A collection of T.S. Eliot's poems which concern cats including "Mr. Mistoffelees," and "Skimbleshanks: The Railway Cat." This engaging, informative collection of Victorian nonfiction prose juxtaposes classic texts and canonical writers with more obscure writings and authors in order to illuminate important debates in nineteenth-century Britain -- inviting modern readers to see the age anew. The collection represents the voices of a broad scope of women and men on a range of nineteenth-century cultural issues and in various forms -- from periodical essays to travel accounts, letters to lectures, and autobiographies to social surveys. With its fifty-six substantial selections, *Victorian Prose* reaches beyond the work of Carlyle, Newman, Mill, Arnold, and Ruskin to uncover an array of lesser-known voices of the era. Women writers are given full attention -- writings by Mary Prince, Dinah M. Craik, Florence Nightingale, Frances P. Cobbe, and Lucie Duff Gordon are among the entries. Excerpts cover such topics of the age as British imperialism, the crisis of religious faith, and debates about gender. On the issue of colonial expansion, opinions range from Benjamin Disraeli's celebration of empire-building as evidence of Britain's glory to David Livingstone's promotion of commerce with Africa as a way to retard the slave trade and make it unprofitable. Views on "the woman question" extend from John Stuart Mill's defense of women's rights to Mrs. Humphry Ward's opposition to women's franchise and Sarah Ellis's support for the domestic ideal. This invaluable resource features: ?attention to important noncanonical writers -- including a generous selection of women writers; ?a wide range of written forms, including periodical essays, travel accounts, letters, lectures,

autobiographies, and social surveys; ?both chronological and thematic tables of contents -- the latter encompassing subject areas such as England at home and abroad, the new sciences, religion, and the status of women; ?selections drawn from the original nineteenth-century editions; and ?annotations to each text that aid nonspecialists in understanding unfamiliar names, terms, and cultural debates. Working from the premise that the lives of people with learning disabilities are of innate value, and that exploring and celebrating people's experiences demonstrates their value in a practical way, this book provides a manual on working with memories in groups and individually. It includes: a clear rationale for and guidance on the benefits of this approach; good practice guidelines for memory work; a chapter on life story work with individuals; a section on working with those with learning

disabilities and dementia; ideas for dozens of activities on 15 themes associated with memories of the past, including - the childhood years; food, cooking and shopping; days out and holidays; fashions, clothing and looking good; and, hobbies, interests and work experience. Hayden White borrows the title for *The Practical Past* from philosopher Michael Oakeshott, who used the term to describe the accessible material and literary-artistic artifacts that individuals and institutions draw on for guidance in quotidian affairs. *The Practical Past*, then, forms both a summa of White's work to be drawn upon and a new direction in his thinking about the writing of history. White's monumental *Metahistory: The Historical Imagination in Nineteenth-Century Europe* (1973) challenged many of the commonplaces of professional historical writing and wider assumptions about the ontology of history itself. It formed the basis of his argument that we can never recover "what actually happened" in the past and cannot really access even material culture in context. Forty years on, White sees "professional history" as falling prey to narrow specialization, and he calls upon historians to take seriously the practical past of explicitly "artistic" works, such as novels and dramas, and literary theorists likewise to engage historians. This book offers a new account of Aristotle's practical philosophy. Pavlos Kontos argues that Aristotle does not restrict practical reason to its action-guiding and motivational role; rather, practical reason remains practical in the full sense of the term even when its exercise does not immediately concern the guidance of our present actions. To elucidate why this wider scope of practical reason is important, Kontos brings into the foreground five protagonists that have long been overlooked: (a) spectators or judges who make non-motivational judgments about practical matters that do not interact with their present deliberations and actions; (b) legislators who exercise practical reason to establish constitutions and laws; (c) hopes as an active engagement with moral luck and its impact on our individual lives; (d) prayers as legislators' way to deal with the moral luck hovering around the birth of constitutions and the prospect of a utopia; and (e) people who are outsiders or marginal cases of the responsibility community because they are totally deprived of practical reason. Building on a wide range of interpretations of Aristotle's practical philosophy (from the ancient commentators to contemporary analytic and continental philosophers), Kontos offers new insights about Aristotle's philosophical contribution to the current debates about radical evil, moral luck, hope, utopia, internalism and externalism, and the philosophy of law. *Aristotle on the Scope of Practical Reason* will appeal to researchers and advanced students interested in Aristotle's ethics, ancient philosophy, and the history of practical philosophy. Describes in detail the main psychiatric conditions encountered in old age and their management with useful brief case histories to illustrate the practical realities of working in this area. This book also offers a comprehensive approach to the assessment and management of psychiatric disorders in old age. *Remembering Popular Music's Past* capitalizes on the growing interest, globally, in the preservation of popular music's material past and on scholarly explorations of the ways in which popular music, as heritage, is produced, legitimized and conferred cultural and historical significance. The chapters in this collection consider the spaces, practices and representations that constitute popular music heritage to elucidate how popular music's past is lived in the present. Thus the focus is on the transformation of popular music into heritage, and the role of history and memory in this

