The Patient Centered Value System Jun 01 2021 Imagine: You are a hospital Chief Executive Officer, Chief Financial Officer, medical or nursing director, patient safety specialist, quality improvement professional, or a doctor or nurse on the front lines of patient care. Every day you're aware that patients and families should be more engaged in their care so they would fare better both in the hospital and after discharge; their care could be safer and more seamlessly coordinated; patients should be ready for discharge sooner and readmitted less often; your bottom line stronger; your staff more fulfilled. You enter into new payment models such as bundling with an uneasy awareness that your organization is at risk because you don't know what the care you deliver actually costs. Like most healthcare leaders, you are also still searching for a way to deliver care that will help you to achieve the Triple Aim: care that leads to improved clinical outcomes, better patient and family care experiences, and reduced costs. Sound familiar? If so, then it's time to read *The Patient Centered Value System: Transforming Healthcare through Co-Design*. This book explains how to introduce the Patient Centered Value System in your organization to go from the current state to the ideal. The Patient Centered Value System is a three-part approach to co-designing improvements in healthcare delivery—collaborating with patients, families, and frontline providers to design the ideal state of care after listening to their wants and needs. Central to the Patient Centered Value System is seeing every care experience through the eyes of patients and families. The Patient Centered Value System is a process and performance improvement technique that consists of 1) Shadowing, 2) the Patient and Family Centered Care Methodology, and 3) Time-Driven Activity-Based Costing. Shadowing is the essential tool in the Patient Centered Value System that helps you to see every care experience from the point of view of patients and families and enables you to calculate the true costs of healthcare over the full cycle of care. Fundamental to the Patient Centered Value System is the building of teams to take you from the current state of care delivery to the ideal. Healthcare transformation depends not on individual providers working to fix broken systems, but on teams of providers working together while breaking down silos. The results of using the Patient Centered Value System are patients and families who are actively engaged in their care, which also improves their outcomes; providers who see the care experience from the patient's and family's point of view and co-design care delivery as a

result; the tight integration of clinical and financial performance; and the realization of the Triple Aim.

You Are Here Oct 05 2021 INSTANT NEW YORK TIMES BESTSELLER A new book from #1 New York Times bestselling author Jenny Lawson, destined to be a classic—part therapy, part best friend, part humor, part coloring book. When Jenny Lawson is anxious, one of the things she does is to draw. Elaborate doodles, beautiful illustrations, often with captions that she posts online. At her signings, fans show up with printouts of these drawings for Jenny to autograph. And inevitably they ask her when will she publish a whole book of them. That moment has arrived. You Are Here is something only Jenny could create. A combination of inspiration, therapy, coloring, humor, and advice, this book is filled with Jenny's amazingly intricate illustrations, all on perforated pages that can be easily torn out, hung up, and shared. Gathered together, this is life, happening right now, all around, in its messy glory, as only Jenny Lawson could show us.

Net Privacy Jul 22 2020 In our digital world, we are confused by privacy – what is public, what is private? We are also challenged by it, the conditions of privacy so uncertain we become unsure about our rights to it. We may choose to share personal information, but often do so on the assumption that it won't be re-shared, sold, or passed on to other parties without our knowing. In the eighteenth century, philosopher Jeremy Bentham wrote about a new model for a prison called a Panopticon, where inmates surrounded the jailers, always under watch. Have we built ourselves a digital Panopticon? Are we the guards or the prisoners, captive or free? Can we be both? When Kim Kardashian makes the minutiae of her life available online, which is she? With great rigour, this important book draws on a Kantian philosophy of ethics and legal frameworks to examine where we are and to suggest steps – conceptual and practical – to ensure the future is not dystopian. Privacy is one of the defining issues of our time; this lively book explains why this is so, and the ways in which we might protect it.

An emphasis was placed on research that has been conducted outside of the United States and was designed to give the reader a broader more global understanding of the social context of research. The goal of this volume is to provide a definitive reference for professionals in the field, researchers, and students. This volume in the Handbooks in Criminology and Criminal Justice series identifies the principal topical areas of research in this field and summarizes the various methodological and substantive challenges presented in conducting research on these issues. In each chapter, authors provide a summary of the prominent data collection efforts in the topical area, provide an overview of the current methodological work, discuss the challenges in the measurement of central concepts in the subject area, and identify new horizons emerging in data collection and measurement.
