The Roman province of Noricum occupied most of Austria as well as parts of Italy, Germany and the Balkans. Noricum, first published in 1974, presents a comprehensive history of Noricum, from 400 BC to the end of Roman rule in AD 600. Professor Alföldy's account is predicated on the methodical interpretation of literary, epigraphic and archaeological sources, and emphasises the problems of demography and socio-economic history. The chapters are arranged chronologically, ensuring a sense of the continuity of historical events and illuminating the history and archaeology of Noricum both before it came into contact with the Romans as well as under Roman rule. Noricum includes a review of much recent research on the province, detailed references to the source material, a comprehensive bibliography and valuable appendices. It is a substantial work of ancient history and archaeology and will interest both the specialist and the general reader. The Second Edition takes a unique, active approach to teaching and learning introductory statistics that allows students to discover and correct their misunderstandings as chapters progress rather than at their conclusion. Empirically-developed, self-correcting activities reinforce and expand on fundamental concepts, targeting and holding students' attention. Based on contemporary memory research, this learner-centered approach leads to better long-term retention through active engagement while generating explanations. Along with carefully placed reading questions, this edition includes learning objectives, realistic research scenarios, practice problems, self-test questions, problem sets, and practice tests to help students become more confident in their ability to perform statistics. This edited volume provides both conceptual and practical information for conducting and evaluating evidence-based outcome studies. It encompasses psychotherapy research for traditional mental health disorders (eg. depression, anxiety), as well as psychosocial-based treatments provided to medical patient populations to have impact either on the disease process itself (pain, cardiovascular risk) or to improve the quality of life of such individuals. This is a hands-on book, whose major emphasis is on the practical nuts-and-bolts implementation of psychosocial-based RCTs from conception to completion.
