"One of the most comprehensive histories of modern capitalism yet written." —Michael Hirsh, New York Times An authoritative, insightful, and highly readable history of the twentieth-century global economy, updated with a new chapter on the early decades of the new century. Global Capitalism guides the reader from the globalization of the early twentieth century and its swift collapse in the crises of 1914–45, to the return to global integration at the end of the century, and the subsequent retreat in the wake of the financial crisis of 2008. What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today. In Britain we have lost touch with the Great War. Our overriding sense now is of a meaningless, futile bloodbath in the mud of Flanders -- of young men whose lives were cut off in their prime for no evident purpose. But by reducing the conflict to personal tragedies, however moving, we have lost the big picture: the history has been distilled into poetry. In *The Long Shadow*, critically acclaimed author David Reynolds seeks to redress the balance by exploring the true impact of 1914–18 on the 20th century. Some of the Great War's legacies were negative and pernicious but others proved transformative in a positive sense. Exploring big themes such as democracy and empire, nationalism and capitalism and re-examining the differing impacts of the War on Britain, Ireland and the United States, *The Long Shadow* throws light on the whole of the last century and demonstrates that 1914–18 is a conflict that Britain, more than any other nation, is still struggling to comprehend. Stunningly broad in its historical perspective, *The Long Shadow* is a magisterial and seismic re-presentation of the Great War. Music has gained the increasing attention of historians. Research has branched out to explore music-related topics, including creative labor, economic histories of music production, the social and political uses of music, and musical globalization. This handbook both covers the history of music in Europe and probes its role for the making of Europe during a "long" twentieth century. It offers concise guidance to key historical trends as well as the most important research on central topics within the field. "A useful, important book that reminds us, at the right time, how hard [European unity] has been, and how much care must be taken to avoid the terrible old temptations." --Los Angeles Times *Dark Continent* provides an alternative history of the twentieth century, one in which the triumph of democracy was anything but a forgone conclusion and fascism and communism provided rival political solutions that battled and sometimes triumphed in an effort to determine the course the continent would take. Mark Mazower strips away myths that have comforted us since World War II, revealing Europe as an entity constantly engaged in a bloody project of self-invention. Here is a history not of inevitable victories and forward marches, but of narrow squeaks and unexpected twists, where townships boast a bronze of Mussolini on horseback one moment, only to melt it down and recast it as a pair of noble partisans the next. Unflinching, intelligent, *Dark Continent* provides a provocative vision of Europe's past, present, and future-and confirms Mark Mazower as a historian of valuable gifts. Examines the array of financial crises, slumps, depressions and recessions that happened around the globe during the twentieth century. Winner of the 2007 National Book Critics Circle Award for Criticism A New York Times Book Review Top Ten Book of the Year Time magazine Top Ten Nonfiction Book of 2007 Newsweek Favorite Books of 2007 A Washington Post Book World Best Book of 2007 In this sweeping and dramatic narrative, Alex Ross, music critic for *The New Yorker*, weaves together the histories of the twentieth century and its music, from Vienna before the First World War to Paris in the twenties; from Hitler's Germany and Stalin's Russia to downtown New York in the sixties and seventies up to the present. Taking readers into the labyrinth of modern style, Ross draws revelatory connections between the century's most influential composers and the wider culture. *The Rest Is Noise* is an astonishing history of the twentieth century as told through its music. Africa in Europe goes beyond the still-dominant American and transatlantic focus of diaspora studies, examining the experiences of black and white Africans, Afro-Caribbeans, and African Americans in Western Europe, Britain, and the former Soviet Union from the end of the nineteenth century to the beginning of the twenty-first. Exploring a huge range of border-crossing experiences across and within Africa and Europe, it examines topics such as ethnic and cultural boundaries, working across the color line, and the limits of solidarity. With contributions from scholars in social history, art history, anthropology, cultural studies, and literary studies, as well from a novelist and a filmmaker, it offers a broad look at the intersection of Africa and Europe at all levels, from family and community to culture and politics. This book offers a new perspective and empirical evidence that are relevant for understanding changes in family structures, intergenerational relationships, and female labor force participation in the "strong family" societies and that also shed light on those in the "weak family" societies. Focusing on the stem family and the gender division of labor, presenting detailed quantitative evidence, and testing the theories on family change and gender revolution, the book provides a comprehensive examination of change, continuity, and regionality in the Japanese family system over the twentieth century. By analyzing data from a nationally representative life course survey with event history techniques, it investigates factors affecting post-marital intergenerational co-residence and proximate residence along with those influencing continuous and/or discontinuous