Threatening Communications and Behavior Jul 08 2021 Today's world of rapid social, technological, and behavioral change provides new opportunities for communications with few limitations of time and space. Through these communications, people leave behind an ever-growing collection of traces of their daily activities, including digital footprints provided by text, voice, and other modes of communication. Meanwhile, new techniques for aggregating and evaluating diverse and multimodal information sources are available to security services that must reliably identify communications indicating a high likelihood of future violence. In the context of this changed and changing world of communications and behavior, the Board on Behavioral, Cognitive, and Sensory Sciences of the National Research Council presents this volume of three papers as one portion of the vast subject of threatening communications and behavior. The papers review the behavioral and social sciences research on the likelihood that someone who engages in abnormal and/or threatening communications will actually then try to do harm. The focus is on how the scientific knowledge can inform and advance future research on threat assessments, in part by considering the approaches and techniques used to analyze communications and behavior in the dynamic context of today's world. The papers in the collection were written within the context of protecting high-profile public figures from potential attack or harm. The research, however, is broadly applicable to U.S. national security including potential applications for analysis of communications from leaders of hostile nations and public threats from terrorist groups. This work highlights the complex psychology of threatening communications and behavior, and it offers knowledge and perspectives from multiple domains that contribute to a deeper understanding of the value of communications in predicting and preventing violent behaviors.

The MD Anderson Manual of Medical Oncology Dec 01 2020 The MD Anderson Manual of Medical Oncology was designed to fill an important void in oncology reference material by serving as a hands-on resource for the practicing oncologist. It was written exclusively by MD Anderson faculty and fellows with the idea of presenting a bird's eye view of medical oncology as it is currently practiced at that institution. While definitely written from the perspective of the medical oncologist, this book clearly emphasizes MD

Anderson's multidisciplinary approach to cancer care. Furthermore, while evidence-based rationales are given for patient care strategies, no apologies are offered for articulating the unique perspectives and biases as they apply to cancer biology and therapy as practiced at this top-rated cancer center. The rationales for ongoing clinical trials are clearly articulated as well as the importance of ongoing clinical investigation. The authors have filled the book with tables, graphics, relevant pathology figures, and other illustrative images, making it visually stimulating. Flowchart and diagrammatic algorithms are supplied to provide readers with a practical guide to the diagnostic and therapeutic strategies used at MD Anderson. Numerous chapters address important palliative and supportive measures, such as oncologic emergencies, infections, endocrine manifestations of non-endocrine tumors, palliation, and long-term followup.

Naturopathic Physical Medicine Jul 20 2022 NATUROPATHIC PHYSICAL MEDICINE provides a philosophical naturopathic perspective, as well as practical clinical applications, for manual and physical approaches to health care. A wide range of bodywork and movement approaches and modalities are evaluated in relation to their ability to be appropriately used in naturopathic treatment and rehabilitation settings. The model of care emphasised in this text recognizes that naturopathically oriented therapeutic interventions usually focus on achieving one or all of the following:

enhancement of function so that the person, system or part, can better self-regulate in response to adaptive demands; modification or removal of adaptive load factors; and symptomatic relief without creation of significant additional adaptive changes.
