[Advances in Cryptology – EUROCRYPT 2016 Apr 19 2020](#) The two-volume proceedings LNCS 9665 + LNCS 9666 constitutes the thoroughly refereed proceedings of the 35th Annual International Conference on the Theory and Applications of Cryptographic Techniques, EUROCRYPT 2016, held in Vienna, Austria, in May 2016. The 62 full papers included in these volumes were carefully reviewed and selected from 274 submissions. The papers are organized in topical sections named: (pseudo)randomness; LPN/LWE; cryptanalysis; masking; fully homomorphic encryption; number theory; hash functions; multilinear maps; message authentication codes; attacks on SSL/TLS; real-world protocols; robust designs; lattice reduction; latticed-based schemes; zero-knowledge; pseudorandom functions; multi-party computation; separations; protocols; round complexity; commitments; lattices; leakage; in differentiability; obfuscation; and automated analysis, functional encryption, and non-malleable codes.

[Dependability in Sensor, Cloud, and Big Data Systems and Applications Nov 07 2021](#) This book constitutes the refereed proceedings of the 5th International Conference on Dependability in Sensor, Cloud, and Big Data Systems and Applications, DependSys, held in Guangzhou, China, in November 2019. The volume presents 39 full papers, which were carefully reviewed and selected from 112 submissions. The papers are organized in topical sections on ?dependability and security fundamentals and technologies; dependable and secure systems; dependable and secure applications; dependability and security measures and assessments; explainable artificial intelligence for cyberspace.

[Marine Anti-inflammatory Agents Feb 16 2020](#) Acute inflammation is a highly regulated process, and its dysregulation can lead to the development of a chronic inflammatory state which is believed to play a main role in the pathogenesis of many diseases, including cancer. In recent years, the need to find new anti-inflammatory molecules has raised the scientific community's interest for marine natural products. In this regard, the marine environment represents a source for isolating a wealth of bioactive compounds. In this Special Issue, the reported products have been obtained from microalgae, sea cucumber, octopus, squid, red alga-derived fungus, cnidarians, hard-shelled mussel, and sponges. This Special Issue of Marine Drugs covers both the in vitro and in vivo studies of marine agents with anti-inflammatory activities, in addition to clinical trials conducted in humans. Among the bioactive molecules reported in the papers are lipid compounds, such as glycolipids, which, for the first time, demonstrated their preventive effects in an inflammatory model of skin hyperplasia. In addition, beneficial effects of the carotenoid fucoxanthin were shown in the same model of skin hyperplasia, in UVB-induced damage and in a model of inflammatory pain. Moreover, frondanol, a lipid extract from *Cucumaria frondosa*, attenuated inflammation in an acute colitis model. Another paper evaluated the fatty acid compositions of lipid extracts from some common seafood organisms, reporting the highest level of omega 3 polyunsaturated fatty acids and the highest anti-inflammatory activity in the extracts from octopus and squid byproducts. Additionally, the anti-inflammatory effects of other marine compounds have been reported, including hirsutanol A, a sesquiterpene from the red alga-derived marine fungus *Chondrostereum* sp. NT0U4196, two zoanthamine alkaloids from the zoantharian *Zoanthus* cf. *pulchellus*, an ?-D-glucan from the hard-shelled mussel (*Mytilus coruscus*), and the polyphenol pyrogallol-phloroglucinol-6,6-bieckol from an edible marine brown alga.Finally, this Special Issue is supplemented by three reviews focused on the occurrence of prostaglandins in the marine environment and their anti-inflammatory role; fish lipid emulsions used to improve patient outcomes in an inflammatory environment, such as postoperative; and the chemically induced production of compounds with anti-inflammatory activity from microalgae.

[SS Walther PP/PPK Identification May 01 2021](#)

[Autoantibodies and Autoimmunity Mar 19 2020](#) This is the first book to address all aspects of the biology of autoantibodies in a single volume, including a discussion of immunology, experimental models, clinical aspects, and the use of autoantibodies as probes in molecular and cellular biology. The editor, currently professor at the W.M. Keck Autoimmune Disease Center of The Scripps Research Institute, has assembled an all-star team of authors to report on the latest research, technologies, and applications. Following an introductory chapter, the book goes on to cover such topics as cellular mechanisms of autoantibody production, clinical and diagnostic usefulness in human disease, and animal models used to study the elicitation of autoantibodies. The whole is rounded off with a look at future perspectives. With its comprehensive coverage, this volume will appeal not only to immunologists and clinicians but also to cell and molecular biologists.

