Open-Channel Hydraulics, originally published in 1959, deals with the design for flow in open channels and their related structures. Covering both theory and practice, it attempts to bridge the gap that generally exists between the two. Theory is

introduced first and is then applied to design problems. In many cases the application of theory is illustrated with practical examples. Theory is frequently simplified by adopting theoretically less rigorous treatments with sound concepts, by avoiding use of advanced mathematical manipulations, or by replacing such manipulations with practical numerical procedures. To facilitate understanding of the subject matter, the treatment is mostly based on the condition of one- or two-dimensional flow. The book deals mainly with American practice but also includes related information from many countries throughout the world. Material is divided into five main sections for an orderly and logical treatment of the subject: Basic Principles. Uniform Flow, Varied Flow, Rapidly Varied Flow, and Unsteady Flow. There are 67 illustrative examples, 282 illustrations, 319 problems, and 810 references. This classic textbook was the first English-language book on the subject in two decades. Open-Channel Hydraulics is a valuable text for students of engineering mechanics. hydraulics. civil. agricultural. sanitary. and mechanical engineering, and a helpful compendium for practicing engineers. Dr. Ven Te Chow was a Professor of Hydraulic Engineering and led the hydraulic engineering research and teaching programs at the University of Illinois. Through many years of experience as a teacher, engineer, researcher, writer. lecturer, and consultant, he became an internationally recognized leader in the fields of hydraulics, hydrology and hydraulic engineering. Dr. Ven Te Chow authored two technical books and more than 60 articles and papers in scientific and engineering magazines and journals.

He was a member of IAHR, ASCE, AGU, AAAS, SEE, and Sigma Xi, and had been Chairman of the American Geophysical Union's Permanent Research Committee on Runoff. In Philadelphia, nothing is the same after a deadly shooting has everyone on edge and revenge is in the air. This text is listed on the Course of Reading for SOA Exam P. Probability and Statistics with Applications is an introductory textbook designed to make the subject accessible to college freshmen and sophomores concurrent with Calc II and III, with a prerequisite of just one semester of calculus. It is organized specifically to meet the needs of students who are preparing for the Society of Actuaries qualifying Examination P and Casualty Actuarial Society's new Exam S. Sample actuarial exam problems are integrated throughout the text along with an abundance of illustrative examples and 870 exercises. The book provides the content to serve as the primary text for a standard two-semester advanced undergraduate course in mathematical probability and statistics. 2nd Edition Highlights Expansion of statistics portion to cover CAS ST and all of the statistics portion of CAS SAbundance of examples and sample exam problems for both Exams SOA P and CAS SCombines best attributes of a solid text and an actuarial exam study manual in one volumeWidely used by college freshmen and sophomores to pass SOA Exam P early in their college careersMay be used concurrently with calculus coursesNew or rewritten sections cover topics such as discrete and continuous mixture distributions, non-homogeneous Poisson processes, conjugate pairs in Bayesian estimation, statistical sufficiency, non-parametric statistics, and other topics also

relevant to SOA Exam C. A photography instructor guides individuals in the mechanics of taking, developing, and printing black-and-white pictures.

'De Bernieres is a singular, cherishable voice' Mail on Sunday

From the master of historical fiction, this book follows an unforgettable family after the Second World War. Some bonds are hard to break... Daniel Pitt was an RAF fighter in the First World War and an espionage agent for the SOE in the Second. Now the conflicts he faces are closer to home. Daniel's marriage has fractured beyond repair and Daniel's relationship with his son, Bertie, has been a failure since Bertie was a small boy. But after his brother Archie's death, Daniel is keen for new perspectives. He first travels to Peshawar to bury Archie in the place he loved best, and then finds himself in Canada, avoiding his family and friends back in England. Daniel and Bertie's different experiences of war, although devastating, also bring with them the opportunity for the two to reconnect. If only they can find a way to move on from the past... At first light the finches are flitting about the trees

