Guidebook for whitewater boating on the Selway River in Idaho. In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world. The rich tapestry of Alaska is threaded together by 365,000 miles of waterways, from cascading mountain streams to meandering valley rivers, from the meltwaters of glaciers to broad rivers that empty into the

sea. This guide profiles a wide variety of rivers from all over Alaska, concentrating on trips for intermediate boaters, and including a few major expeditions for the experienced river-runner. A section on gear outlines what to take into the backcountry. A haunting, beautiful first novel by the bestselling author of *A Long Way Gone* When Ishmael Beah's *A Long Way Gone* was published in 2007, it soared to the top of bestseller lists, becoming an instant classic: a harrowing account of Sierra Leone's civil war and the fate of child soldiers that "everyone in the world should read" (*The Washington Post*). Now Beah, whom Dave Eggers has called "arguably the most read African writer in contemporary literature," has returned with his first novel, an affecting, tender parable about postwar life in Sierra Leone. At the center of *Radiance of Tomorrow* are Benjamin and Bockarie, two longtime friends who return to their hometown, Imperi, after the civil war. The village is in ruins, the ground covered in bones. As more villagers begin to come back, Benjamin and Bockarie try to forge a new community by taking up their former posts as teachers, but they're beset by obstacles: a scarcity of food; a rash of murders, thievery, rape, and retaliation; and the depredations of a foreign mining company intent on sullyng the town's water supply and blocking its paths with electric wires. As Benjamin and Bockarie search for a way to restore order, they're forced to reckon with the uncertainty of their past and future alike. With the gentle lyricism of a dream and the moral clarity of a fable, *Radiance of Tomorrow* is a powerful novel about preserving what means

the most to us, even in uncertain times. Named one of the Christian Science Monitor's best fiction books of 2014

Detailed Maps, High and Low Water Rapid Descriptions, Hiking, Geology, Photography, Kayaking, Camps and History in a Mile-by-Mile Format This is a collection of stories by, and usually about, river guides and outfitters. The tales focus on river related events that

usually have little to do with whitewater. Many don't even take place on a river. All say a lot about the culture of guiding and the people attracted to wild places and the odd things that happen once they get there. These are the stories shared around a campfire after a day on the water. Some are funny, some sad, some quirky, but they all come from personal river experiences and lifelong friendships. Join some guides on their day off when they decide to take a raft over a dam to see if they can make it right-side up. Dive into a vast garbage dump to find the \$500 drysuits you threw out with the trash from a 21 day Grand Canyon trip. Try to explain how your employees set a Forest Service employee on fire during a torch-lit dance on a picnic table. Share an evening with an outfitter who is about to lose his business because one of his guests has disappeared on a hike and has been missing all night. Get ready to set your underwear on fire if precipitation stays below average because that's how you end a drought. Take the Vice President of the United States down a river but never get him or anyone else wet. Be part of the wedding of two guides who really only wanted to sleep together but found themselves ?together forever.? Steal a bus and lead a wild chase down a mountain canyon highway looking for a group coming off the river. Drive home from the airport naked and try to sneak into the house without your wife noticing your lack of attire. Not every story is about good times. A few are tributes to friends who are no longer with us but belong around our campfire. You probably never heard their names but you will enjoy meeting them here.

They told great stories. There is an odd thing that brings folks back for river trips. They usually come the first time because of the excitement of rapids and whitewater. They come back for another trip because of all the other stuff that happens. This book attempts to capture some of that magic, the memories and good times running a river with friends fosters. The Nirvana bassist “ offers specific platforms for electoral reform . . . as well as charming anecdotes about rock ‘ n ’ roll as a pursuit of happiness ” (Sarah Vowell, The New York Times Book Review). A version of the OpenStax text What conceptual blind spot kept the ancient Greeks (unlike the Indians and Maya) from developing a concept of zero? Why did St. Augustine equate nothingness with the Devil? What tortuous means did 17th-century scientists employ in their attempts to create a vacuum? And why do contemporary quantum physicists believe that the void is actually seething with subatomic activity? You 'll find the answers in this dizzyingly erudite and elegantly explained book by the English cosmologist John D. Barrow. Ranging through mathematics, theology, philosophy, literature, particle physics, and cosmology, The Book of Nothing explores the enduring hold that vacuity has exercised on the human imagination. Combining high-wire speculation with a wealth of reference that takes in Freddy Mercury and Shakespeare alongside Isaac Newton, Albert Einstein, and Stephen Hawking, the result is a fascinating excursion to the
