Conducting and Rehearsing the Instrumental Music Ensemble is the most comprehensive guide on the rehearsal process for conducting instrumental music ensembles. Ideal for the advanced instrumental music conductor seeking to look beyond basic conducting technique, this work breaks the multidimensional activity of working with an ensemble, orchestra, or band into its constituent components. Advanced students of conducting will find within the full range of conducting activities: • Chapters on the infrastructure of the rehearsal, the rehearsal environment, 10 rehearsal essentials, score study, music imagery, inner singing, and rehearsal procedures (with an emphasis on an integrated approach to rehearsing) • The technical priorities of intonation and tuning, rhythm patterns, ensemble sonority (tone,

balance, blend, color and texture), and articulation • The musical priorities of tempo and ensemble precision, phrasing and the musical line, style and interpretation, dynamics and musical expression • Emphasizing the expectations of 21st-century conductors, the challenges of conducting and rehearsing contemporary music, preparing conductor profiles and self-evaluations, and moving from the rehearsal process to concert performance

Conducting and Rehearsing the Instrumental Music Ensemble is a great resource for teachers and students of conducting, as well as current conductors wishing to further hone their skills. This book examines how rhetorically effective uses of silence and materiality mediate feminist activism and discusses the implications of these dynamics for pedagogy. Specifically, the text establishes a theoretical foundation for what the author terms "psychosocial composing," or "the metaphorical composing and revising of individual participants and society, and the contribution of written and visual texts as an input and output of the relationships between individuals and social culture." This idea is examined through primary research on the Clothesline Project, an international event that invites people who have experienced gender violence (directly or indirectly) to decorate tee shirts that get hung on clotheslines in public places. Through looking at values and roles of silence in global cultures and the use of material arts in activist

efforts, the author argues for the unique value of silence and materiality in individual and collective spaces. The manuscript includes discussion questions and sample teaching materials. Overall, making connections among composition and rhetoric, psychology, sociology, politics, women's studies, art and design, pedagogy, and history, this book further demonstrates the potential interdisciplinary approaches to rhetoric and communication. This book examines the American legal system, including a comprehensive treatment of the U.S. Supreme Court. Despite this treatment, the 'in' from the title deserves emphasis, for it extensively examines lower courts, providing separate chapters on state courts, the US District Courts, and the US Courts of Appeals. The book analyzes these courts from a legal/extralegal framework, drawing different conclusions about the relative influence of each based on institutional structures and empirical evidence. The book is also tied together through its attention to the relationship between lower courts and the Supreme Court. Additionally, Election 2000 litigation provides a common substantive topic linking many of the chapters. Finally, it provides extended coverage to the legal process, with separate chapters on civil procedure, evidence, and criminal procedure. In this valuable resource, experts share deep knowledge including practical "how-to" and preventive trouble-shooting tips. Instructors

will learn about course design and development, instructional methods for online teaching, and student engagement and community building techniques. The book contains successful teaching strategies, guidance for facilitating interactions and responding to diversity, and assessments, as well as future directions for online learning. With many field-tested examples and practice assignments, and with voices from students, teachers, and experts, this book arms instructors and administrators with the tools they need to teach effective and empowering online courses. This one-stop resource addresses all of the core elements of online teaching in terms that are universally applicable to any content area and at any instructional level. "A rare book in education: one that is not only highly useful but also intellectually coherent and based on robust, transferable principles of learning and teaching. All educators—in online environments and in brick-and-mortar schools—will find this an invaluable resource." —From the Foreword by Grant Wiggins "We now know we can get increased participation with online tools to make thinking more visible and switch the traditional delivery of instruction to personalize learning. While it is inevitable that online learning will become an important skill for everyone, the ideas, concepts, strategies, design elements, and tools in the book by Thormann and Zimmerman can also be applied to blended learning." —Alan November, Senior Partner and Founder, November

Learning “The authors of this book have created an excellent resource for anyone interested in becoming an online instructor or improving his or her skills in online teaching. The authors share a wealth of step-by-step activities, examples of assignments and teaching strategies that will guide both novice and experienced teachers as they expand their skills into the online realm. Even as a ‘veteran’ online instructor the book provided me with new ideas to try in my next online class.” —Sam Gladstein, Coordinator, Edmonds eLearning Program at Edmonds School District, WA “Cheers to Thormann and Zimmerman for providing a must-read for online teaching. This clear and practical guide takes the instructor from design to implementation of online courses. The authors remove the anxiety about online teaching for those thinking about on-screen instruction, and provide new thinking and examples for those already immersed in it. It is a great guide for those entering the field and a superb resource for those actively engaged in it.” —Anthony J. Bent, Chairman, Global Studies-21st Century Skills Committee of the Massachusetts Association of School Superintendents