In this companion volume to JOYFUL NOISE: POEMS FOR TWO VOICES, the winner of the 1989 Newbery Medal, Paul Fleischman celebrates the sound, the sense, the essence of birds. Written to be spoken aloud by two voices, sometimes alternating, sometimes simultaneous, these poems perfectly capture the beauty of birds in their singing, soaring, and rejoicing. This thorough, concise, and easy-to-use guide to capturing digital photographs provides an entire step-by-step course

for budding digital photographers. All concepts are fully illustrated with sample work by internationally renowned professionals, representing editorial work, photojournalism, and everything in between. Topics covered include essential information for both film and digital photography, such as exposure controls and shutter speed, as well as digital-specific information on image editing, printing methods, and even file storage. The first digital textbook by legendary photography teacher Henry Horenstein, *Digital Photography* is the best guide yet for aspiring digital photographers, essential both for photographers transitioning from film to digital and those learning the art of photography for the first time. In today's digital environment the workplace is characterised by individuals creating information perhaps independently of formal systems, or establishing new systems without knowledge of information management requirements. This book explains and explores the concept of organisational culture, specifically within the domain of information management. It draws on the author's wide-ranging practical experience in different workplaces and uses research findings from cross-cultural studies of information management. Uses research findings from cross-cultural studies of information management Provides tools to develop practical and realistic solutions to real-world problems Draws on the author's wide-ranging practical experience in different workplaces. On the 20th of January 1526, the *Santiago* left Lisbon bound for Africa with a cargo of brass and tin bracelets, round bells, barber basins and cloth; by early October the ship was back

in Portugal with a very different cargo, 108 enslaved Africans. With chilling detachment the ship's trading log records the commodification of human beings, the prices paid for them, the sums received for their sale and the number who did not survive the crossing. Whilst this log may be extremely rare, it is clear from another surviving document, the receipt book of the customs office of the Portuguese Cape Verde Islands, that such voyages were commonplace in the early years of the sixteenth century. The bulk of this volume consists of a translation into English of the receipt book from the customs office of the Cape Verde Islands. In it Portuguese customs agents recorded import duties on over 3,000 slaves transported from nearby West Africa in 36 ships. The customs officers named the slave traders, ships, officers, crew, and outfitters of the ships, as well as the price of each slave and the import duty collected by the Portuguese government and the Catholic Church. A second section of the customs book provides details of export taxes paid on c.600 African slaves by merchants from Portugal, Spain, and the Spanish Canary Islands, when they exchanged European merchandise for slaves. The final chapter of the volume translates the Santiago's log, providing an example of an actual slave trading expedition. Taken together these documents open a rare window into the workings and scope of the early Atlantic slave trade.

Kissing Architecture explores the mutual attraction between architecture and other forms of contemporary art. In this fresh, insightful, and beautifully illustrated book, renowned architectural critic and scholar Sylvia Lavin develops the concept of "kissing" to

describe the growing intimacy between architecture and new types of art--particularly multimedia installations that take place in and on the surfaces of buildings--and to capture the sensual charge that is being designed and built into architectural surfaces and interior spaces today. Initiating readers into the guilty pleasures of architecture that abandons the narrow focus on function, Lavin looks at recent work by Pipilotti Rist, Doug Aitken, the firm Diller Scofidio + Renfro, and others who choose instead to embrace the viewer in powerful affects and visual and sensory atmospheres. *Kissing Architecture* is the first book in a cutting-edge new series of short, focused arguments written by leading critics, historians, theorists, and practitioners from the world of urban development and contemporary architecture and design. These books are intended to spark vigorous debate. They stake out the positions that will help shape the architecture and urbanism of tomorrow. Addressing one of the most spectacular and significant developments in the current cultural scene, *Kissing Architecture* is an entertainingly irreverent and disarmingly incisive book that offers an entirely new way of seeing--and experiencing--architecture in the age after representation. In this, his fourth big cookbook, the award-winning chef John Besh takes another deep dive into the charm and authenticity of creole cooking inspired by his hometown, New Orleans. *Besh Big Easy: 101 Home-Cooked New Orleans Recipes*, is a fresh and delightful new look at his signature food. *Besh Big Easy* will feature all new recipes and easy dishes, published in a refreshing new flexibound format and accessible to cooks

