Surrogate motherhood is expanding all over the world. Debates rage over how public policy should consider the signing away of the parental rights of birth mothers in favor of a 'commissioning' couple or an individual. In this book, Daniela Danna describes the situation in English-speaking countries and worldwide, from California to Greece, presenting the legal alternatives regulating (or not) these peculiar exchanges. Should surrogacy remain a private agreement? Should it be treated as an enforceable contract? Are surrogate mothers workers? What happens inside the countries that have chosen different ways of handling this new and controversial matter? And, the most important question of all: How can we live in this era of new techno-medical possibilities and try to stay human? Can we resist commodification in the field of human relations concerning procreation? Contract Children discusses the different ways available to obtain a child through surrogate motherhood. It is fundamental reading for anyone wanting to be involved in the surrogacy process. It gives prospective

surrogate mothers and infertile couples the background information necessary for their own informed decision. It is also an essential instrument for policy makers and activists in the field of women's rights, social justice, and children's rights. The question of how to publicly deal with surrogate motherhood touches upon our social vision of motherhood, ultimately marking the position of women in contemporary society. This major study of Hobbes' political philosophy draws on recent developments in game and decision theory to explore whether the thrust of the argument in Leviathan, that it is in the interests of the people to create a ruler with absolute power, can be shown to be cogent. Professor Hampton has written a book of vital importance to political philosophers, political and social scientists, and intellectual historians. Today, approximately four out of ten kids have experienced cyberbullying. It doesn't seem all that different from the playground bullying of our own youth and nightmares-- but with social media, bullies have nonstop access to our kids. In fact, we're often friends with our bullies online. Breen took a look at social media as a mom and as a teacher and quickly realized that there's a ridiculous amount of kindness terrain to teach and explain to kids-- and some adults-- before letting she let her own children loose online. Here, she covers ten habits to directly teach kids as they're learning how to be kind online. Digital technology has changed the parenting territory dramatically in recent years. Suddenly we've been tasked with preparing kids to be safe, happy and successful, not just in the real world, but in the online world as well. Martine Oglethorpe is part of a new breed of parenting educator who nimbly stays abreast of technology changes while keeping one foot firmly grounded in the timeless ways that make families strong. Martine skilfully combines her professional expertise with the lived experience gained by guiding her own children down the pathway to being skilled, savvy digital citizens. In these pages lies the blueprint for parenting kids in the digital age. It shares how to be engaged in the digital lives of our children without being overbearing or burdensome; to know when to tread lightly as a parent and when care and caution need to be taken. The creator of the Achieving Academic Excellence Through Nutrition program offers

parents a practical handbook on how to promote a child's attention and energy levels, reduce disciplinary problems, and enhance health through a nutritional approach, with tips on developing a healthy kitchen, battling peer pressure and junk food, and more. Original. We live in an "adultitarian" state, where the rules are based on very adult priorities and understandings of reality. Young people are disenfranchised and powerless; they understand they're subject to an authoritarian regime, whether they buy into it or not. But their unique perspectives also offer incredible potential for engagement and innovation. Cultural planner and performance director Darren O'Donnell has been collaborating with children for years through his theatre company, Mammalian Diving Reflex; their most well-known piece, Haircuts by Children (exactly what it sounds like) has been performed internationally. O'Donnell suggests that that working with children in the cultural industries in a manner that maintains a large space for their participation can be understood as a pilot for a vision of a very different role for young people in the world – one that the UN Committee on the Rights of the Child considers a "new social contract." Seen and Heard is a practical proposal for the inclusion of children in as many realms as possible, not only as an expression of their rights, but as a way to intervene in the world and to disrupt the stark economic inequalities perpetuated by the status quo. Deeply practical and wildly whimsical, Seen and Heard might actually make total sense. Darren O'Donnell is an urban cultural planner, novelist, essayist, playwright, director, designer, performer, and the artistic director of the Mammalian Diving Reflex theater company. O'Donnell currently resides in Toronto, Ontario. Signed, sealed, and guaranteed to help teach children basic social skills and good manners at home, in school, and in public, this contract, written by international etiquette consultant Alyson Murphy, and beautifully illustrated by award-winning artist Tate Nation, will teach kids how to be proud to write, speak, and improve polite habits, such as brushing their teeth, using good table manners, and showing others respect. The Manners Contract, most importantly, reminds us all that good manners are not only what we do and say, but they're ways we can show kindness every single day. A

