Frontiers in Water-Energy-Nexus—Nature-Based Solutions, Advanced Technologies and Best Practices for Environmental Sustainability Mar 23 2020 This volume includes selected contributions presented during the 2nd edition of the international conference on WaterEnergyNEXUS which was held in Salerno, Italy in November 2018. This conference was organized by the Sanitary Environmental Engineering Division (SEED) of the University of Salerno (Italy) in cooperation with Advanced Institute of Water Industry at Kyungpook National University (Korea) and with The Energy and Resources Institute, TERI (India). The initiative received the patronage of UNESCO – World Water Association Programme (WWAP) and of the International Water Association (IWA) and was organized with the support of Springer (MENA Publishing Program), Arab Water Council (AWC), Korean Society of Environmental Engineering (KSEE) and Italian Society of Sanitary Environmental Engineering Professors (GITISA). With the support of international experts invited as plenary and keynote speakers, the conference aimed to give a platform for Euro-Mediterranean countries to share and discuss key topics on such water-energy issues through the presentation of nature-

based solutions, advanced technologies and best practices for a more sustainable environment. This volume gives a general and brief overview on current research focusing on emerging Water-Energy-Nexus issues and challenges and its potential applications to a variety of environmental problems that are impacting the Euro-Mediterranean zone and surrounding regions. A selection of novel and alternative solutions applied worldwide are included. The volume contains over about one hundred carefully refereed contributions from 44 countries worldwide selected for the conference. Topics covered include (1) Nexus framework and governance, (2) Environmental solutions for the sustainable development of the water sector, (3) future clean energy technologies and systems under water constraints, (4) environmental engineering and management, (5) Implementation and best practices Intended for researchers in environmental engineering, environmental science, chemistry, and civil engineering. This volume is also an invaluable guide for industry professionals working in both water and energy sectors.

Multistate Tax Guide to Financial Institutions Oct 18 2019 The Multistate Tax Guide to Financial Institutions (the “Guide”) was developed to provide a quick reference to assist tax professionals in finding answers to various financial institution-specific income and franchise tax questions for all 50 states and the District of Columbia. The Guide is meant to be just that, a guide. It is not meant as a substitute for original research; it is not meant to be authoritative; nor is it intended to provide “tax advice”; and it cannot be relied on as a basis to avoid the imposition of penalties.

The Nexus Between Financial Education and Entrepreneurship Development in Osun State Feb 20 2020 The study was conducted to examine the nexus between financial education and entrepreneurship development with the aim of evaluating how knowledgeable entrepreneurs are about managing their business finances in an efficient manner. Primary data was generated from the use of questionnaire. The survey covered educated entrepreneurs in Osun state with a minimum of O'levels. A total sample size of 385 respondents was randomly selected from an infinite population. The study employed a binary logit regression model for the analysis with the help of STATA (14) because the dependent variable is coordinated in a binary form and the model of the study is ordered in the context of multivariate latent structural model. The result with

Prob > chi2 = 0.0000 showed that financial education influences the growth and development of businesses in Osun state. Hence, we conclude that the encouragement of financial education for Nigerian entrepreneurs in order to encourage financial literacy, financial inclusion and financial behaviour of entrepreneurs for effective and efficient management of businesses will have direct effect on entrepreneurship growth and development in the economy. The study identified areas of inadequacies and proposed recommendations to improve the financial literacy level; encourage prudence in financial behavior; and ensure the availability of financial services for entrepreneurship purposes.

Prevention of corruption at workplace. A nexus of good governance and effective procurement Dec 24 2022 Academic Paper from the year 2020 in the subject Sociology - Work, Profession, Education, Organisation, , language: English, abstract: The desideratum of this discourse was to unpack the nexus of good governance, effective procurement and prevention of corruption at workplace. Money can corrupt the virtuous. Efficient public procurement is key to enhancing state portfolio in infrastructure, health, education and other public services, making it central to state efforts to enhance living standard. Efficient public procurement has a nexus with good governance. The questionnaire method was considered appropriate to collect and analyse data from the respondents. Different questionnaire and interviews were administered to every respondent. Collusion and corruption are distinct challenges within public procurement, yet they may regularly occur in tandem and have mutually added fuel to the fire impact. A good example of collusion

and corruption is the alleged chain effect of the Fish rot scandal in Namibia. They are optimally perceived, therefore, as concomitant threats to the integrity of public procurement. Efficient public procurement is key to enhancing state portfolio in infrastructure, health, education and other public services, making it central to state efforts to enhance living-standards. Efficient public procurement has a nexus with good governance. However, state procurement in developing states is often plagued by high rates of corruption and waste. The public procurement process is governed by public procurement laws and regulations in all states and differs from one state to another. In South Africa, public procurement is enshrined in Section 217 and 33 of the constitution of the country. COMESA has developed a model strategy for public procurement reform to standardise procurement and tendering process which are done within the stock market.

