**The United States of Excess Jan 21 2023 Compared to other wealthy countries, America stands out as a gluttonous over-consumer of both food and fuel. The United States boasts an obesity prevalence double the industrial world average, and per capita carbon emissions twice the average for Europe. Still worse, the policy steps taken by America in response to obesity and climate change have so far been the weakest in the industrial world. These aspects of America's exceptionalism are nothing to be proud of. Is it possible that America is hard-wired to consume too much food and fuel? Unfortunately, yes, says Robert Paarlberg in *The United States of Excess*. America's excess is driven in each case by its distinct endowment of material and demographic resources, its unusually weak national political institutions, and a unique political culture that celebrates both individual freedoms over social responsibility, and free markets over governmental authority. America's over-consumption is shown to be over-determined. Because of these powerful underlying circumstances, America's strongest policy response, both to climate change and obesity, will be adaptation rather than mitigation. As the damaging consequences of climate change become manifest, America will not impose adequate measures to reduce**

**fossil fuel consumption, attempting instead to protect itself from storms and sea-level rise through costly infrastructure upgrades. In response to the damaging health consequences of obesity, America will opt for medical interventions and physical accommodations, rather than the policy measures that would be needed to induce better diets or more exercise. These adaptation responses will generate serious equity problems, both at home and abroad. Responding to obesity with medical interventions will fall short for those in America most prone to obesity - racial minorities and the poor - since these groups have never enjoyed adequate access to quality health care. Responding to climate change by building more resilient infrastructures at home, while allowing atmospheric concentrations of CO2 to continue their increase, will impose greater climate disruption on poor tropical countries, which are far less capable of self-protection. Awareness of these inequities must be the starting point toward altering America's current path.**

**Paper Monsters Nov 26 2020 In Paper Monsters, Samuel Fallon charts the striking rise, at the turn to the seventeenth century, of a new species of textual being: the serial, semifictional persona. When Thomas Nashe introduced his charismatic alter ego Pierce Penilesse in a 1592 text, he described the figure as a "paper monster," not fashioned but "begotten" into something curiously like life. The next decade bore this description out, as Pierce took on a life of his own, inspiring other writers to insert him into their own works. And Pierce was hardly alone: such figures as the polemicist Martin Marprelate, the lovers Philisides and Astrophil, the shepherd-laureate Colin Clout, the prodigal wit Euphues, and, in an odd twist, the historical author Robert Greene all outgrew their fictional origins, moving from text to text and author to author, purporting to speak their own words, even surviving their creators' deaths, and installing themselves in the process as agents at large in the real world of writing, publication, and reception. In seeking to understand these "paper monsters" as a historically specific and rather short-lived phenomenon, Fallon looks to the rapid expansion of the London book trade in the years of their ascendancy. Personae were products of print, the medium that rendered them portable, free-floating figures. But they were also the central fictions of a burgeoning literary field: they embodied that field's negotiations between manuscript and print, and they forged a new form of public, textual selfhood. Sustained by the appropriative rewritings they inspired, personae came to seem like autonomous citizens of the literary public. Fallon argues that their status as collective fictions, passed among writers, publishers, and readers, positioned personae as the animating figures of what we have come to call "print culture."**

**Culture and Cultural Politics Under Reza Shah Jul 03 2021 Culture and Cultural Politics Under Reza Shah presents a collection of innovative research on the interaction of culture and politics accompanying the vigorous modernization programme of the first Pahlavi ruler. Examining a broad spectrum of this multifaceted interaction it makes an important contribution to the cultural history of the 1920s and 1930s in Iran, when, under the rule of Reza Shah Pahlavi, dramatic changes took place inside Iranian society. With special reference to the practical implementation of specific reform endeavours, the**

**various contributions critically analyze different facets of the relationship between cultural politics, individual reformers and the everyday life of modernist Iranians. Interpreting culture in its broadest sense, this book brings together contributions from different disciplines such as literary history, social history, ethnomusicology, art history, and Middle Eastern politics. In this way, it combines for the first time the cultural history of Iran's modernity with the politics of the Reza Shah period. Challenging a limited understanding of authoritarian rule under Reza Shah, this book is a useful contribution to existing literature for students and scholars of Middle Eastern History, Iranian History and Iranian Culture.**

