Noise/music Oct 14 2019 "Noise/Music" looks at the phenomenon of noise in music, from experimental music at the early 20th century to the Japanese noise, music and glitch electronica of today. ... While it provides an excellent historical overview, the book's main concern is in the noise/music that has emerged since the mid 1970s, whether through industrial music, punk, free jazz or the purer noise of Merzbow. The book progresses seamlessly from discussions of John Cage, Erik Satie and Pauline Oliveros through to bands like Trobbling Gristle and the Boredoms. The author also examines the concept of noise from a philosophical perspective. Underpinned throughout by the ideas of Adorno, Deleuze and others, the author's writing is sharp and erudite. -- Summarized from back cover.

Misch's Avoiding Complications in Oral Implantology - E-Book Nov 07 2021 See how to effectively manage ALL dental implant complications throughout ALL phases of treatment! Avoiding Complications in Oral Implantology provides evidence-based management protocols for a wide range of implant problems such as placement complications, malpositioning, bleeding, infection, and nerve injuries. Hundreds of high-quality, full-color photos and illustrations clearly demonstrate the complications and their resolution. Edited by Carl Misch and Randolph Resnik — both well-known names in dental implantology and prosthodontics — and with a team of expert contributors, this authoritative guide helps you handle the implant-related complications that can occur as more and more patients choose dental implants. Expert authors are joined by a panel of recognized leaders in implant dentistry — many of whom are associated with the Misch International Implant Institute — to share their extensive experience with handling complications through all phases of treatment. Comprehensive approach to complications that occur in the different phases of oral implantology provides the knowledge and skills you need to handle treatment planning, implant placement, post-operative complications, prostheses-related complications, and more. Over 1,000 images include full-color clinical photographs, radiographs, line drawings, and diagrams, clearly demonstrating complications, procedures, and outcomes. Management protocols developed by world-renowned dental implantologists provide a proven system and authoritative guidance in managing complications with dental implants. Evidence-based solutions make it easier to manage a wide variety of clinical problems associated with dental implants, with state-of-the-art guidance supported by the best available research.

Treatment Planning in Dentistry - E-Book Mar 11 2022 This book provides essential knowledge for creating treatment plans for adult dental patients. Treatment planning strategies are presented to help with balancing the ideal with the practical, with emphasis placed on the central role of the patient — whose needs should drive the treatment planning process. The focus is on planning of treatment, not on the comprehensive details of every treatment modality in dentistry. CD-ROM bound into book presents five cases of varying difficulty with interactive exercises that allow users to plan treatment. What's the Evidence? boxes link clinical decision-making and treatment planning strategies to current research. In Clinical Practice boxes highlight specific clinical situations faced by the general dentist. Review Questions and Suggested Projects, located at the end of each chapter, summarize and reinforce important concepts presented in the book. Key Terms and Glossary highlights the terms that are most important to the reader. Suggested Readings lists included at the end of most chapters provide supplemental resources. Chapter on Treatment Planning for Smokers and Patients with Oral Cancer addresses the dentist's role in managing patients with oral cancer, recognizing oral cancer and differential diagnosis of oral lesions, planning treatment for patients undergoing cancer therapy, and smoking cessation strategies. Chapter on Treatment Planning for the Special Care/Special Needs Patient examines the role of the general dentist in the management of patients with a variety of conditions including physical handicaps, mental handicaps, head trauma, hemophilia, and patients' needs before, during, or after major surgery. Chapter on Treatment Planning for the Alcohol and Substance Abuser discusses the challenges of treating this patient population, as well as how to recognize the problem, delivery of care, scope of treatment, and behavioral/compliance issues. Expanded content on Ethical and Legal Issues in Treatment Planning reflects new accreditation guidelines. Dental Team Focus boxes highlight the relevance of chapter content to the dental team. Ethics Topics boxes emphasize the ethical topics found within each chapter. International Tooth Numbering is listed alongside the U.S. tooth numbers in examples and illustrations.

