This highly topical book brings together some of the world's leading specialists on the global car industry who discuss the ins and outs of the faster lane of regionalism at a time that the world is reassessing the ins and outs of globalization. It provides a thorough and up-dated mapping of the worldwide geography of the car industry, in the triad regions (Europe, North America and Japan), and in the emerging countries and regions. The Internationalization of Japan provides the English-speaking reader with the opportunity to hear what some of Japan's leading social scientists and other commentators have to say about the internationalization of their country as well

as their country's impact overseas. The topic is of extreme importance now as the international community demands a greater Japanese contribution to international society as well as changes in Japan to facilitate foreign access. The book discusses the internationalization of politics, economy and society. Topics of special interest include the internationalization of Japanese capital, the response of Japanese society to foreign workers, local level initiatives for internationalization and the internationalization of education. To place the internationalization of Japan in comparative perspective there are chapters on Britain and the United States from a leading British and a leading American political scientist respectively. These two and the editors aside, all the contributors are highly regarded Japanese scholars or commentators. Includes all works deriving from DOE, other related government-sponsored information and foreign nonnuclear information. Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer. This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle. In this study, the contributors examine the evolution of Japanese direct investment in Europe and explore its determinants. They illustrate how, as multinationals, Japanese firms adapt to local conditions and try to take advantage of a global organisation. In this respect, three areas in particular are explored: human resource management, relationships with suppliers and R&D unit locations.
