The Contradictions of Austerity Jun 03 2021 The great financial crisis of 2008 and the ensuing global economic and financial turmoil have launched a search for "models" for recovery. The advocates of austerity present the Baltic States as countries that through discipline and sacrifice showed the way out of crisis. They have proposed the "Baltic model" of radical public sector cuts, wage reductions, labor market reforms and reductions in living standards for other troubled Eurozone countries to emulate. Yet, the reality of the Baltic "austerity fix" has been neither fully accepted by its peoples, nor is it fully a success. This book explains why and what are the real social and economic costs of the Baltic austerity model. We examine each of the Baltic States by connecting national level studies within a European and global political economy, thereby delivering comparative breadth that supersedes localized understandings of the crisis. Thus for each of the three Baltic states, individual chapters explore the different economic and social dimensions of neo-liberal post-communism and the subsequent wider global economic and financial crisis in which these newly financialized economies have found themselves especially vulnerable. The "austerity model" adopted by Baltic national governments in response to the crisis reveals the profound vulnerabilities created by their unwavering commitment to liberalized economies, not least in terms of the significant "exit" of their labor forces and consequent population loss. This book looks beyond basic financial metrics claiming a success story for the Baltic austerity model to reveal the damaging economic and social consequences, first of neo-liberal policies adopted during transition, and latterly of austerity measures based on "internal devaluation." Combined these policies undermine the possibility of longer-term recovery and even social and economic sustainability, not to mention prospects for successful integration in the now-faltering European project that has departed from its "Social Model" roots.

Global Issues in Mediation Aug 25 2020 This book is an essential read for mediators, arbitrators, students, attorneys, policy makers, business people, and other professionals involved with cross-border interactions. It provides a comprehensive and cutting-edge overview of topics that are essential for informed decision making about resolving disputes in our global landscape. Although arbitration has traditionally been widely-used to resolve disputes internationally, mediation is increasingly considered an attractive option that gives parties control over the process they use and the outcome they decide upon. The book covers the latest developments in court-connected and mandatory forms of mediation, cultural considerations, legal issues and regulation, ethical challenges, combining mediation with other processes, mediation of investor-state disputes, innovative trends in process and system design, and peacemaking mediation. The book is designed to stand on its own or provide a supplement in traditional dispute resolution courses. It is appropriate for those who want an introduction as well as for those seeking insightful analyses of the most recent developments in the field.

Investigation of the Ferguson Police Department Jan 30 2021 The Civil Rights Division of the United States Department of Justice opened its investigation of the Ferguson Police Department ("FPD") on September 4, 2014. This investigation has revealed a pattern or practice of unlawful conduct within the Ferguson Police Department that violates the First, Fourth, and Fourteenth Amendments to the United States Constitution, and federal statutory law. Over the course of the investigation, we interviewed City officials, including City Manager John Shaw, Mayor James Knowles, Chief of Police Thomas Jackson, Municipal Judge Ronald Brockmeyer, the Municipal Court Clerk, Ferguson's Finance Director, half of FPD's sworn officers, and others. We spent, collectively, approximately 100 person-days onsite in Ferguson. We participated in ride-alongs with on-duty officers, reviewed over 35,000 pages of police records as well as thousands of

emails and other electronic materials provided by the police department. Enlisting the assistance of statistical experts, we analyzed FPD's data on stops, searches, citations, and arrests, as well as data collected by the municipal court. We observed four separate sessions of Ferguson Municipal Court, interviewing dozens of people charged with local offenses, and we reviewed third-party studies regarding municipal court practices in Ferguson and St. Louis County more broadly. As in all of our investigations, we sought to engage the local community, conducting hundreds of in-person and telephone interviews of individuals who reside in Ferguson or who have had interactions with the police department. We contacted ten neighborhood associations and met with each group that responded to us, as well as several other community groups and advocacy organizations. Throughout the investigation, we relied on two police chiefs who accompanied us to Ferguson and who themselves interviewed City and police officials, spoke with community members, and reviewed FPD policies and incident reports.