process. The cultural studies framework adopted in *Remembering Popular Music's Past* encompasses unique approaches to popular music historiography, sociology, film analysis, and archival and museal work. Broadly, the collection deals with the precarious nature of popular music heritage, history and memory. *Brave Old World* is Tom Hodgkinson's year-round guide to the ancient art of husbandry. In this indispensable addition to his much-loved guides for the free-spirited, Tom Hodgkinson takes us on a modern tour of the ancient arts of everyday living: philosophy, husbandry and merriment. Drawing on the wisdom of an eclectic range of thinkers and writers, and, as ever, on Tom's own honestly recounted and frequently imperfect attempts to travel the road to self-sufficiency, *Brave Old World* charts the progress of a year in pursuit of the pleasures of the past. From January to December, let Tom be your guide to a better, older way of life. 'A meditation on why life has been a dreadful mistake ever since the Reformation brought us paid jobs and the work ethic. *Brave Old World* is hugely inspiring even when it is most bonkers' Sarah Bakewell, *New Statesman* 'A delightful read. This groundbreaking account of postwar American art traces the profound influence of Antonin Artaud *Proposing an original reassessment of art from the 1950s to the 1970s*, *No More Masterpieces* reveals how artistic practice in postwar America was profoundly shaped by the work of the rebellious French poet and dramatist Antonin Artaud (1896-1948). A generation of artists mobilized Artaud's countercultural ideas to imagine new forms of representation and to redefine the relationship between artist and audience. The book shows how Artaud's radical writings inspired the experimental theatrical work of John Cage, Rachel Rosenthal, and Allan Kaprow; the attack on artistic and social conventions launched by assemblage artists Wallace Berman and Bruce Conner; and the feminist work of Carolee Schneemann and Nancy Spero. Lucy Bradnock traces the dissemination of Artaud's writings in America and demonstrates how his interest in political and cultural disorder, the dangers of authority, and the unreliability of representation found fertile ground in the context of the Cold War, disillusionment with the ideals of Abstract Expressionism, and the early years of identity politics. In *Trauma and Memory*, bestselling author Dr. Peter Levine (creator of the Somatic Experiencing approach) tackles one of the most difficult and controversial questions of PTSD/trauma therapy: Can we trust our memories? While some argue that traumatic memories are unreliable and not useful, others insist that we absolutely must rely on memory to make sense of past experience. Building on his 45 years of successful treatment of trauma and utilizing case studies from his own practice, Dr. Levine suggests that there are elements of truth in both camps. While acknowledging that memory can be trusted, he argues that the only truly useful memories are those that might initially seem to be the least reliable: memories stored in the body and not necessarily accessible by our

