This volume contains the proceedings of the 10th edition of the International Conference on Simulation of Semiconductor Processes and Devices (SISPAD 2004), held in Munich, Germany, on September 2-4, 2004. The conference program included 7 invited plenary lectures and 82 contributed papers for oral or poster presentation, which were carefully selected out of a total of 151 abstracts submitted from 14 countries around the world. Like the previous meetings, SISPAD 2004 provided a world-wide forum for the presentation and discussion of recent advances and developments in the theoretical description, physical modeling and numerical simulation and analysis of semiconductor fabrication processes, device operation and system performance. The variety of topics covered by the conference contributions reflects the physical effects and technological problems encountered in consequence of the progressively shrinking device dimensions and the ever-growing complexity in device technology. A number of fields have been revised: archival materials, manuscripts and documentation produced by the ISSN International Centre. This book constitutes the refereed proceedings of the 10th International Workshop on Power and Timing Modeling, Optimization and Simulation, PATMOS 2000, held in G ttingen, Germany in September 2000. The 33 revised full papers presented were carefully reviewed and selected for inclusion in the book. The papers are organized in sections on RTL power modeling, power estimation and optimization, system-level design, transistor level design, asynchronous circuit design, power efficient technologies, design of multimedia processing applications, adiabatic design and arithmetic modules, and analog-digital circuit modeling. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Winner of the Prairie Schooner Book Prize in Poetry, Shane Book's collection, Ceiling of Sticks, is a powerful and unflinching sort of documentary poetics. It bears elegiac witness to the effects of global politics on individual lives. Book's poems carry us to Uganda, Ghana, Mali, Trinidad, and Canada's west coast; from a religious sacrifice in Tarahumara, Mexico, to Book's ailing grandfather's bedside. They bring an intimate vision of humanity to scenes of inhuman atrocity and suffering; a moment of clarity and empathy to individuals overwhelmed by war or other man-made catastrophes. The attentiveness of the poems and meditative lyrics reveal a careful allegiance to their subjects and a fearless refusal to turn away. Filled with experiences of Africa and Latin America, California and the Caribbean, family and lost love, these poems resonate with the intensity of truth as it is lived and written.