employment of married women across the life course. In this way, it reveals the mechanisms underlying the stem family formation and those behind married women's M-shaped employment pattern. It further explores regionality in the Japanese family system, applying a demographic mapping method to data from a nationally representative community survey and official statistics. The mapping analyses demonstrate persistent geographical contrasts between two types of living arrangements (single-household versus multi-household) in the stem family accompanied by two types of maternal employment (full-time versus part-time). They also reveal a historical correlation between traditional communal parenting systems and modern childcare services, linking past to present from the late nineteenth to the early twenty-first century. From the era of the industrial factory to the age of the microchip, *Pivotal Tuesdays* explores four twentieth-century elections—1912, 1932, 1968, and 1992—using the election of the American president as a lens through which to explore the broader sweep of the nation's social, economic, and political history. This pioneering work examines prostitution in Shanghai from the late nineteenth century to the present. Drawn mostly from the daughters and wives of the working poor and declassé elites, prostitutes in Shanghai were near the bottom of class and gender hierarchies. Yet they were central figures in Shanghai urban life, entering the historical record whenever others wanted to appreciate, castigate, count, regulate, cure, pathologize, warn about, rescue, eliminate, or deploy them as a symbol in a larger social panorama. Over the past century, prostitution has been understood in many ways: as a source of urbanized pleasures, a profession full of unscrupulous and greedy schemers, a changing site of work for women, a source of moral danger and physical disease, a marker of national decay, and a sign of modernity. For the Communist leadership of the 1950s, the elimination of prostitution symbolized China's emergence as a strong, healthy, and modern nation. In the past decade, as prostitution once again has become a recognized feature of Chinese society, it has been incorporated into a larger public discussion about what kind of modernity China should seek and what kind of sex and gender arrangements should characterize that modernity. Prostitutes, like every other non-elite group, did not record their own lives. How can sources generated by intense public argument about the "larger" meanings of prostitution be read for clues to those lives? Hershatter makes use of a broad range of materials: guidebooks to the pleasure quarters, collections of anecdotes about high-class courtesans, tabloid gossip columns, municipal regulations prohibiting street soliciting, police interrogations of streetwalkers and those accused of trafficking in women, newspaper reports on court cases involving both courtesans and streetwalkers, polemics by Chinese and foreign reformers, learned articles by Chinese scholars commenting on the world history of prostitution and analyzing its local causes, surveys by doctors and social workers on sexually transmitted disease in various Shanghai populations, relief agency records, fictionalized accounts of the scams and sufferings of prostitutes, memoirs by former courtesan house patrons, and interviews with former officials and reformers. Although a courtesan may never set pen to paper, we can infer a great deal about her strategizing and working of the system through the vast cautionary literature that tells her customers how not to be defrauded by her. Newspaper accounts of the arrests and brief court testimonies of Shanghai streetwalkers let us glimpse the way that prostitutes positioned themselves to get the most they could from the legal system. Without recourse to direct speech, Hershatter argues, these women have nevertheless left an audible trace. Central to this study is the investigation of how things are known and later remembered, and how, later still, they are simultaneously apprehended and reinvented by the historian. *Science Be Dammed* is an alarming reminder of the high stakes in the management—and perils in the mismanagement—of water in the western United States. It seems deceptively simple: even when clear evidence was available that the Colorado River could not sustain ambitious dreaming and planning by decision-makers throughout the twentieth century, river planners and political operatives irresponsibly made the least sustainable and most dangerous long-term decisions. Arguing that the science of the early twentieth century can shed new light on the mistakes at the heart of the over-allocation of the Colorado River, authors Eric Kuhn and John Fleck delve into rarely reported early studies, showing that scientists warned as early as the 1920s that there was not enough water for the farms and cities boosters wanted to build. Contrary to a common myth that the authors of the Colorado River Compact did the best they could with limited information, Kuhn and Fleck show that development boosters selectively chose the information needed to support their dreams, ignoring inconvenient science that suggested a more cautious approach. Today water managers are struggling to come to terms with the mistakes of the past. Focused on both science and policy, Kuhn and Fleck unravel the tangled web that has constructed the current crisis. With key decisions being made now, including negotiations for rules governing how the Colorado River water will be used after 2026, *Science Be Dammed* offers a clear-eyed path forward by looking back. Understanding how mistakes were made is crucial to understanding our contemporary problems. *Science Be Dammed* offers important lessons in the age of climate change about the necessity of seeking out the best science to support the decisions we make. The