The Dental Diet Sep 05 2021 A unique exploration of how dental health connects to holistic health, with a 40-day meal plan and long-lasting dietary guidelines that are easily integrable into everyday life Throughout the years, dental health has often been characterized as a reflection of our overall health, where bad oral health results from issues with other parts of our body. But what if we flipped the paradigm? What if we thought about dental health as the foundation for our physical health as a whole? Dr. Steven Lin, an experienced dentist and the world's first dental nutritionist, has analyzed our ancestral traditions, epigenetics, gut health, and the microbiome in order to develop food-based principles for a literal top-down holistic health approach. Merging dental and nutritional science, Dr. Lin lays out the dietary program that can help ensure you won't need dental fillings or cholesterol medications —and give you the resources to raise kids who develop naturally straight teeth. With our mouth as the gatekeeper of our gut, keeping our oral microbiome balanced will create a healthy body through a healthy mouth. Dr. Lin arms you with a 40-day meal plan, complete with the Dental Diet food pyramid, exercises for the mouth, recipes, and cooking techniques to help you easily and successfully implement his techniques into your everyday life. The tools to improve overall wellness levels and reverse disease are closer than we think—in our markets, in our pantries, and, most frequently, in our mouths.

Prevention in Clinical Oral Health Care Feb 10 2022 This book focuses on oral health promotion and the impact of systemic disease in the development of oral disease, as well as how to introduce, apply, and communicate prevention to a patient with a defined risk profile. Prevention in Clinical Oral Health Care integrates preventive approaches into clinical practice, and is a valuable tool for all health care professionals to integrate oral health prevention as a component of their overall preventive message to the patient. Discusses risk-based approaches to prevent problems such as caries, periodontal disease, and oral cancer. Topics are written at a level that can be understood by both practicing dental health team members and by dental hygiene and dental students so strategies can be applied to better understand the patient's risk for oral disease and how to prevent future disease. Identifies the barriers, oral health care needs, and preventive strategies for special populations such as children, the elderly, and the physically or mentally disabled. Explores the

development of a culturally sensitive dental practice and strategies to make the dental environment more welcoming to individuals with different cultural backgrounds. Discusses how to gather patient information, the synthesis of the patient's data, and the application of the information collected in order to evaluate the patient's risk for disease.

Veterinary Periodontology Nov 14 2019 *Veterinary Periodontology* is a comprehensive yet user-friendly reference on periodontal disease in dogs and cats, encompassing etiology, pathogenesis, and clinical features. Techniques in Protein Chemistry IV Dec 28 2020 *Techniques in Protein Chemistry IV* compiles papers presented at the Sixth Protein Society Symposium held in San Diego, California in 1992. This book discusses the mass spectrometry in protein sequence and structural investigations; site specific heterogeneity of N-linked oligosaccharides on recombinant human erythropoietin; and modification of thiophosphorylated proteins with extrinsic probes. The cysteine and tryptophan amino acid analysis of ABRF92-AAA; development of separation strategies for proteins by capillary electrophoresis; and peptide mapping of 2-D gel proteins by capillary HPLC are also elaborated. This text likewise covers the single syringe-pump solid-phase protein sequencer; hydrophobic contact density distribution functions; and application of chemical shift calculation to protein structure determination by NMR. This publication is valuable to biologists and students concerned with the developments in mass spectrometry of proteins.

Sounding Islam Aug 24 2020 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. *Sounding Islam* provides a provocative account of the sonic dimensions of religion, combining perspectives from the anthropology of media and sound studies, as well as drawing on neo-phenomenological approaches to atmospheres. Using long-term ethnographic research on devotional Islam in Mauritius, Patrick Eisenlohr explores how the voice, as a site of divine manifestation, becomes refracted in media practices that have become integral parts of religious traditions. At the core of Eisenlohr's concern is the interplay of voice, media, affect, and listeners' religious experiences. *Sounding Islam* sheds new light on a key dimension of religion, the sonic incitement of sensations that are often difficult to translate into language.

Equity In Mathematics Education Mar 31 2021 This text provides a critical overview of current thinking about equity issues in the teaching and learning of mathematics. Grounded in feminist theories of curriculum change and a broad range of cultural perspectives, the new approaches described here go beyond "special programmes" and "experimental treatments" designed to correct perceived problems and deficits. Instead they establish how improved instructional practices and a fuller understanding of the nature of the mathematical enterprise can overcome the systemic obstacles that have thwarted women's participation in this important field.; This book will appeal to all those who are interested in the mathematical education of women, including teachers, parents, administrators and researchers.

Building Billion Dollar Brands Oct 06 2021 Better Branding, Better Benefits Marketing techniques, retailers, and distribution channels have changed dramatically since authors RICK CESARI and BARB WESTFIELD started in the business of brand building and direct response advertising twenty-five-plus years ago, and they will continue to change, but over their combined years of experience, Rick and Barb have found that five key strategies have remained constant: 1 Utilizing your "unique selling proposition," or USP; 2 Creating a name and market position for your product or business; 3 Under-promising and over-delivering; 4 Listening to your customers to develop world-class customer service and powerful testimonials that will sell for you 24/7, and 5 Direct branding selling--the best way to brand for most small businesses and startups. In this book, Rick and Barb will expand on these simple brand-building keys and show you how they built brands like GoPro, the George Foreman Grill, Sonicare, and others using these keys, and how you, too, can put them to use immediately in your business or new product launch.