everywhere. Much has changed since Besh wrote his bestselling *My New Orleans* in 2009. His restaurant empire has grown from two to twelve acclaimed eateries, from the highly praised *Restaurant August* to the just opened farm-to-table taqueria, *Johnny Sanchez*. John's television career has blossomed as well. He's become known to millions as host of two national public television cooking shows based on his books and of *Hungry Investors* on Spike TV. *Besh Big Easy* is dedicated to accessibility in home cooking and Orleans cuisine. "There's no reason a good jambalaya needs two dozen ingredients," John says. In this book, jambalaya has less than ten, but sacrifices nothing in the way of flavor and even offers exciting yet simple substitutions. With 101 original, personal recipes such as *Mr. Sam's Stuffed Crabs*, *Duck Camp Shrimp & Grits*, and *Silver Queen Corn Pudding*, *Besh Big Easy* is chock-full of the vivid personality and Louisiana flavor that has made John Besh such a popular American culinary icon. Happy eating! This addition to Johnston's bestselling petroleum financial books addresses the decision-making element of petroleum company management. It is a practical guide to all facets of modern financial management and strategic planning specific to today's oil and gas companies. The authors guide readers through the maze of financial management in a concise, practical, and organized fashion, delivering the basic principles that are critical for all elements of corporate leadership. Praise for the Third Edition "Future mathematicians, scientists, and engineers should find the book to be an excellent introductory text for coursework or self-study as well as worth its shelf space for

reference.” –MAA Reviews Applied Mathematics, Fourth Edition is a thoroughly updated and revised edition on the applications of modeling and analyzing natural, social, and technological processes. The book covers a wide range of key topics in mathematical methods and modeling and highlights the connections between mathematics and the applied and natural sciences. The Fourth Edition covers both standard and modern topics, including scaling and dimensional analysis; regular and singular perturbation; calculus of variations; Green’s functions and integral equations; nonlinear wave propagation; and stability and bifurcation. The book provides extended coverage of mathematical biology, including biochemical kinetics, epidemiology, viral dynamics, and parasitic disease. In addition, the new edition features: Expanded coverage on orthogonality, boundary value problems, and distributions, all of which are motivated by solvability and eigenvalue problems in elementary linear algebra Additional MATLAB® applications for computer algebra system calculations Over 300 exercises and 100 illustrations that demonstrate important concepts New examples of dimensional analysis and scaling along with new tables of dimensions and units for easy reference Review material, theory, and examples of ordinary differential equations New material on applications to quantum mechanics, chemical kinetics, and modeling diseases and viruses Written at an accessible level for readers in a wide range of scientific fields, Applied Mathematics, Fourth Edition is an ideal text for introducing modern and advanced techniques of applied mathematics to upper-

undergraduate and graduate-level students in mathematics, science, and engineering. The book is also a valuable reference for engineers and scientists in government and industry. Becoming rhetorical is a transformation that allows students to identify rhetorical problems and respond to them with arguments, no matter the course or context from which the problems emerge. In BECOMING RHETORICAL, author Jodie Nicotra takes students beyond the view of the rhetorical situation as being composed of communicator, audience, and message, encouraging them also to consider important aspects such as exigence, purpose, and the means of communication. Students learn to analyze and compose in textual, visual, and multimodalities -- from evaluating an op-ed piece, to making a video of a consumer product, to creating an entire public awareness campaign -- thereby becoming confident critical thinkers in a 21st century multimedia world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. This book is intended to be a textbook for students of water resources engineering and management. It is an introduction to methods used in hydrosystems for upper level undergraduate and graduate students. The material can be presented to students with no background in operations research and with only an undergraduate background in hydrology and hydraulics. A major focus is to bring together the use of economics, operations research, probability and statistics with the use of hydrology, hydraulics, and water resources for the analysis, design, operation, and management of various types of water projects. This book is an

excellent reference for engineers, water resource planners, water resource systems analysts, and water managers. This book is concerned with the mathematical modeling of problems in water project design, analysis, operation, and management. The quantitative methods include: (a) the simulation of various hydrologic and hydraulic processes; (b) the use of operations research, probability and statistics, and economics. Rarely have these methods been integrated in a systematic framework in a single book like Hydrosystems Engineering and Management. An extensive number of example problems are presented for ease in understanding the material. In addition, a large number of end-of-chapter problems are provided for use in homework assignments.

