role of social, economic, and racial injustice in crime causation. Haney debunks the "crime master narrative"--the widespread myth that criminality is a product of free and autonomous "bad" choices--an increasingly anachronistic view that cannot bear the weight of contemporary psychological data and theory. This is a must-read for understanding what truly influences criminal behavior, and the strategies for prevention and rehabilitation that follow.

Brecht also went into exile in Denmark, Sweden, Finland, the United States, and Switzerland between 1933 and 1948"--

**Terms in Context** Feb 16 2020 *Terms in Context* applies the methodology that has been developed over the last two decades in corpus linguistics to the relatively new and still little developed field of corpus-based terminography. While corpora are already being used by some terminologists for the identification of terms and retrieval of contextual fragments, this book describes the first attempt to use corpora for terminography in much the same way as large general reference corpora are already being used for general language lexicography. The author goes beyond the standard problem of identifying terms as opposed to non-terminological lexical items in text and focuses on identifying metalanguage patterns which point to the presence in text of (parts of) reusable definitions of terms. The author examines these patterns and shows how the information which they contain can be retrieved and used as input for terminological entries. *Terms in Context* should be of interest to "traditional" terminologists who have not previously considered adopting a corpus-based approach to their work or at least not on the scale proposed here; to "modern" terminologists who use text primarily for the identification of terms and the retrieval of contextual examples; to those in the corpus linguistic community who have hitherto used general language corpora for the purposes of lexicography and have not previously considered using special purpose corpora for more specific lexicography studies; and to academics in the ESP/LSP community who are interested in showing students how to use text as a means of ascertaining the meaning of terms.

**Jeremiah 52 in the Context of the Book of Jeremiah** Jun 21 2020 In *Jeremiah 52 in the Context of the Book of Jeremiah*, Henk de Waard offers a thorough examination of the final chapter of the book of Jeremiah. Particular attention is paid to the chapter's relationship with the parallel text in 2 Kings 24:18-25:30, to the differences

between the Masoretic text and the Old Greek translation, to the literary function of Jeremiah 52 within the book of Jeremiah, and to the chapter's historical context. De Waard shows that, especially in the early text form represented by the Old Greek, Jeremiah 52 is not a mere appendix to the book, but a golah-oriented epilogue, indicating the contrasting destinies of pre-exilic Judah and the exilic community in Babylon.

Richard Strauss in Context May 13 2022 Richard Strauss in Context offers a distinctive approach to the study of a composer in that it places the emphasis on contextualizing topics rather than on biography and artistic output. One might say that it inverts the relationship between composer and context. Rather than studies of Strauss's librettists that discuss the texts themselves and his musical settings, for instance, this book offers essays on the writers themselves: their biographical circumstances, styles, landmark works, and broader positions in literary history. Likewise, Strauss's contributions to the concert hall are positioned within the broader development of the orchestra and trends in programmatic music. In short, readers will benefit from an elaboration of material that is either absent from or treated only briefly in existing publications. Through this supplemental and broader contextual approach, this book serves as a valuable and unique resource for students, scholars, and a general readership.

How People Learn II Oct 18 2022 There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of

influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.