[Walther Pistols Jun 21 2020](#) While the PP and PPK were intended for police work, the Walther P 38 was produced for the Germany military; all three pistols have garnered a formidable international reputation since the 1930s. The innovative Walther PP (Polizeipistole), a double-action semi-automatic pistol intended for the law-enforcement market, became available in 1929 and went on to arm the police of several European countries in the 1930s. Its smaller cousin the PPK, more readily concealed for undercover work but with reduced magazine capacity, was produced from 1931. Intended to replace the P 08 Luger, the Walther P 38 was issued from 1940 and equipped the armed forces of Germany and other countries during and after World War II, but never entirely replaced the Luger in German service. All three pistols went on to have lengthy and varied service across the world after 1945. Both the PP and the PPK remain in production today, while the P 38 re-emerged as the P1 and equipped West German forces from 1963 until 2004, when it was replaced by the P8. In this study, noted authority John Walter assesses the origins, development, use and legacy of these three high-profile semi-automatic pistols, alongside other Walther variants, such as the tiny .25 ACP Modell 9.

[Introductory Organic Chemistry and Hydrocarbons Nov 19 2022](#) A novel proposal for teaching organic chemistry based on a broader and simplified use of quantum chemistry theories and notions of some statistical thermodynamic concepts aiming to enrich the learning process of the organic molecular properties and organic reactions. A detailed physical chemistry approach to teach organic chemistry for undergraduate students is the main aim of this book. A secondary objective is to familiarize undergraduate students with computational chemistry since most of illustrations of optimized geometries (plus some topological graphs) and information is from quantum chemistry outputs which will also enable students to obtain a deeper understanding of organic chemistry.

[Cosmos & Culture Jan 29 2021](#) From GPO Bookstore's Website: Authors with diverse backgrounds in science, history, anthropology, and more, consider culture in the context of the cosmos. How does our knowledge of cosmic evolution affect terrestrial culture? Conversely, how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos? Are life, mind, and culture of fundamental significance to the grand story of the cosmos that has generated its own self-understanding through science, rational reasoning, and mathematics? Book includes bibliographical references and an index.

[The Campaign from Texas to Maryland Aug 24 2020](#)

[Territorio Comanche Oct 18 2022](#) Guerra de Bosnia, principios de los años noventa. Una novela extraordinaria que es, además, una lúcida reflexión sobre el periodismo «Para un reportero en una guerra, territorio comanche es el lugar donde el instinto dice que pares el coche y des media vuelta; donde siempre parece a punto de anochecer y caminas pegado a las paredes, hacia los tiros que suenan a lo lejos, mientras escuchas el ruido de tus pasos sobre los cristales rotos. El suelo de las guerras está siempre cubierto de cristales rotos. Territorio comanche es allí donde los oyes crujir bajo tus botas, y aunque no ves a nadie sabes que te están mirando.» Esta novela fue llevada al cine por Gerardo Herrero y protagonizada por Imanol Arias y Carmelo Gómez.

[Wired/Wireless Internet Communications Nov 26 2020](#) This book constitutes the refereed proceedings of the 5th International Conference on Wired/Wireless Internet Communications, WWIC 2007, held in Coimbra, Portugal in May 2007. The 32 revised full papers cover transport layer issues, handover and QoS, traffic engineering, audio/video over IP, IEEE 802.11 WLANs, sensor networks, protocols for ad-hoc and mesh networks, as well as OFDM systems.

[Elastic Waves and Ultrasonic Nondestructive Evaluation May 21 2020](#) During the last decade, the emergence of ultrasonic techniques for nondestructive evaluation of materials has provided a strong impetus for the study of propagation and diffraction of elastic waves. Elastic wave propagation studies have led to quantitative techniques for evaluation and service-life prediction of structures. The IUTAM Symposium provided an opportunity for researchers active in the interdisciplinary field of QNDE to assess progress and delineate areas of future research. Leading researchers presented state-of-the-art lectures, focusing attention on an important technological area in which wave propagation studies have made, and will continue to make important contributions toward advancing the technology. The volume provides a comprehensive overview on the current state of analytical, numerical, and experimental techniques as well as outlining future research needs. It provides evidence of important advances that have been made in the detailed analysis and experimental verification of ultrasonic scattering by single and multiple defects in isotropic medium.

