In addition to the general theory of exploding wires, this conference considered exploding wire shock waves; the generation by exploding wires of extreme temperatures, X-rays, and very high pressures; instrumentation problems in wire explosions; and,

for the first time, exploding foils. Sponsored by the Geophysics Research Directorate of the Air Force Cambridge Research Laboratories, this symposium was held in Boston, Massachusetts, on November 13 and 14, 1961. To fill a definite need for ready access to information, Volume Two of *Exploding Wires* contains a comprehensive index which should facilitate the use of both volumes on the exploding wire phenomenon. It is not possible to express full appreciation to all those whose generous assistance made the Second Conference and this volume possible. It is certain, however, that without the cooperation of Dr. John N. Howard, Laboratory Chief, and Mr. Morton A. Levine, Branch Chief, there could have been no conference. Special acknowledgment goes to the Staff of the Hydromagnetics Laboratory for its invaluable aid: to Mrs. William Watson for exceptional secretarial work; to Mr. E. H. Cullington for technical assistance; to Mr. C. V. Fish for drawings, graphs, and art work; and to Mr. K. R. Saari for photography. Particular gratitude is due to Mr. In this accessible presentation of the famous Bates method, Thomas R. Quackenbush (who teaches the Bates method in California and Oregon) describes how eyesight can improve naturally, at any age and regardless of heredity. This book is a wonderful tribute to the genius of Dr. Bates, who was a pioneer in discovering how vision becomes blurred and how it restores itself naturally to clarity and acuity. Now 80 years later, his findings and teachings remain light years ahead of our contemporaries. His approach to treating vision problems was truly holistic and the theme throughout this book is very much an extension of that holistic approach. Dr. Quackenbush is to be commended for his dedication in getting the truth out and keeping the torch burning in this "bible" on vision improvement. Doyle, a sewing machine repairman of 25 years and author of "Serger Repair for the Home Sewer." "In over 75% of the repair jobs I get, the home sewer/crafter could easily have handled the job if only they'd known what to look for. In about 25% of the repair jobs I go out on, the problem is such a minor one that anyone with a checklist of what to look for could fix it in seconds, but I have to charge them the same service fee as on any repair job. Of course any broken parts need to be taken to an authorized service

repairman for repair or replacement, but those types of service calls are by far the minority!" Written in step by step instructional style, this book takes the serger machine owner through problem/solution scenarios allowing them to fix problems that can cause a lot of frustration for those who sew. Whether you have an older model machine, or one of the newer models, this book will help keep your general repair costs to a minimum.