Is your lack of cash holding you back from your real estate dreams? Discover the creative real estate financing techniques that savvy investors are using to do more deals, more often. Latin America is a megadiverse territory hosting several hotspots of plant diversity and many types of forest biomes, ecosystems and climate types, from tropical rainforest to semi-arid woodlands. This combination of diverse forests and climates generates multiple responses to ecological changes affecting the structure and functioning of forest ecosystems. Recently, there have been major efforts to improve our understanding of such impacts on ecosystems

processes. However, there is a dearth of studies focused on Latin-American forest ecosystems that could provide novel insights into the patterns and mechanisms of ecological processes in response to environmental stress. The abundance of "New World" tree species with dendrochronological potential constitutes an ideal opportunity to improve the ecological state of knowledge regarding these diverse forest types, which are often threatened by several impacts such as logging or conversion to agricultural lands. Thus, detailed information on the dendroecology of these species will improve our understanding of forests in the face of global change. Accordingly, this book identifies numerous relevant ecological processes and scales, ranging from tree species to populations and communities, and from both dendrochronological and dendroecological perspectives. It offers a valuable reference guide for the exploration of long-term ecological interactions between trees and their environmental conditions, and will foster further research and international projects on the continent and elsewhere. Wanted: Company Daughters. Virtuous young ladies to become the brides of industrious settlers in a foreign land. The Company will pay the cost of the lady's dowry and travel. Returns not permitted, orphans preferred. Amsterdam, 1620. Jana Beil has learned that life rarely provides moments of joy. Having run away from a violent father, her days are

spent searching for work in an effort to stay out of the city brothels, where desperate women trade their bodies for a mouthful of bread. But when Jana is hired as a servant for the wealthy and kind Master Reynst and his beautiful daughter Sontje, Jana's future begins to look brighter. Then Master Reynst loses his fortune on a bad investment, and everything changes. The house is sold to creditors, leaving Jana back on the street and Sontje without a future. With no other choice, Jana and Sontje are forced to sign with the East India Company as Company Daughters: sailing to a colonial Dutch outpost to become the brides of male settlers they know nothing about. With fear in their hearts, the girls begin their journey - but what awaits them on the other side of the world is nothing like what they've been promised... Based on true history, this is a gripping and unputdownable historical novel, perfect for fans of *Girl with a Pearl Earring*, *The Miniaturist* and *The Indigo Girl*. WINNER OF THE 2021 GOLDEN CROWN LITERARY SOCIETY AWARD FOR DEBUT FICTION. FINALIST FOR THE 2021 BISEXUAL BOOK AWARDS. LONGLISTED FOR THE 2021 HWA DEBUT CROWN AWARD. What readers are saying about *The Company Daughters*: 'Blew my mind... a book I've told so many people about purely because I'm still in disbelief that it exists, that it's so magically written and most of all that it is based on true events... a hard-hitting, soul-crushing book of a woman's struggle to survive... I loved every moment of it. Breathlessly, and in a way that took up my entire brain... immersive, heart-wrenching, and I feel emotional writing this review.' Goodreads reviewer, 5 stars 'From the moment I started reading *The Company Daughters*, I

was captivated by this historical tale. Although it does contain a love story, it's not a romance...This was a gripping read.' Goodreads reviewer 'This book is so stunningly tender and beautiful, all mixed in with some seriously tragic and heart-wrenching events... Rajaram is an extremely skilled writer, and I love her writing style... The themes of sisterhood and female love were so present in this book and I found it very moving.' Goodreads reviewer 'I was enchanted by this book! It's a delightful read that will have your emotions all over the place.'