An Assessment of the Nexus Between Sides of the Services Triangle and Service Quality Delivery Among Financial Service Providers in Ghana Oct 10 2021

Internal, external, and interactive marketing, which collectively make up the services triangle model, are considered very effective practices for attaining and improving service quality and consequently customer loyalty. In this study, the effect of these sides of the service triangle model on service quality is tested. A quantitative research approach is applied. The study's population is employees and customers of financial service providers in Accra. A self-reported questionnaire was used to select 1,595 and 2,992 employees and customers respectively. Descriptive statistics (mean and standard deviation), Pearson's correlation, and confirmatory factor analysis were used to present

findings. Internal, external and interactive marketing each makes a significant positive effect on service quality. Internal marketing makes a positive effect on external and interactive marketing, whereas external marketing makes a positive effect on interactive marketing. This study therefore concludes that increasing the level of internal, external, and interactive marketing can improve service quality.

Senior Students' Perceptions of the Factors Positively Influencing Their Faith Development Within the Environment of a School-church Nexus Feb 02 2021 Schools with campus churches can provide an environment where personal faith development and affiliation with a faith community are

encouraged. This study investigated senior students' perceptions of the factors positively influencing their faith development within the environment of a school-church nexus. A review of the literature revealed a strong connection between adolescent faith development and social context. This case study gathered data from two Adventist schools with campus churches with a focus on senior students' and staff perceptions. An emergent mixed-method approach was adopted to gather data through the use of a questionnaire, focus group interviews and unstructured staff interviews. The data revealed that student faith development was impacted primarily by elements of the schools' special character as well as social connection and involvement within the school-church nexus environment. Furthermore, the results indicated that attendance at campus church events is also impacted by social connection, involvement and perceived relevance of campus church events to students' lives. The study concluded that faith development is more likely to occur for senior students when the six following key considerations are factored into the planning and implementation of faith-based activities and programs: perceptions about spirituality, social context, positive relationship with school/church personnel, influence of the school's special character, emphasis on discipling through involvement, and relevant content.

A Comprehensive Conventional Weapons Convention Jan 01 2021

Military expenditure continues to rise and conventional weapons continue to reach areas of conflict, violators of human rights, and terrorist groups, increasing the number of internal and external conflicts, escalating the level of internal oppression and contributing to the deterioration of living conditions. Every day, thousands of lives are lost, and many more people are injured, orphaned or displaced because of armed violence by conventional weapons, yet no comprehensive treaty on conventional weapons has yet been reached. There has been no lack of effort and initiatives, but rather a lack of goodwill, proper guidelines, and instruments that would control the arms trade. Therefore, the central arguments the present thesis seeks to examine are the consequences of this lack of an international conventional arms trade treaty on international

security, especially in the conflict-torn Middle East. In order to support the claims made in this study the statistics of global arms sales in different time periods are presented and the relationships between armament, conflict, and development examined. Initiatives to regulate arms sales are also reviewed. In order to elicit information on the role of conventional arms deals on the stability, security, and development of Middle-Eastern countries a questionnaire was distributed to a cross-section of people from those countries, and interviews were conducted with a number of diplomats and politicians. The findings reveal that increasing armament does not decrease the internal or external threat against the country, instead it jeopardizes its economic growth and prevents progress. The findings also indicate that lack of democracy plays an important role in increasing armament, so arms can be used against opponents of the regime, and not to defend the homeland. The thesis recommends that governments and international agencies such as the UN should work seriously towards an international conventional arms treaty similar to those on weapons of mass destruction.

The Nexus of Tax Education and Compliance Among Small Business Enterprises Aug 08 2021 Academic Paper from the year 2019 in the subject Business economics - Accounting and Taxes, , course: Tax compliance, language: English, abstract: The study set out to investigate the influence of tax education on tax compliance. It unearthed a lacuna between tax education and tax compliance which indicated an interplay between the theories of economic deterrent, reasoned action and the theory of planned behavior. Tax non-compliance was attributed to unfairness, dishonesty by colleagues submitting incorrect tax returns, and the complexity of the tax system and tax forms. The issue of tax compliance from SMEs in developing countries has remained a blighting problem for a long time. Despite tax education being diagnosed as the panacea for improving tax compliance from small business owners, the situation has not changed. A divide regarding the issue of tax education as influencing the collection of tax from SMEs still exists among researchers. Some scholars indicate a positive effect of tax education on compliance and others view tax education as a recipe for propagating tax evasion. However, for

developmental projects to improve the lives of the citizenry, educating taxpayers aims to improve revenue collection from this category of business people. This study employed an exploratory concurrent mixed research approach on 98 SMEs operating within the Ojtiwarongo district.

Implementing the Water-Energy-Food- Ecosystems Nexus and Achieving the Sustainable Development Goals Jun 06 2021 The book's primary intention is to serve as a roadmap for professionals working in developing countries interested in the Nexus Water-Energy-Food-Ecosystems (WEFE) approach. The book shows a multi-disciplinary approach, showcasing the importance of the proper use of Nexus WEFE when implementing certain development programs in regions around the globe. It can be presented as a manual for an individual that either wishes to implement intervention projects following the NEXUS approach or students interested in cooperation and development. The book begins with a general explanation of the theoretical concepts and implementation processes of Nexus WEFE and continues getting into case studies, explaining the importance of proper implementation and potential drawbacks and solutions to them. This book has a particular focus on the European Union cooperation policies when implementing such an approach in developing countries.