conscious mind. While much work has been done in the field of trauma studies to address "explicit" traumatic memories in the brain (such as intrusive thoughts or flashbacks), much less attention has been paid to how the body itself stores "implicit" memory, and how much of what we think of as "memory" actually comes to us through our (often unconsciously accessed) felt sense. By learning how to better understand this complex interplay of past and present, brain and body, we can adjust our relationship to past trauma and move into a more balanced, relaxed state of being. Written for trauma sufferers as well as mental health care practitioners, *Trauma and Memory* is a groundbreaking look at how memory is constructed and how influential memories are on our present state of being. Master storyteller Alice Hoffman brings us the conclusion of the Practical Magic series in a spellbinding and enchanting final Owens novel brimming with lyric beauty and vivid characters. The Owens family has been cursed in matters of love for over three-hundred years but all of that is about to change. The novel begins in a library, the best place for a story to be conjured, when beloved aunt Jet Owens hears the deathwatch beetle and knows she has only seven days to live. Jet is not the only one in danger—the curse is already at work. A frantic attempt to save a young man's life spurs three generations of the Owens women, and one long-lost brother, to use their unusual gifts to break the curse as they travel from Paris to London to the English countryside where their ancestor Maria Owens first practiced the Unnamed Art. The younger generation discovers secrets that have been hidden from them in matters of both magic and love by Sally, their fiercely protective mother. As Kylie Owens uncovers the truth about who she is and what her own dark powers are, her aunt Franny comes to understand that she is ready to sacrifice everything for her family, and Sally Owens realizes that she is willing to give up everything for love. *The Book of Magic* is a breathtaking conclusion that celebrates mothers and daughters, sisters and brothers, and anyone who has ever been in love.

Presenting the most comprehensive and lucid account of the topic currently available, Robert Audi's "Practical Reasoning and Ethical Decision" is essential reading for anyone interested in the role of reason in ethics or the nature of human action. The first part of the book is a detailed critical overview of the influential theories of practical reasoning found in Aristotle, Hume and Kant, whilst the second part examines practical reasoning in the light of important topics in moral psychology - weakness of will, self-deception, rationalization and others. In the third part, Audi describes the role of moral principles in practical reasoning and clarifies the way practical reasoning underlies ethical decisions. He formulates a comprehensive set of concrete ethical principles, explains how they apply to reasoning about what to do, and shows how practical reasoning guides moral conduct. Building Cities to LAST presents the myriad issues of sustainable urbanism in a clear and concise system, and supports holistic thinking about sustainable development in urban environments by providing four broad measures of urban sustainability that differ radically from other, less long-lived patterns: these are Lifecycle, Aesthetics, Scale, and Technology (LAST). This framework for understanding the relationship between these four measures and the essential types of infrastructure—grouped according to the basic human needs of Food, Shelter, Mobility, and Water—is laid out in a simple and easy-to-understand format. These broad measures and infrastructures address the city as a whole and as a recognizable pattern of human activity and, in turn, increase the ability of cities—and the human race—to LAST. This book will find wide readership particularly among students and young practitioners in architecture, urban planning, and landscape architecture. The book provides a comprehensive overview of American cultural resource management and historic preservation. It is designed for introductory and advanced courses in archaeology, history, and architecture. It explores the structure, historic background, laws, and governmental and professional players in American heritage management systems. Practical theology has become a well-established academic discipline in Britain and Ireland over the past half century, evidenced in its chairs, journals, books, conferences, and contribution to transformed practices. The British and Irish Association for Practical Theology (BIAPT) and its journal, Practical Theology, has had a significant role to play in the story of the discipline. This volume is a celebration of practical theology in Britain and Ireland in all its inventiveness and variety on the occasion of BIAPT's twenty-fifth birthday. It offers an account of its roots in its emergence from the Scottish Pastoral Association in the 1960s, its trajectories established in the journal Contact/Practical Theology and how human experience has been a constant companion on the journey. The book considers a range of methodologies including engagement with popular culture, public theology, the arts, and the importance of conversation. It explores new shoots in the discipline that consider how sexuality, ethnicity, and different religious traditions may be addressed within practical theology. It concludes by asking how it may be fruitful in the future, by reflecting on the challenges ahead, not least the ubiquity of ignorance. This is a landmark text in the unfolding of British and Irish practical theology in all its glorious distinctiveness, which promises to be a major contribution to international debate in the discipline. The chapters in this book were first published in Practical Theology.