Goodreads reviewer 'I love historical fiction, and this book touched on a topic and time I knew nearly nothing about...There's love, there's loss, there's surviving, there's thriving... It was a very beautiful book.' Goodreads reviewer 'The Company Daughters is a beautifully written love story... a perfect example of the power of human will and the endurance and hope that love can give a person.' Goodreads reviewer, 5 stars 'This book has a beauty and grace to it. The author's writing just flows off the page, and although there are struggles and upsets by the time you close the book over you are filled with a warm glow.' Goodreads reviewer 'A powerful and insightful read. I look forward to reading more historical work by Samantha Rajaram!' Goodreads reviewer 'Heartbreaking... a moving book... vivid, with amazing characters... This is a great read.'

Goodreads reviewer Although fiction writers must concern themselves with "big picture" issues such as plot, theme, and character development, much of the day-to-day work of writing involves finding answers to seemingly minor questions: How should I describe the exterior of a house? How can I construct the voice

of a historical narrator with authenticity? How should I depict a physically atypical character? Few books on the market address the problems and opportunities present in these and other questions, yet they are the ones that most writers grapple with on a daily basis. *Danger on the Page: A Fiction Writer's Guide to Sex, Violence, Dead Narrators, and Other Challenges* identifies and explores some of the more common and intractable situational challenges of fiction writing, with chapters grouped into the general subject areas such as scenes, characters, points of view, and settings. Shawver delves into the pitfalls and opportunities of writing about sex, violence, sports, and love; he examines writing from the perspective of a different race, gender, or species; he interrogates conventional beliefs about the use of brand names, the description of architecture, and the portrayal of nature. Throughout, he gives dozens of examples from both literary and commercial fiction so readers can borrow (or reject) other writers' techniques and explore the myriad challenges of fiction writing on their own. A lively and witty approach to a diverse range of specific writing issues, Shawver's book will appeal especially to intermediate-level writers seeking to bring their craft to the next level.

Lysheha is considered the "poets' poet" of contemporary Ukraine. A dissident and iconoclast, he was forbidden to publish in the USSR from 1972 to 1988. Since then, his reputation has steadily grown to legendary proportions. Collected here are facing-page English and Ukrainian versions of selected poems and a play, *Friend Li Po, Brother Tu Fu*. The first revision in more than 20 years of the renowned

engineering hydrology text Applied Hydrology, Second Edition retains the successful outline of this classic text while adding new material on physical hydrologic modeling to cover advances in that field of hydrology. New coverage includes the advances in solving hydrology problems through the use of new methodologies such as GIS technology. The book is divided into three parts: Hydrologic Processes; Hydrologic Analysis; and Hydrologic Design, where most of the revisions occur. Applied Hydrology, Second Edition Emphasizes a unique, fundamental approach to hydrology, providing the basis for understanding methodologies and software used in applied hydrology Includes a wealth of new problems, both worked out examples and end-of-chapter problems Contains special topics, such as the hydrology of arid and semi-arid regions and hydrology of climate change Incorporates the very latest methodologies for solving hydrology problems, including radar rainfall (NEXRAD), GIS, and others Offers a comprehensive approach to hydrologic design, covering the hydrology of floodplain analysis and water supply analysis Available in print and in electronic format via OneKey, the SAM provides a range of 5-skills practice that reinforces and builds upon the material presented in the textbook. The workbook section of the SAM features sentence building and completion exercises, fill-ins, realia and art based activities, sequenced writing practice, reading comprehension activities, and additional practice with the cultural theme of the Venez chez nous! lesson. Correlated to recorded material on the Audio CDs to Accompany the SAM, the lab manual offers a progression of form- to content-

based listening practice. The new video manual section provides pre, during, and post-viewing activities that focus students' attention on both the linguistic and cultural content of the Chez nous Video. "Wow... This manual presents a comprehensive and state of the-art approach to the diverse applications of surgical techniques and procedures through the endoscopic platform. Sections address preliminary issues faced by surgeons and physicians who may be initially undertaking these new techniques. These areas include training and credentialing, as well as tools and platforms commonly used for these procedures. Subsequent chapters focus on specific disease processes and the endoscopic applications for those procedures. Each section addresses patient selection, pre-operative considerations, technical conduct of the most common operations, and avoiding complications. A brief review of the existing literature addressing the particular topic follows in each section. The text concludes with chapters on future directions and device development.