[CO2 Pistols & Rifles Jan 17 2020](#) Current safety trends encourage shooters to opt for guns of less power, especially CO2-powered guns. Several airgun shooters are not required to go through the traditional buying procedures of high-powered pistols and rifles, such as background checks and waiting periods. Plus, companies such as Colt, Smith & Wesson, and Walther manufacture high quality CO2 products that are visually indistinguishable from their traditional firearms. In this new guide to CO2-powered pistols and rifles, James E. House offers a comprehensive history of CO2 guns, dating back to the 1930s, and a discussion of propulsion, pellets, and sights. Beginning shooters are introduced to the market with a complete analysis on performance and accuracy of currently available products. Airgun enthusiasts are reunited with CO2 classics no longer being manufactured. This book also offers additional sections on target shooting, games, and varmints. Offers a comprehensive history of CO2 pistols and rifles dating back to the 1930s Includes a categorical review of BB pistols, .177 caliber pistols, .20 and .22 caliber pistols, and rifles Discover products currently available only on the secondary market

[National Bureau of Standards Circular Sep 24 2020](#)

[Handguns 2002 Dec 08 2021](#) The latest edition of the top-selling handguns annual presents new reports on handguns for field and personal protection use. The comprehensive catalog section is fully updated, expanded, and well illustrated, displaying today's commercially available handguns. New feature articles provide the latest on trends, gun tests, selfdefense, and handgun hunting. The catalog section covers currently manufactured semi-custom handguns and commercial centerfire, rimfire, and blackpowder pistols, as well as airguns. Plus an accessories section covers handgun grips, sights, scopes, metallic reloading presses, and spotting scopes. An essential reference section gives enthusiasts the NRA Compendium of Firearms Laws, the NRA Right-to-Carry Reciprocity Guide, a directory of the handgunning trade, and listings of arms associations, periodicals, and books. - Extensively updated handgun catalog section - Expanded semi-custom handguns and handgun grips coverage - Latest trends, gun tests, self-defense, and handgun hunting

[The Homology of Hopf Spaces Jun 02 2021](#) This exposition of the theory of finite Hopf spaces details the development of the subject over the last thirty years, with the homology of such spaces as its main theme. The three chief areas of study in the volume are: - The study of finite H-spaces with torsion free integral homology. - The study of finite H-spaces with homology torsion. - The construction of finite H-spaces.

[Thorneycroft to SA80 Jul 23 2020](#) Reference work for all those interested in the history of military firearms. It charts the British love affair with the 'flipped' bullpup rifle and machine gun - weapons with their firing mechanism positioned behind the trigger - from a faltering start in the Edwardian period, through the controversy of the NATO rifle trials, to the troubled history of the current SA80 family.

[Functional Discourse Grammar Jan 09 2022](#) This book is the first comprehensive presentation of Functional Discourse Grammar, a new and important theory of language structure. The authors set out its nature and origins and show how it relates to contemporary linguistic theory. They demonstrate and test its explanatory power and descriptive utility against linguistic facts from over 150 languages across a wide range of linguistic families. After a full introduction the book is divided into chapters concerned with the four levels of grammatical representation - pragmatic, semantic, morphosyntactic, and phonological - each of which has its own hierarchical structure. Functional Discourse Grammar offers a thorough account of how the use and meaning of language influence linguistic form by conditioning two levels of formulation which feed into two levels of encoding, all with their own specific characteristics. The book offers an ideal introduction to the theory and its applications in typology and description for scholars in linguistics and related fields from graduate students upwards.

[Lloyd's Register of Shipping 1842 Oct 06 2021](#) The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

[Public-Key Cryptography – PKC 2021 Jan 21 2023](#) The two-volume proceedings set LNCS 12710 and 12711 constitutes the proceedings of the 24th IACR International Conference on Practice and Theory of Public Key Cryptography, PKC 2021, which was held online during May 10-13, 2021. The conference was originally planned to take place in Edinburgh, UK, but had to change to an online format due to the COVID-19 pandemic. The 52 papers included in these proceedings were carefully reviewed and selected from 156 submissions. They focus on all aspects of public-key cryptography, covering theory, implementations and applications. This year, post-quantum cryptography, PQC constructions and cryptanalysis received special attention.

[La explosión Mar 11 2022](#) El encubrimiento de los servicios de inteligencia de varios gobiernos, los más altos funcionarios del poder político argentino de los años 90, agentes de la SIDE y de la Policía Federal de los atentados a la Embajada de Israel y la AMIA. Aburrída en una guardia inmobiliaria, una mujer encuentra en un placard un impreso con información comprometedora sobre el atentado a la AMIA ocurrido en Buenos Aires en 1994. El título la estremece: Expediente bomba: el Irán-Baires-Bosnia-gate. Bajo el formato de una ficción, Horacio Lutzky, coautor del exitoso Iosi. El espía arrepetido, narra la trama secreta que terminó en la voladura de la mutual judía y las razones del encubrimiento del atentado. La explosión es el relato de una investigación escalofriante que, en el contexto de la guerra de los Balcanes, revela los hilos del contrabando de armas y explosivos en el que participaron traficantes y terroristas sirios, agentes iraníes, criminales de guerra nazis, importantes autoridades políticas y comunitarias argentinas, militares e integrantes de las fuerzas de seguridad, y algunos jueces, con el visto bueno de políticos y dirigentes israelíes y estadounidenses.