**Culture in Minds and Societies Jan 29 2021 In short, Culture in Minds and Societies: Foundations of Cultural Psychology presents a new look at the relationship between people and society, produces a semiotic theory of cultural psychology and provides a dynamic treatment of culture in human lives. This book makes a decisive break from the post-modernist theoretical framework that considers knowledge as local and situation-specific. It restores the goal of construction of general knowledge to the social sciences. While recognizing the uniqueness of all human personal experience from birth to death, it emphasizes the universality of cultural organization of human minds and societies.**

**Paper Families Dec 28 2020 The Chinese Exclusion Act of 1882 made the Chinese the first immigrant group officially excluded from the United States. In Paper Families, Estelle T. Lau demonstrates how exclusion affected Chinese American communities and initiated the development of restrictive U.S. immigration policies and practices. Through the enforcement of the Exclusion Act and subsequent legislation, the U.S. immigration service developed new forms of record keeping and identification practices. Meanwhile, Chinese Americans took advantage of the system's loophole: children of U.S. citizens were granted automatic eligibility for immigration. The result was an elaborate system of "paper families," in which U.S. citizens of Chinese descent claimed fictive, or "paper," children who could then use their kinship status as a basis for entry into the United States. This subterfuge necessitated the creation of "crib sheets" outlining genealogies and providing village maps and other information that could be used during immigration processing. Drawing on these documents as well as immigration case files, legislative materials, and transcripts of interviews and court proceedings, Lau reveals immigration as an interactive process. Chinese immigrants and their U.S. families were subject to regulation and surveillance, but they also manipulated and thwarted those regulations, forcing the U.S. government to adapt its practices and policies. Lau points out that the Exclusion Acts and the pseudo-familial structures that emerged in response have had lasting effects on Chinese American identity. She concludes with a look at exclusion's legacy, including the Confession Program of the 1960s that coerced people into divulging the names of paper family members and efforts made by Chinese American communities to recover their lost family histories.**

podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. **Culture and the City Jun 02 2021 This edited collection will examine the way in which cities are imagined, experienced and shaped by those who reside within them, those who manage or govern them, and those who, as visitor, tourist or traveller, pass through them. Attention will be paid to the influence that these various inhabitants have on city life and living and the dialectic that exists between their sometimes collective and sometimes divergent, perceptions and uses of city space. In conjunction with this, the collection will explore the ways in which local culture and cultural policy are used by public and private interests as the framework for changing the image and amenity of the city in order to raise its profile and attract tourists. The book contributes to discussions of the increasingly high profile place that cultural programs have in urban regeneration initiatives and explore the tensions, conflicts and negotiations that emerge in urban spaces as a result of policy and culture coming together. Papers will be sought from researchers around the world with a view to examining the nexus between tourism, leisure and cultural programming from a number of perspectives and with reference to a range of international case studies. This book was published as a special issue of the Journal of Policy Research in Tourism, Leisure and Events.**

An Encounter and Business Negotiations between Iceland and Portugal Oct 26 2020 Seminar paper from the year 2019 in the subject Business economics - Corporate communication, grade: 1.3, University of Applied Sciences Aschaffenburg, language: English, abstract: The paper focuses on the role of culture in negotiations across cultures in business. Starting point of the paper will be the theoretical analysis of the selected cultures of Portugal and Iceland with the help of relevant theories/approaches regarding culture's impact on negotiations. The impact of culture on negotiations in business will then be analyzed in a practical part with the help of a specific critical incident with focus on the Portuguese and Icelandic culture. The paper focuses on selected cultural aspects. The focus was chosen on aspects that show the most interesting differences between the cultures of Iceland and Portugal and that are most interesting for the critical incident. The**

