Roger Grassham believes we are called to watch and pray consistently (1 Peter 5:8) and that together we can all make a difference in our nation and the nations of the world. Targeted Prayer will help give shape to a focused prayer subject, and can be used by individuals, groups, or a whole church. By using the prayer guides, a person or group can intercede knowing more information about a particular subject. The material that is presented in each guide should help you pray more consistently and learn how to ask questions of God, having researched background, history and the context of the specific subject matter. It is predominantly designed to be a 'handbook' for those who want to become more focused in prayer at a deeper level and see that targeted prayer gets targeted answers! friends, encouraging, advising, and cheering on." —Publisher's Weekly As a registered dietitian and a health industry expert, Ilyse Schapiro and Hallie Rich are "Dear Abby" meets Sex and the City meets Dr. Oz. They're realistic in their approach without getting too technical. They know people will cheat on their diets, dine out, consume alcohol, and have (hopefully plenty of) sex. They also know people have questions about it all. (Who doesn't?) While many people may feel comfortable asking their best friend, they really want expert advice. That's where *Should I Scoop Out My Bagel?* will help. Based on their twenty-five years of combined experience in the health field, Schapiro and Rich are able to cover the multitude of questions that constantly top the list, including: Is eating a wrap healthier than eating a bagel sandwich? Is it time to get on the gluten-free bandwagon? I have salads for lunch every day, and I'm still not losing weight. What am I doing wrong? I'm tired of feeling tired. What can I do to lose the urge to snooze? I eat well, so what's the point of a multivitamin? They reveal the secrets of the experts and the tricks of their respective trades. With so much information and so many "rules" out there, this book gives readers the tools to sort through the BS and know what is truly important and actually relevant to their health.

Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