Dynamic Analysis of Structures Nov 20 2022 Dynamic Analysis of Structures reflects the latest application of structural dynamics theory to produce more optimal and economical structural designs. Written by an author with over 37 years of researching, teaching and writing experience, this reference introduces complex structural dynamics concepts in a user-friendly manner. The author includes carefully worked-out examples which are solved utilizing more recent numerical methods. These examples pave the way to more accurately simulate the behavior of various types of structures. The essential topics covered include principles of structural dynamics applied to particles, rigid and deformable bodies, thus enabling the formulation of equations for the motion of any structure. Covers the tools and techniques needed to build realistic modeling of actual structures under dynamic loads Provides the methods to formulate the equations of motion of any structure, no matter how complex it is, once the dynamic model has been adopted Provides carefully worked-out examples that are solved using recent numerical methods Includes simple computer algorithms for the numerical solution of the equations of motion and respective code in FORTRAN and MATLAB

A Social History of American Technology Feb 28 2021 A Social History of American Technology, Second Edition, tells the story of American technology from the tools used by its earliest inhabitants to the technological systems--cars and computers, aircraft and antibiotics--

that we are familiar with today. Ruth Schwartz Cowan and Matthew H. Hersch demonstrate how technological change has always been closely related to social and economic development, and examine the important mutual relationships between social history and technological change. They explain how the unique characteristics of American cultures and American geography have affected the technologies that have been invented, manufactured, and used throughout the years-- and also the reverse: how those technologies have affected the daily lives, the unique cultures, and the environments of all Americans.

Agriculture Priorities and Allocations System (Us Farm Service Agency Regulation) (Fsa) (2018 Edition) Feb 11 2022 Agriculture Priorities and Allocations System (US Farm Service Agency Regulation) (FSA) (2018 Edition) The Law Library presents the complete text of the Agriculture Priorities and Allocations System (US Farm Service Agency Regulation) (FSA) (2018 Edition). Updated as of May 29, 2018 The Farm Service Agency (FSA) is establishing the regulation for the Agriculture Priorities and Allocations System (APAS). Food is a critical commodity essential to the national defense (including civil emergency preparedness and response). To avoid civilian hardship during national defense emergencies, it may be necessary to regulate the production, processing, storage, and wholesale distribution of food. Through the APAS rule, the U.S. Department of Agriculture (USDA) will respond to requests to place priority ratings on contracts or orders (establishing priority on which contracts or orders are filled first) for agriculture commodities up through the wholesale levels, including agriculture production equipment, and allocate resources, as specified in the Defense Production Act (DPA) of 1950, as amended, if the necessity arises. FSA is implementing this rule as a way to redirect the agriculture commodities and resources to areas of hardship or potential hardship due to national emergencies. In most cases, there is likely to be no economic impact in filling priority orders because it would generally just be changing the timing in which orders are completed. This book contains: - The complete text of the Agriculture Priorities and Allocations System (US Farm Service Agency Regulation) (FSA) (2018 Edition) - A table of contents with the page number of each section

The Parody Exception in Copyright Law Oct 19 2022 Parodies have been created throughout times and cultures. A glimpse at the general judicial latitude generally afforded to parodies, satires, caricatures, and pastiches demonstrates the social and cultural value of this particular form of artistic expression. With the advent of technologies and the evolution of copyright legislation, creative endeavours in the form of parody gathered a new youth but became unlawful. While copyright law grants exclusive rights to right-holders, this right is not absolute. Legislation includes specific exceptions, which preclude right-holders from exercising their prerogatives in particular cases which foster creativity and cultural diversity within that society. The parody exception pertains to this ultimate objective by permitting users to reproduce copyright-protected materials for the purpose of parody. To understand the meaning and scope of the parody exception, this book examines and compares five jurisdictions which differ in their protection of parodies: France, Australia, Canada, the US and the United Kingdom. This book is concerned with finding an appropriate balance between the protection awarded to right-holders and the public interest. This is achieved by analysing the parody exception to the economic rights of right-holders, the preservation of moral rights and the interaction of the parody exception with contract law. As parodies constitute an artistic expression protected under the right to freedom of expression, this book also considers the influence of freedom of expression on the interpretation of this specific copyright exception. Furthermore, this book aims at providing guidance on how to resolve conflicts where fundamental rights are in conflict. This is the first book in English to offer an in-depth investigation into the parody exception in copyright law, and comments on industry practices linked to this form of creative endeavours.
