First trialled in Europe in the spring of 1945, but formally introduced into British Army service in December 1946, not only is the Centurion one of the most important tanks in the history of the British armoured fighting vehicle (AFV), but it is also one of the most significant post-war Western tanks. Between 1946 and 1962, 4,423 Centurions were built in 13 basic marks and numerous variants, with the chassis also adapted for several other AFV roles. A small number of the Beach Armoured Recovery Version (BARV) served with the British forces during the Iraq War of 2003, some 58 years after the Centurion first entered service! The Centurion has seen extensive combat in the Korean War (Britain), Vietnam (Australia), the Middle East (Israel) in the 1967 Six Day War, 1973 Yom Kippur War, and during the 1978 and 1982 invasions of Lebanon, and in the Indo-Pakistan War (India) in 1965 where it fought against US-supplied M47 and M48 Patton tanks. Vols. for 1971- include annual reports and statistical summaries. Features- Engine and cylinder head service, repair and reconditioning, including camshaft toothed belt setup and adjustment.- Coverage of Motronic 5.9, 7.5 and Diesel Turbo Direct Injection (TDI) engine management systems.- Drivetrain maintenance, troubleshooting, adjustment and repair, including hydraulic clutch, gearshift linkage, and drive axles.- Suspension component replacement, including front struts, rear shocks, rear coil springs, and wheel bearing/hub units.- Repair information for ABS/EDL/ASR/ESP brake systems.- Heating and air conditioning repair, including A/C component replacement.- Body adjustment and repairs, including front and rear clip removal and installation.- Wiring schematics for all circuits, including fuse/relay locations and a general explanation of electrical circuitry.- New scan tool section with OBDII diagnostic trouble codes, control module coding and readiness codes. George S. Patton. Patton, commander of the U.S. Third Army during World War II, was one of the earliest American proponents of tanks. The M48 was a further development of the M47, and served as the U.S. Army and Marine Corps's primary tank during the Vietnam War. The M48 was a completely new tank design, and the last U.S. tank to mount a 90mm gun. Nearly 12,000 were built between 1952 and 1959. It was initially outfitted with a somewhat unreliable gasoline engine which, during the Arab-Israeli conflicts, proved vulnerable to conflagrations when hit by enemy fire. Beginning in 1948, some units were upgraded to the M28A3 model which used a safer and more reliable diesel engine. In the mid-1970s improved M48A5 models were created which carried the 105mm gun. These served well into the 1980s with American forces and many continue in service today with foreign armies. Created in 1955, this field manual reveals a great deal about the M48's design and capabilities. Intended as a

manual for training and operation, it details many characteristics of the tank, and explains in detail the fire-control instruments. Furthermore, it describes the firing duties, crew drills, and service of the piece. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. The 90mm gun tank M47 Patton is an American medium tank and the second tank to be named after General George S. Patton, commander of the U.S. Third Army during World War II. It was a further development of the M46 Patton tank. The M47 was the U.S. Army's and Marine Corps' primary tank, intended to replace the M46 Patton and M4 Sherman medium tanks. The M47 was the only Patton series tank that never saw combat while in United States service. Many different M47 Patton models remain in service internationally. The M47 Patton was developed by the Detroit Arsenal, and entered production in 1951. Its main gun was the M36 (T119E1) 90-mm gun with an M12 optical rangefinder fitted. The secondary armament consisted of two .30cal Browning machine guns, one in the bow of the hull and one coaxial machine gun in the turret, and a .50cal Browning M2 on a pintle mount on the turret roof. The M47 was the last American designed tank to include a bow machine gun. Created in 1952, this technical manual reveals a great deal about the 90-mm gun tank M47, and its design and capabilities. Intended as a manual for those responsible for operation and maintenance, it details many aspects of the M47's engine, turret, and cooling system. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. The BMW 3 Series (F30, F31, F34) Service Manual: 2012-2015 contains in-depth maintenance, service and repair information for the BMW 3 Series from 2012 to 2015. The aim throughout has been simplicity and clarity, with practical explanations, step-by-step procedures and accurate specifications. Whether you're a professional or a do-it-yourself BMW owner, this manual helps you understand, care for and repair your 3 Series. Engines (Gasoline): N20 engine: 320i, 328i, including xDrive N26 (SULEV) engine: 328i including xDrive N55 engine: 335i, including xDrive A comprehensive manual on how to keep your car in peak condition and to maintain its value. Vehicle Maintenance.
