Story Proof Jul 23 2020 Like Stephen Krashen's important work in *The Power of Reading*, *Story Proof* collects and analyzes the research that validates the importance of story, story reading, and storytelling to the brain development and education of children and adults. Accomplished researcher and storyteller Kendall Haven, establishes the need for understanding the research findings in neural psychology and brain development and the value of a common definition of story if one is to fully grasp the importance and necessity of story to the development of the human mind. To support his case, he reviews a wealth of research from storytellers, teachers, and others who have experienced the power of story firsthand. The author has collected anecdotal experiences from over 100 performing storytellers and from 1,800 story practitioners (mostly teachers) who have made extensive use of stories. He has read more than 150 qualitative and quantitative research studies that discuss the effectiveness of stories and/or storytelling for one or more specific applications (education, organizational management, knowledge management, medical and narrative therapy, etc.). Forty of these studies were literature reviews and comparative studies including analysis of over 1,000 studies and descriptive articles. He has also gathered research evidence from his own story performances for total audiences of over 4 million and from conducting story writing workshops with 200,000 students and 40,000 teachers.

**Drawdown** Oct 06 2021 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set

of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Upstream Nov 26 2020 Wall Street Journal Bestseller New York Times bestselling author Dan Heath explores how to prevent problems before they happen, drawing on insights from hundreds of interviews with unconventional problem solvers. So often in life, we get stuck in a cycle of response. We put out fires. We deal with emergencies. We stay downstream, handling one problem after another, but we never make our way upstream to fix the systems that caused the problems. Cops chase robbers, doctors treat patients with chronic illnesses, and call-center reps address customer complaints. But many crimes, chronic illnesses, and customer complaints are preventable. So why do our efforts skew so heavily toward reaction rather than prevention? Upstream probes the psychological forces that push us downstream—including “problem blindness,” which can leave us oblivious to serious problems in our midst. And Heath introduces us to the thinkers who have overcome these obstacles and scored massive victories by switching to an upstream mindset. One online travel website prevented twenty million customer service calls every year by making some simple tweaks to its booking system. A major urban school district cut its dropout rate in half after it figured out that it could predict which students would drop out—as early as the ninth grade. A

European nation almost eliminated teenage alcohol and drug abuse by deliberately changing the nation's culture. And one EMS system accelerated the emergency-response time of its ambulances by using data to predict where 911 calls would emerge—and forward-deploying its ambulances to stand by in those areas. Upstream delivers practical solutions for preventing problems rather than reacting to them. How many problems in our lives and in society are we tolerating simply because we've forgotten that we can fix them?

*The Final Solution* Jan 09 2022 In *The Amazing Adventures of Kavalier and Clay*, prose magician Michael Chabon conjured the golden age of comic books, intertwining history, legend and story-telling verve. In *The Final Solution*, he has condensed his boundless vision to create a short, suspenseful tale of compassion and wit that re-imagines the classic 19th-century detective story. In

deep retirement in the English countryside, an 89-year old man, vaguely recollected by the locals as a once-famous detective, is more concerned with his bookkeeping than his fellow man. Into his life wanders Linus Steinman, nine years old and mute, who has escaped from Nazi Germany with his sole companion: an African grey parrot. What is the meaning of the mysterious strings of German numbers the bird spews out—a top-secret SS code? The keys to a series of Swiss bank accounts? Or do they hold a significance at once more prosaic and far more sinister? Though the solution to this last case may be beyond even the reach of the once famed sleuth, the true story of the boy and his parrot is subtly revealed to the reader in a wrenching resolution to this brilliant homage. *The Final Solution* is a work from a master story-teller at the height of his powers.

**Some Possible Solutions** Sep 24 2020 In a spine-tingling new collection, the “unique”(NPR) and “wickedly funny” (New York Times) Helen Phillips offers an idiosyncratic series of “what-ifs” about our fragile human condition. *Some Possible Solutions* offers an idiosyncratic series of “What ifs”: What if your perfect hermaphrodite match existed on another planet? What if you could suddenly see through everybody's skin to their organs? What if you knew the exact date of your death? What if your city was filled with doppelgangers of you? Forced to navigate these bizarre scenarios, Phillips' characters search for solutions to the problem of how to survive in an irrational, infinitely strange world. In dystopias that are exaggerated versions of the world in which we live, these characters strive for intimacy and struggle to resolve their fraught relationships with each other, with

themselves, and with their place in the natural world. We meet a wealthy woman who purchases a high-tech sex toy in the shape of a man, a rowdy, moody crew of college students who resolve the energy crisis, and orphaned twin sisters who work as futuristic strippers--and with Phillips' characteristic smarts and imagination, we see that no one is quite who they appear. By turns surreal, witty, and perplexing, these marvelous stories are ultimately a reflection of our own reality and of the big questions that we all face. Who are we? Where do we fit? Phillips is a true original and a treasure.