**Book Features:** The building blocks necessary to create a successful online course. The know-how of long-time online instructors. Models for Skype conferencing with groups of students. Templates for course building, including sample assignments, activities, assessments, and emails. Detailed

treatment of diversity in the online environment

Joan Thormann is professor in the division of Technology in Education at Lesley University, Cambridge, Massachusetts. She edits a column on technology and special needs for *Learning and Leading with Technology*. Isa Kaftal Zimmerman is the principal of IKZ Advisors in Boston, Massachusetts, an educational consulting firm serving educators and stakeholders in the Science, Technology, Engineering, and Mathematics (STEM) fields. Static analysis is increasingly recognized as a fundamental research area aimed at studying and developing tools for high performance implementations and verification systems for all programming language paradigms. The last two decades have witnessed substantial developments in this field, ranging from theoretical frameworks to design, implementation, and application of analyzers in optimizing compilers. Since 1994, SAS has been the annual conference and forum for researchers in all aspects of static analysis. This volume contains the proceedings of the 6th International Symposium on Static Analysis (SAS'99) which was held in Venice, Italy, on 22-24 September 1999. The previous SAS conferences were held in Namur (Belgium), Glasgow (UK), Aachen (Germany), Paris (France), and Pisa (Italy). The program committee selected 18 papers out of 42 submissions on the basis of at least three reviews. The resulting volume offers to the reader a complete landscape of the research in this area. The papers

contribute to the following topics: foundations of static analysis, abstract domain design, and applications of static analysis to different programming paradigms (concurrent, synchronous, imperative, object oriented, logical, and functional). In particular, several papers use static analysis for obtaining state space reduction in concurrent systems. New application fields are also addressed, such as the problems of security and secrecy. Traci Gardner offers practical tips, starting points, and a companion website to help secondary and college teachers design effective writing assignments. Effective student writing begins with well-designed classroom assignments. In *Designing Writing Assignments*, veteran educator Traci Gardner offers practical ways for teachers to develop assignments that will allow students to express their creativity and grow as writers and thinkers while still addressing the many demands of resource-stretched classrooms. She explores how to balance pedagogical and curricular goals with the needs of multiple learners while managing everyday challenges such as mandates, testing, and the paper load. Gardner uses her classroom experience to provide ideas on how to effectively define a writing task, explore the expectations for a composition activity, and assemble the supporting materials that students need to do their best work. This book includes dozens of starting points that teachers can customize and further develop for the students in their own

classrooms. With examples of validation studies, this book demonstrates how to design research investigating the validity of language tests.

Teaching grammar can be overwhelming and is often an overlooked part of effective instruction. The

Middle School Grammar Toolkit to the rescue! Now in its second edition, this comprehensive guide

makes grammar instruction fun and meaningful. You will learn how to: Teach grammar in a practical

and applicable way by presenting each grammar rule as a useful writing tool for students. Use

mentor texts—excerpts from great literature—to

help students understand grammar in action. Promote metacognition along the way, so that students become responsible for their own learning. Implement innovative instructional strategies and tools aligned with Common Core and other state standards. Throughout the book, you'll find step-by-step recommendations for teaching grammatical concepts, such as understanding intensive pronouns, choosing language that expresses ideas precisely, forming verbs in different moods, and maintaining consistency in style and tone, and much, much more. Organized to help students meet the Common Core State Standards and other state language standards for Grades 6–8, the book includes tips addressing teaching for each of these grades, classroom snapshots that show you the tools in action, and specific instructional recommendations to engage students. New! The second edition features revised classroom snapshots and exemplars to showcase successful practices, and new flowcharts to visually represent instructional recommendations. The expanded, free annotated bibliography is updated to include contemporary, high-quality young adult literature and gives examples of key grammatical concepts found in each work. These resources are available as Supplemental Downloads on our website. Guidelines to use in selecting, training, scheduling, supervising, and evaluating teacher-aides and programs. The Common Core's language standards can seem overwhelming—students

need to learn specific, complex grammar rules at each grade level. The Common Core Grammar Toolkit to the rescue! This comprehensive guide makes grammar instruction fun and meaningful. You will learn how to...

In *Assignments across the Curriculum*, Dan Melzer analyzes the rhetorical features and genres of writing assignments through the writing-to-learn and writing-in-the-disciplines perspectives. Presenting the results of his study of 2,101 writing assignments from undergraduate courses in the natural sciences, social sciences, business, and humanities in 100 postsecondary institutions in the United States, *Assignments across the Curriculum* is unique in its cross-institutional breadth and its focus on writing assignments. The results provide a panoramic view of college writing in the United States. Melzer's framework begins with the rhetorical situations of the assignments—the purposes and audiences—and broadens to include the assignments' genres and discourse community contexts. Among his conclusions is that courses connected to a writing-across-the-curriculum (WAC) initiative ask students to write more often, in a greater variety of genres, and for a greater variety of

