Vehicle maintenance. Discover how to choose a quality repair facility, buy a car, handle roadside emergencies, diagnose common problems, and communicate effectively with technicians – all while saving money. Everything you need to completely restore your 1947-1955 first series Chevy pickup to better-than-new condition is shown in complete detail! The Advance Design era (1947-1955) was historic for Chevrolet, topping all the production numbers every year they were in production. And for good reason. The post-World War II economy demanded a tough and well-engineered solution for this growing economy. Selling more than 2.5 million units during this era, Chevrolet quickly surpassed and controlled the light-truck market with style, utility, and logical engineering. This era has been overlooked for long enough, and Deve Krehbiel, a well-known restoration expert from

DevesTechNet.com who specializes in these trucks, puts his 40 years of experience restoring nothing but Advance Design trucks into an extensive and complete single volume. With more than 500 photos and detailed instruction for every aspect of a proper restoration, this book will be the restorer's best friend. Deve's companion book, Chevrolet Inline 6 Engine: 1929-1962 (SA455), explains in full detail the engine aspects of your project. The Advance Design Chevy pickup is one of the most popular and highly prized vehicles at any venue. The author's hope is that this book will give you the confidence and the knowledge to put your old Chevy truck back on the road in style. There is just nothing more interesting and more inviting than an old Chevy truck! With a Haynes manual, you can do it yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the vehicle. We learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Our books have clear instructions and plenty of photographs that show each step. Whether you're a beginner or a pro, you can save big with Haynes!

Over the last 50 years,

literally millions of GM cars and trucks have been built with Turbo 400 automatic transmissions. While these transmissions are respected for their durability and versatility, there always comes a point where the old transmission shows signs of wear. At some point, even the best transmissions need to be rebuilt. Respected automotive technical author Cliff Ruggles takes readers through the complex rebuild procedure of GM's most popular rear-wheel drive automatic transmission in this great new book. Enthusiasts have embraced the reliable GM Turbo Hydra-Matic 400 three-speed automatics for years, and the popularity of these transmissions is not slowing down. With his proven style, Ruggles walks through the step-by-step rebuild and performance upgrade procedures in a series of full-color photos for each of these models. Time saving tips are part of every buildup. This is a welcome addition to your automotive library. Amateurs and professionals alike will appreciate the advice and guidance offered on every page. Even if you end up deciding to have a professional take care of your transmission repair and performance needs, this information is crucial to understanding how the power gets from the engine to the road. Whether you are new to British Columbia, taking a re-examination, or brushing up on your driving skills, the Learn to Drive Smart guide gives you the basic information to help you drive safely. The guide will also help you prepare for the knowledge test, and Class 7 and Class 5 road tests. \* Google Play may require a credit card to activate your account. Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
