Midcentury spaces made new: A-Frame homes from rustic to ultra-modern, mountain retreats to seaside getaways. The A-Frame home surged in popularity in the 1950s, and has captured the public's imagination with its playfully modern, steep-sloping roofline ever since. The Modern A-Frame celebrates seventeen diverse accounts of these minimalist cabins reinvented for the twenty-first century. Nostalgic escapes, heritage homes, full-time simplicity, and artists at work categorize the A-frames whose engaging stories are shared. Whether fabricated from a 1960s kit or as a new build via retro inspiration, the variety of styles and homeowners in this photo-driven collection beautifully captures the romance of a classic structure, which beckons to travelers and homebuyers today, just as it did sixty years ago. Perfect for the architectural enthusiast, midcentury-minded designer, or armchair traveler. Ben Rahn has been photographing architecture and interiors for more than twenty years. But what if there was a way to break free from these patterns and beliefs? What if you could free your body from stress and trauma, tap into your inherent creativity, and connect more authentically with the people who matter? In this life-changing book, intimacy expert and counselor Michaela Boehm shares practical rituals and exercises to show you simple, everyday changes that will revolutionize your connection to yourself, your life, and your relationships. Beyond the outdated stereotypes of femininity lies the ancient wisdom of the Wild Woman archetype, a path to reconnecting with our “body intelligence.” In this book, you will learn to: - Re-wild yourself by connecting to who you really are and integrating body, emotions, and mind for powerful expression in the world. - Switch effortlessly between “doing” and “being,” allowing you to access both empowered success and personal fulfillment. - Unlock creativity and intuition through understanding how body, heart, and mind can work together. - Engage in relaxed, body-specific exercises that help you connect with yourself and your chosen relationships.

Alphaherpesviruses are a fascinating group of DNA

viruses that includes important human pathogens such as herpes simplex virus type 1 (HSV-1), HSV-2, and varicella-zoster virus (VZV): the causative agents of cold sores, genital ulcerous disease, and chickenpox/shingles, respectively. A key attribute of these viruses is their ability to establish lifelong latent infection in the peripheral nervous system of the host. Such persistence requires subversion of the host's immune system and intrinsic antiviral defense mechanisms. Understanding the mechanisms of the immune evasion and what triggers viral reactivation is a major challenge for today's researchers. This has prompted enormous research efforts into understanding the molecular and cellular biology of these viruses. This up-to-date and comprehensive volume aims to distill the most important research in this area providing a timely overview of the field. Topics covered include: transcriptional regulation, DNA replication, translational control, virus entry and capsid assembly, the role of microRNAs in infection and oncolytic vectors for cancer therapy. In addition there is coverage of virus-host interactions, including apoptosis, subversion of host protein quality control and DNA damage response pathways, autophagy, establishment and reactivation from latency, interferon responses, immunity and vaccine development. Essential reading for everyone working with alphaherpesviruses and of interest to all virologists working on latent infections.
