These Three Remain Nov 11 2021 This thrilling conclusion to the Fitzwilliam Darcy, Gentleman trilogy recounts the climactic events of Jane Austen's *Pride and Prejudice* from its enigmatic hero's point of view. One of the most beloved romantic heroes in all of literature, Fitzwilliam Darcy remains an enigma even to Jane Austen's most devoted fans. But with this concluding volume in the Fitzwilliam Darcy, Gentleman trilogy, novelist and Austen aficionada Pamela Aidan at last gives readers the man in full. *These Three Remain* follows a humbled Darcy on the journey of self-discovery after Elizabeth Bennet's rejection of his marriage proposal, in which he endeavors to grow into the kind of gentleman he's always dreamed of being. Happily, a chance meeting with Elizabeth during a tour of his estate in Derbyshire offers Darcy a new opportunity to press his suit, but his newfound strengths are put to the test by an old nemesis, George Wickham. Vividly capturing the colorful historical and political milieu of the Regency era, Aidan writes in a style evocative of her literary progenitor, but with a wit and humor very much her own. While staying faithful to the people and events in Austen's original, she adds her own fascinating cast of characters, weaving a rich tapestry out of Darcy's past and present that will beguile his admirers anew.

IRON MAKING AND STEELMAKING Dec 24 2022 This authoritative account covers the entire spectrum from iron ore to finished steel. It begins by tracing the history of iron and steel production, right from the earlier days to today's world of oxygen steelmaking, electric steelmaking, secondary

steelmaking and continuous casting. The physicochemical fundamental concepts of chemical equilibrium, activity-composition relationships, and structure-properties of molten metals are introduced before going into details of transport phenomena, i.e. kinetics, mixing and mass transfer in ironmaking and steelmaking processes. Particular emphasis is laid on the understanding of the fundamental principles of the processes and their application to the optimisation of actual processes. Modern developments in blast furnaces, including modelling and process control are discussed along with an introduction to the alternative methods of ironmaking. In the area of steelmaking, BOF plant practice including pre-treatment of hot metal, metallurgical features of oxygen steelmaking processes, and their control form part of the book. It also covers basic open hearth, electric arc furnace and stainless steelmaking, before discussing the area of casting of liquid steel—ingot casting, continuous casting and near net shape casting. The book concludes with a chapter on the status of the ironmaking and steelmaking in India. In line with the application of theoretical principles, several worked-out examples dealing with fundamental principles as applied to actual plant situations are presented. The book is primarily intended for undergraduate and postgraduate students of metallurgical engineering. It would also be immensely useful to researchers in the area of iron and steel.

It Can't Happen Here Jul 07 2021 “The novel that foreshadowed Donald Trump’s authoritarian appeal.”—Salon It Can’t Happen Here is the only one of Sinclair Lewis’s later novels to match the power of *Main Street*, *Babbitt*, and *Arrowsmith*. A cautionary tale about the fragility of democracy, it is an alarming, eerily timeless look at how fascism could take hold in America. Written during the Great Depression, when the country was largely oblivious to Hitler’s aggression, it juxtaposes sharp political satire with the chillingly realistic rise of a president who becomes a dictator to save the nation from welfare cheats, sex, crime, and a liberal press. Called “a message to thinking Americans” by the *Springfield Republican* when it was published in 1935, *It Can’t Happen Here* is a shockingly prescient novel that remains as fresh and contemporary as today’s news. Includes an Introduction by Michael Meyer and an Afterword by Gary Scharnhorst

The Good Soldier Jul 19 2022 *The Good Soldier* is considered Ford's masterpiece. This tale of adultery and deceit centers around two couples, Edward and Leonora Ashburnham, and their American friends, John and Florence Dowell. John Dowell narrates the events of Florence's affair with Edward, the "good soldier," and her subsequent suicide. Through Dowell's confused and perhaps unreliable narrative, Ford attempted to recreate real thoughts. This literary technique was a forerunner to literary techniques employed by such later writers as Samuel Beckett and J.M. Coetzee. Ford Madox Ford (Ford Madox Hueffer) was born in 1873. He was a novelist, poet, literary critic, editor, and one of the founding fathers of English Modernism. He published over eighty books, including two collaborations with Joseph Conrad (*Inheritors* in 1901 and *Romance* in 1903). He died in 1939.