Luna Farming Legacy Jul 23 2020 Descendants of Spanish Colonial settlers have been practicing subsistence farming along the Rio Grande for over 250 years. As that same river became the international boundary between the US and Mexico in 1848, landownership and the landscape began to change. As issues in Mexico such as the Mexican Revolution pushed families over the river into the Rio Grande Valley of Texas, many folks established themselves as farmers along side the new arrivals from the American Midwest in the early 1900s. The guarantee of successful year-round farming was a prominent theme and the Lunas were willing and able to embark on that challenge. As their life in the US began with some time in Los Ebanos, the family eventually found themselves purchasing land and farming in Edinburg. Today Luna family members are still farming in a section of northwest Edinburg fondly referred to as "Lunaville" by fellow farmers.

Planning the Oregon Way Jun 02 2021 Oregon's pioneering land use system is nationally recognized and serves as a valuable model and benchmark for other states. This volume examines the Oregon system, describes its strengths and weaknesses, and gives recommendations for the future.

Sonic Interaction Design Apr 12 2022 An overview of emerging topics, theories, methods, and practices in sonic interactive design, with a focus on the multisensory aspects of sonic experience. Sound is an integral part of every user experience but a neglected medium in design disciplines. Design of an artifact's sonic qualities is often limited to the shaping of functional, representational, and signaling roles of sound. The interdisciplinary field of sonic interaction design (SID) challenges these prevalent approaches by considering sound as an active medium that can enable novel sensory and social experiences through interactive technologies. This book offers an overview of the emerging SID research, discussing theories, methods, and practices, with a focus on the multisensory aspects of sonic experience. Sonic Interaction Design gathers contributions from scholars, artists, and designers working at the intersections of fields ranging from electronic music to cognitive science. They offer both theoretical considerations of key themes and case studies of products and systems created for such contexts as mobile music, sensorimotor learning, rehabilitation, and gaming. The goal is not only to extend the existing research and pedagogical approaches to SID but also to foster domains of practice for sound designers, architects, interaction designers, media artists, product designers, and urban planners. Taken together, the chapters provide a foundation for a still-emerging field, affording a new generation of designers a fresh perspective on interactive sound as a situated and multisensory experience. Radar Instruction Manual Aug 04 2021 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

A Cultural History of Objects in the Modern Age Dec 08 2021 A Cultural History of Objects in the Modern Age covers the period 1900 to today, a time marked by massive global changes in production, transportation, and information-sharing in a post-colonial world. New materials and inventions - from plastics to the digital to biotechnology - have created unprecedented scales of disruption, shifting and blurring the categories and meanings of the object. If the 20th century demonstrated that humans can be treated like things whilst things can become ever more human, where will the 21st century take us? The 6 volume set of the Cultural History of Objects examines how objects have been created, used, interpreted and set loose in the world over the last 2500 years. Over this time, the West has developed particular attitudes to the material world, at the centre of which is the idea of the object. The themes covered in each volume are objecthood; technology; economic objects; everyday objects; art; architecture; bodily objects; object worlds. Laurie A. Wilkie is Professor at the University of California-Berkeley, USA. John M. Chenoweth, is Associate Professor at the University of Michigan-Dearborn, USA. The Learning Industry Aug 16 2022 This study focuses on the connection between education and the world of work and the urgency of the endeavor to educate the work force. Part I considers the resources for adult learning in the United States, with a focus on the major providers outside the traditional education system. Technological resources that can extend educational opportunities and reach more workers are then analyzed. Examples of each medium's use are given, and its limitations and effectiveness for instruction are charted. One new development is given special attention: artificial intelligence as an aid in training and education. Part II describes workers' training opportunities. It looks first at the skilled trades and technical fields: construction workers, office workers, administrative assistants, information systems technicians, and factory workers encountering computer-integrated manufacturing systems. Next, the education of managers is considered. Finally, updating knowledge of advanced professionals is examined. Examples from various providers show

contributions toward available opportunities. Part III deals with those whom training programs fail to reach or serve adequately: dislocated workers, unemployed youth, immigrants and refugees, and welfare recipients. The report concludes that the issues call for public responsibility and action. Federal, state, and private initiatives are urged. Endnotes for each chapter and an index are appended. (YLB)