**paper focuses on communication aspects, that are important during negotiations, as well as the monochronic and polychronic time orientation and Gestelands' pattern of relationship-focus and deal-focus. Cross-cultural negotiations are getting more and more important in the business context. Doing business abroad, using sources and hiring workforce from other cultures make cross-cultural negotiations between professionals necessary, especially in times of globalization. In international business, great benefits can be gained from cross-cultural negotiations, nevertheless negotiations across cultures are more complex than negotiations between persons from the same country or culture. Negotiations between people from different cultures add an entire dimension to any negotiation introducing inter alia language barriers, differences in body language and alternative ways of expressing pleasure or displeasure with the elements of the deal that is negotiated. A professional negotiator has to understand the cultures of the participants, as well as culturally specific aspects. People that are involved in international negotiations have to acquire a skill set that is useful in the prevention of undesired perceptions and that promotes successful negotiation outcomes. According to the authors Shi and Wright the business executive's work has an increasingly international orientation and international business negotiation becomes an important competency in a global business environment.**

**Paper, Performance, and the State May 21 2020** This book explores the changing socio-cultural world in early modern South Asia, and locates the agency of the Mughal state therein. The development of literacy and new forms of engagement between literacy and performance prompted the opening up of new spaces of social communication, and led to the development of a performative (and somatic) public sphere in South Asia. The work highlights the significance of legal spaces, along with the markets and coffeehouses, in shaping the emergent public sphere. While defending the case for legal pluralism, it argues that the Mughal state endured and enhanced the diversity in the legal order. Focusing on the socially embedded attributes of the state, it looks at how the state's relations with the local powers impinged on, and reproduced community identities, identity conflicts, legal pluralism, property relations, and different forms of social communication.

**Accountability in Social Services Nov 14 2019 Accountability in Social Services examines how - and why - social and human services programs can function even though they are monitored by written communication instead of face-to-face interaction. Author Jill Florence Lackey draws on her experience as a consultant for more than 50 social programs and as director of two nonprofit organizations to demonstrate the strong need for accountability mechanisms and an ethics-based leadership when running social service programs. This unique book walks you through the process of how "paper programs" emerge and operate, the monitoring mechanisms that are - and aren't - in place during program operations, and recommendations to increase accountability in the social service delivery system. The book examines programs focusing on: youth aftercare adolescent health drug prevention rural community development crime prevention violence intervention services to the homeless and more. Accountability in Social Services concludes with recommendations for organized action by consumer groups to increase responsibility in the social service delivery system. This book is invaluable as a resource for students, teachers, and practitioners working in social work and welfare, evaluation, organizational leadership, public policy, applied anthropology, and consumer science, including local organizations such as PIRGs (Public Interest Research Groups).**

**Criticism and feedback talks using Meyer's Culture Map and Hofstede's Value Dimensions. How to ideally criticize individual employees and teams in Japan and the USA Jul 23 2020 Seminar paper from the year 2020 in the subject Leadership and Human Resource Management - Miscellaneous, grade: 1,3, Aachen University of Applied Sciences, language: English, abstract: This paper uses the theoretical foundations of Hofstede's Cultural Dimensions and Meyer's Cultures Map to develop feedback guidelines for a Dutch manager in Japan and a French manager in the USA. For this purpose, the countries concerned are first classified and compared using Meyer's and Hofstede's cultural classification methods. Based on the theoretical foundation, feedback guidelines are developed for the respective managers. With regard to the Dutch manager in Japan, it is particularly evident that he should be careful to use a language that is not too direct and that he needs to adapt to the Japanese high-context culture in both speech and behavior. The French manager in the USA is advised mainly to use diplomacy and understand flatter hierarchies and greater willingness to**

**take risks. In a further step, the developed guidelines are compared with feedback rules of the Dutch company Philips and the French company WEKA. In both theory and practice, great importance is attached to an efficient discussion structure. At Philips, importance is also attached to a conversation at eye level and the employee's point of view, which corresponds with the theoretical findings. In the French example, less emphasis is placed on preparation, which is surprising in terms of the theoretical classification of France. Instead, a calm and "non-violent" communication is called for, which to a certain extent is also addressed in the theoretically based guideline. The results of the term paper provide assistance for managers in Japan and the USA. However, it must be remembered that cultures are a very complex construct and that, due to the scope of this term paper, it was not possible to include all components. Managers are advised to deal intensively with the host country's culture in order to ensure appropriate and efficient interaction with employees. The results also suggest further studies on the topic. Thereby additional theoretical approaches as well as experience reports from managers in practice should be included. Due to the constantly evolving worldwide cultural diversity, insightful findings can be expected.**
