Translator: Johnn Bryan PUBLISHER: TEKTIME This comprehensive guide to Steampunk creations of all kinds offers inspiration and practical tips for bringing your own retro-futuristic visions to life. Whether you're a newbie to the world of Steampunk, or a long-time enthusiast of airships, goggles, and mad scientists, The Steampunk User's Manual is essential reading. The popular subgenre of science fiction has grown into a cultural movement; one that invites fans to let their imaginations go wild. In this volume, Jeff VanderMeer—the renowned expert in all things Steampunk—presents a practical and inspirational guidance for finding your own path into this realm. Including sections on art, fashion, architecture, crafts, music, performance, and storytelling, The Steampunk User's Manual provides a conceptual how-to guide on everything from the utterly doable to the completely over-the-top. Distributed-memory multiprocessing systems (DMS), such as Intel's hypercubes, the Paragon, Thinking Machine's CM-5, and the Meiko Computing Surface, have rapidly gained user acceptance and promise to deliver the computing power required to solve the grand challenge problems of Science and Engineering. These machines are relatively inexpensive to build, and are potentially scalable to large numbers of processors. However, they are difficult to program: the non-uniformity of the memory which makes local accesses much faster than the transfer of non-local data via message-passing operations implies that the locality of algorithms must be exploited in order to achieve acceptable performance. The management of data, with the twin goals of both spreading the computational workload and minimizing the delays caused when a processor has to wait for non-local data, becomes of paramount importance. When a code is parallelized by hand, the programmer must

distribute the program's work and data to the processors which will execute it. One of the common approaches to do so makes use of the regularity of most numerical computations. This is the so-called Single Program Multiple Data (SPMD) or data parallel model of computation. With this method, the data arrays in the original program are each distributed to the processors, establishing an ownership relation, and computations defining a data item are performed by the processors owning the data. Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information. User manuals, reference guides, project documentation, equipment specifications and other technical documents are increasingly subjected to high quality standards. However, it is not clear whether research efforts are keeping pace with this increasing importance of documentation quality. This volume includes studies from researchers as well as practitioners, exemplifying three approaches towards document quality:• Product-orientation, with an eye for usability in various manifestations such as tutorials, concept definitions, tools for users of documentation to find information, methods of eliciting user feedback, and cultural differences;• Process-orientation, in which the quality of technical documentation is regarded as an outgrowth of a process involving sub-steps such as storyboarding, pre-testing and use of automation tools in writing and producing documents;• Professional orientation, in which attention is focused on those who create technical documentation. The volume will be of interest to a broad audience of writers, managers and trainers with technical and non-technical backgrounds, such as: quality managers; communication managers; technical communicators; trainers in computer usage; teachers, researchers and students of (technical) communication. This IBM® Redbooks® publication describes the IBM solution for data deduplication, the IBM System Storage® TS7650G IBM ProtecTIER® Deduplication Gateway, and the IBM TS7620 ProtecTIER Deduplication Appliance Express. This solution consists of the IBM System Storage ProtecTIER Enterprise Edition V3.3 software and the IBM System Storage TS7600 family of products. They are designed to address the disk-based data protection needs of enterprise data centers. We describe the components that make up IBM System Storage TS7600 with ProtecTIER and provide extensive planning and sizing guidance that enables you to determine your requirements and the correct configuration for your environment. We then guide you through the basic setup steps on the system and on the host. We also describe all operational tasks that are required during normal day-to-day operation or when upgrading your TS7600 products. All available models of the ProtecTIER deduplication system can now be ordered in a configuration to operate in one of the following modes for which we provide setup, configuration and usage guidelines for your business needs: The Virtual Tape Library (VTL) interface is the foundation of ProtecTIER and emulates traditional automated tape libraries. The Symantec NetBackup OpenStorage (OST) API can be integrated with Symantec NetBackup to provide backup-to-disk without having to emulate traditional tape libraries. The newly available File System Interface (FSI) supports Common Internet File System (CIFS) and Network File System (NFS) as a backup target. This publication is intended for system programmers, storage administrators, hardware and software planners, and other IT personnel that are involved in planning, implementing, and the use of the IBM deduplication solution. Building on the time-tested, reality-based discipline of general semantics, Olek Netzer provides a guide for clear and critical thinking, a guide for the perplexed that steers individuals in the direction of enhanced rationality and improved evaluation of our experiences, environments, and ourselves. His concern is with both our psychological well being and our societal health, as he addresses interpersonal relations as well as political persuasion and propaganda, drawing on some of the most important thinkers of the past century Lance Strate, President of the Institute of General Semantics, Professor of Communication and Media Studies at Fordham University. The most comprehensive NLP Practitioner course manual ever written. A fully revised and updated edition, it contains the very latest in Neuro-Linguistic Programming, particularly with regard to the Meta-states

model and the Meta-model of language. For all those embarking on Practitioner training or wishing to study at home, this book is your essential companion. Written and designed by two of the most important theorists in NLP today. Myriad forms of communication occur within the criminal justice system as judges and attorneys speak to juries, law enforcement officers interact with the public, and the news media presents stories of events in courtrooms. Hindrances abound, however. Law enforcement officers and justice system personnel often encounter challenges that affect their ability to communicate with others, ranging from language barriers, to conflicting accounts of witnessed events, to errors caused by malfunctioning technology. Examining the relevancy of the U.S. Constitution to modern communications, *The Foundations of Communication in Criminal Justice Systems* demonstrates how information is conveyed from multiple perspectives in a range of scenarios, enabling readers to see how these matters relate to and affect the criminal justice system. Topics covered include: How to use the communications process within the justice system from the crafting of messages through the solicitation of feedback Effective methods for persuading individuals and audiences Federal regulations in the workplace and workplace communications tactics How law enforcement and public safety entities use marketing and advertising to influence the general public How to use multimedia resources when communicating Using multiple communications styles to support effective leadership The book concludes with discussions on innovations in communication technology, natural language processing, cybernetics, and other emerging concepts. With an emphasis on logical reasoning in communication, the book explores the perspectives of numerous players in the justice system, from patrol officers to attorneys. Supplemented by examples of written communication templates that can be adapted within a law enforcement organization, it provides readers with solid theoretical and applied approaches to the subject matter. This volume contains the conference proceedings of ISoLA 2008, the Third International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, which was held in Porto Sani (Kassandra, Chalkidiki), Greece during October 13–15, 2008, sponsored by EASST and in cooperation with the IEEE Technical Committee on Complex Systems. Following the tradition of its forerunners in 2004 and 2006 in Cyprus, and the ISoLA Workshops in Greenbelt (USA) in 2005 and in Poitiers (France) in 2007, ISoLA 2008 provided a forum for developers, users, and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, test, and maintenance of systems from the point of view of their different application domains. Thus, the ISoLA series of events serves the purpose of bridging the gap between designers and developers of rigorous tools, and users in engineering and in other disciplines, and to foster and exploit synergetic relationships among scientists, engineers, software developers, decision makers, and other critical thinkers in companies and organizations. In particular, by providing a venue for the discussion of common problems, requirements, algorithms, methodologies, and practices, ISoLA aims at supporting researchers in their quest to improve the utility, reliability, flexibility, and efficiency of tools for building systems, and users in their search for adequate solutions to their problems.