purposes and audiences than non-WAC courses do, making a compelling case for the influence of the WAC movement. Melzer's work also reveals patterns in the rhetorical situations, genres, and discourse communities of college writing in the United States. These larger patterns are of interest to WAC practitioners working with faculty across disciplines, to writing center coordinators and tutors working with students who bring assignments from a variety of fields, to composition program administrators, to first-year writing instructors interested in preparing students for college writing, and to high school teachers attempting to bridge the gap between high school and college writing. *Translingual Pedagogical Perspectives* addresses the movement toward translingualism in the writing classroom and demonstrates the practical pedagogical strategies faculty can take to represent both domestic and international monolingual and multilingual students' perspectives in writing programs. Contributors explore approaches used by diverse writing programs across the United States, insisting that traditional strategies used in teaching writing need to be reimagined if they are to engage the growing number of diverse learners who take composition classes. The book showcases concrete and adaptable writing assignments from a variety of learning environments in postsecondary, English-medium writing classrooms, writing centers, and writing programs populated by monolingual and

multilingual students. By providing descriptive and reflective examples of how understanding translanguaging can influence pedagogy, *Translingual Pedagogical Perspectives* fills the gap between theoretical inquiry surrounding translanguaging and existing translingual pedagogical models for writing classrooms and programs. Additional appendixes provide a variety of readings, exercises, larger assignments, and other entry points, making *Translingual Pedagogical Perspectives* useful for instructors and graduate students interested in engaging translingual theories in their classrooms.

This book constitutes the refereed proceedings of the 7th FIP WG 2.2 International Conference, TCS 2012, held in Amsterdam, The Netherlands, in September 2012. The 25 revised full papers presented, together with one invited talk, were carefully reviewed and selected from 48 submissions. New results of computation theory are presented and more broadly experts in theoretical computer science meet to share insights and ask questions about the future directions of the field. *Discipline-Specific Writing* provides an introduction and guide to the teaching of this topic for students and trainee teachers. This book highlights the importance of

discipline-specific writing as a critical area of competence for students, and covers both the theory and practice of teaching this crucial topic. With chapters from practitioners and researchers working across a wide range of contexts around the world, *Discipline-Specific Writing: Explores teaching strategies in a variety of specific areas including science and technology, social science and business; Discusses curriculum development, course design and assessment, providing a framework for the reader; Analyses the teaching of language features including grammar and vocabulary for academic writing; Demonstrates the use of genre analysis, annotated bibliographies and corpora as tools for teaching; Provides practical suggestions for use in the classroom, questions for discussion and additional activities with each chapter.* *Discipline-Specific Writing* is key reading for students taking courses in English for Specific Purposes, Applied Linguistics, TESOL, TEFL and CELTA. This book, authored by two leading scholars of the Supreme Court and its policy making, systematically presents and validates the use of the attitudinal model to explain and predict Supreme Court decision making. In the process, it critiques the two major alternative models of Supreme Court decision making and their major variants: the legal and rational choice. Using the US Supreme Court Data Base, the justices' private papers, and other sources of information, the book

analyzes the appointment process, certiorari, the decision on the merits, opinion assignments, and the formation of opinion coalitions. The book will be the definitive presentation of the attitudinal model as well as an authoritative critique of the legal and rational choice models. The book thoroughly reflects research done since the 1993 publication of its predecessor, as well as decisions and developments in the Supreme Court, including the momentous decision of *Bush v. Gore*. The 2014 International Conference on Future Communication, Information and Computer Science (FCICS 2014) was held May 22-23, 2014 in Beijing, China. The objective of FCICS 2014 was to provide a platform for researchers, engineers and academics as well as industrial professionals from all over the world to present their research results and developm

The extraordinary, beloved novel about the ability of books to feed the soul even in the darkest of times. When Death has a story to tell, you listen. It is 1939. Nazi Germany. The country is holding its breath. Death has never been busier, and will become busier still. Liesel Meminger is a foster girl living outside of Munich, who scratches out a meager existence for herself by stealing when she encounters something she can't resist—books. With the help of her accordion-playing foster father, she learns to read and shares her stolen books with her neighbors during bombing raids as well as with

the Jewish man hidden in her basement. In superbly crafted writing that burns with intensity, award-winning author Markus Zusak, author of *I Am the Messenger*, has given us one of the most enduring stories of our time. "The kind of book that can be life-changing." —The New York Times "Deserves a place on the same shelf with *The Diary of a Young Girl* by Anne Frank." —USA Today

**DON'T MISS BRIDGE OF CLAY, MARKUS ZUSAK'S FIRST NOVEL SINCE THE BOOK THIEF.**

Volumes in *Writing Spaces: Readings on Writing* offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres. Today's compiler writer must choose a path through a design space that is filled with

diverse alternatives. "Engineering a Compiler" explores this design space by presenting some of the ways these problems have been solved, and the constraints that made each of those solutions attractive.