funny and educational tool to help parents instill good manners in children from an early age, The Manners Contract does just that-it provides an outline to help implement better habits that can be used from now into adulthood. The Healthy Knees Book details the structure and function of the knee and explains its common injuries and chronic pains. With her holistic approach to healing, Dr. Pujari examines how the whole mind and body can promote balance and healing in your hard-working knees, while co-author Alton culls information from medical specialists, physical therapists, yoga and fitness instructors, nutritionists, and herbalists. **\*\*Click on the author name "The Writerie" to see more planners, journals, trackers, and other goodies!\*\*** This planner was designed for the busy person who needs to track tasks and appointments by categories such as children, projects, jobs, contracts, priorities, classes, social media channel posts, shifts, etc. Each column can be labeled with the appropriate category for the relevant day. Blends memoir and legal cases to show how contracts can create family relationships Most people think of love and contracts as strange bedfellows, or even opposites. In Love's Promises, however, law professor Martha Ertman shows that far from cold and calculating, contracts shape and sustain families. Blending memoir and law, Ertman delves into the legal cases, anecdotes, and history of family law to show that love comes in different packages, each shaped by different contracts and mini-contracts she calls "deals." Family law should and often does recognize that variety because legal rules, like relationships, aren't one size fits all. The most common form of family—which Ertman calls "Plan A"—come into being through different kinds of agreements than the more uncommon families that she dubs "Plan B." Recognizing the contractual core of all families shows that Plan B is neither unnatural nor unworthy of legal recognition, just different. After telling her own moving and often irreverent story about becoming part of a Plan B family of two moms and a dad raising a child, Ertman shows that all kinds of people—straight and gay, married and single, related by adoption or by genetics—use contracts to shape their relationships. As couples navigate marriage, reproductive technologies, adoption, and cohabitation, they encounter contracts. Sometimes hidden and other times openly acknowledged, these contracts ensure that the people they think of as "family" are legally recognized as family in the eyes of the law. Family

exchanges can be substantial, like vows of fidelity, or small, like "I cook and you clean." But regardless of scope, the agreements shape the emotional, social, and financial terrain of family relationships. Seeing the instrumental role contracts will help readers better understand how contracts and deals work in their own families as well as those around them. Both insightful and paradigm-shifting, Love's Promises lets readers in on the power of contracts and deals to support love in its many forms and to honor the different ways that our nearest and dearest contribute to our daily lives. Screenwise offers a realistic and optimistic perspective on how to thoughtfully guide kids in the digital age. Many parents feel that their kids are addicted, detached, or distracted because of their digital devices. Media expert Deborah Heitner, however, believes that technology offers huge potential to our children-if parents help them. Using the foundation of their own values and experiences, parents and educators can learn about the digital world to help set kids up for a lifetime of success in a world fueled by technology. Screenwise is a guide to understanding more about what it is like for children to grow up with technology, and to recognizing the special challenges-and advantages-that contemporary kids and teens experience thanks to this level of connection. In it, Heitner presents practical parenting "hacks": quick ideas that you can implement today that will help you understand and relate to your digital native. The book will empower parents to recognize that the wisdom that they have gained throughout their lives is a relevant and urgently needed supplement to their kid's digital savvy, and help them develop skills for managing the new challenges of parenting. Based on real-life stories from other parents and Heitner's wealth of knowledge on the subject, Screenwise teaches parents what they need to know in order to raise responsible

digital citizens.
