It's late summer 1793, and the streets of Philadelphia are abuzz with mosquitoes and rumors of fever. Down near the docks, many have taken ill, and the fatalities are mounting. Now they include Polly, the serving girl at the Cook Coffeehouse. But fourteen-year-old Mattie Cook doesn't get a moment to mourn the passing of her childhood playmate. New customers have overrun her family's coffee shop, located far from the mosquito-infested river, and Mattie's concerns of fever are all but overshadowed by dreams of growing her family's small business into a thriving enterprise. But when the fever begins to strike closer to home, Mattie's struggle to build a new life must give way to a new fight--the fight to stay alive. This single author volume on close relationships in adulthood discusses the central issues in the field and points the way towards integrating our knowledge about human relationships. The self, interactions, relationships, and groups are treated as dynamic processes in dialectical relations with each other and with the socio-cultural structure of norms, values, beliefs, and institutions. The focus is on current work and current controversy, placed against a background of the knowledge that has been built up in recent decades. The book is suitable for advanced undergraduates and graduate students, and for research workers and clinicians. Literature from diverse disciplines is covered in a list of about 1600 titles.

Nineteenth-century British periodicals for girls and women offer a wealth of material to understand how girls and women fit into their social and cultural worlds, of which music making was an important part. The *Girl's Own Paper*, first published in 1880, stands out because of its rich musical content. Keeping practical usefulness as a research tool and as a guide to further reading in mind, Judith Barger has catalogued the musical content found in the weekly and later monthly issues during the magazine's first thirty years, in music scores, instalments of serialized fiction about musicians, music-related nonfiction, poetry with a musical title or theme, illustrations depicting music making and replies to musical correspondents. The book's introductory chapter reveals how content in *The Girl's Own Paper* changed over time to reflect a shift in women's music making from a female accomplishment to an increasingly professional role within the discipline, using 'the piano girl' as

a case study. A comparison with musical content found in The Boy's Own Paper over the same time span offers additional insight into musical content chosen for the girls' magazine. A user's guide precedes the chronological annotated catalogue; the indexes that follow reveal the magazine's diversity of approach to the subject of music. Cross-Examination: Science and Techniques, Third Edition is an extensive revision and reorganization of Pozner and Dodd's classic work, written to meet the needs of today's trial attorneys. Pozner and Dodd's signature techniques and methodologies, which have brought them acclaim as the nation's leading experts on cross-examination, are illustrated with numerous new examples added specifically for the Third Edition. The authors provide their best-ever coverage of the "chapter

method” of cross-examination with additional excerpts to illustrate various trial scenarios. New content also includes Chapter 6 on Cross Preparation Systems: Sourcing the Facts, giving you the tools to immediately inform a witness, and the court, what electronic or paper document you are using and exactly where in the document is the material upon which you are questioning. As always, the authors, who have lectured on cross-examination to thousands of attorneys worldwide, guide you to successful trial outcomes with a conversational, engaging, and easy-to-read writing style. Inside you'll find valuable advice on how to: Use opponents' objections as the springboard for deeper and broader cross-examinations. Sequence cross-examination to teach the theory of the case in the best way, and to literally expand the rules of admissibility Use “loops” (the practice of incorporating and repeating key phrases and terms in successive questions to the witness) to rename witnesses and exhibits. Use “double loops” to discredit opposing expert witnesses. Use voir dire to create great jurors Use a fact-driven investigation to develop a winning theory Use a witness's own words to follow your theme and theory Control the runaway witness Communicate winning theories in opening, cross, and closing Use loops to box in the witness Use tactical sequencing to create the most powerful cross Convert a witness's silence into admission of fact Induce the witness to voice your pre-selected words Prepare for devastating impeachment Close off any escape routes for the witness Punish the evasive or “I don't know” witness Control the crying witness Use timing, posture, inflection, diction, wording, eye contact, and other effects to emphasize a witness's concession Effective cross-examination is a science with established guidelines, identifiable techniques, and definable methods. Attorneys can learn how to control the outcome with careful preparation, calculated strategy, effective skills, and a disciplined demeanor. Pozner and Dodd's treatise remains the definitive guide to preparing killer cross-examinations, only from LexisNexis.