thirteen critical and well-documented chapters of Women, Work and Activism examine women's labor struggle from late nineteenth-century Portuguese mutual societies to Yugoslav peasant women's work in the 1930s, and from the Catalan labor movement under the Franco dictatorship to workplace democracy in the United States. The authors portray women's labor activism in a wide variety of contexts. This includes spontaneous resistance to masculinist trade unionism, the feminist engagement of women workers, the activism of communist wives of workers, and female long-distance migration, among others. The chapters address the gendered involvement of working people in multiple and often precarious and unstable labor relations and in unpaid labor, as well as the role of the state and other institutions in shaping the history of women's labor. The book is an innovative contribution to both the new labor history and feminist history. It fully integrates the conceptual advances made by gender historians in the study of labor activism, driving home critiques of Eurocentric historiographies of labor to Europe while simultaneously contributing to an inclusive history of women's labor-related activism wherever to be found. Examining women's activism in male-dominated movements and institutions, and in women's networks and organizations, the authors make a case for a new direction in gender history. Covering the sweep of Russian history from empire to Soviet Union to post-Soviet state, Russia's Long Twentieth Century is a comprehensive yet accessible textbook that situates modern Russia in the context of world history and encourages students to analyse the ways in which citizens learnt to live within its system and create distinctly Soviet identities from its structures and ideologies. Chronologically organised but moving beyond the traditional Cold War framework, this book covers topics such as the accelerating social, economic and political shifts in the Russian empire before the Revolution of 1905, the construction of the socialist order under Bolshevik government, and the development of a new state structure, political ideology and foreign policy in the decades since the collapse of the Soviet Union. The authors highlight the polemics and disagreements that energize the field, discussing interpretations from Russian, émigré, and Western historiographies and showing how scholars diverge sharply in their understanding of key events, historical processes, and personalities. Each chapter contains a selection of primary sources and discussion questions, engaging with the voices and experiences of ordinary Soviet citizens and familiarizing students with the techniques of source criticism. Illustrated with images and maps throughout, this book is an essential introduction to twentieth-century Russian history. In this major new collection, an international team of scholars examine the relationship between the Chinese women's periodical press and global modernity in the late nineteenth and twentieth centuries. The essays in this richly illustrated volume probe the ramifications for women of two monumental developments in this period: the intensification of China's encounters with foreign powers and a media transformation comparable in its impact to the current internet age. The book offers a distinctive methodology for studying the periodical press, which is supported by the development of a bilingual database of early Chinese periodicals. Throughout the study, essays on China are punctuated by transdisciplinary reflections from scholars working on periodicals outside of the Chinese context, encouraging readers to rethink common stereotypes about lived womanhood in modern China, and to reconsider the nature of Chinese modernity in a global context. Winner of the American Sociological Association PEWS Award for Distinguished Scholarship: a comprehensive analysis of the development of world capitalism over the millennium. From religious tomes to current folk prophecies, recorded history reveals a plethora of narratives predicting or showcasing the end of the world. The incident at Waco, the subway bombing by the Japanese cult Aum Supreme Truth, and the tragedy at Jonestown are just a few examples of such apocalyptic scenarios. And these are not isolated incidents; millions of Americans today believe the end of the world is inevitable, either by a divinely ordained plan, nuclear catastrophe, extraterrestrial invasion, or gradual environmental decay. Examining the doomsday scenarios and apocalyptic predictions of visionaries, televangelists, survivalists, and various other endtimes enthusiasts, as well as popular culture, film, music, fashion, and humor, Daniel Wojcik sheds new light on America's fascination with worldly destruction and transformation. He explores the origins of contemporary apocalyptic beliefs and compares religious and secular apocalyptic speculation, showing us the routes our belief systems have traveled over the centuries to arrive at the dawn of a new millennium. Included in his sweeping examination are premillennial prophecy traditions, prophecies associated with visions of the Virgin Mary, secular ideas about nuclear apocalypse, the transformation of apocalyptic prophecy in the post-Cold War era, and emerging apocalyptic ideas associated with UFOs and extraterrestrials. Timely, yet of lasting importance, *The End of the World as We Know It* is a comprehensive cultural and historical portrait of an age-old phenomenon and a fascinating guide to contemporary apocalyptic fever. American pragmatism, born in the 1870s in Cambridge, Massachusetts, has as its central insight the idea that our philosophical concepts of truth, knowledge, probability, and so on must start with, and remain linked to, human experience and inquiry. This book traces and assesses the strong influence of American pragmatism on British philosophy, with particular emphasis on Cambridge during the inter-war period, on post-war Oxford, and on recent developments. Most philosophers would say that American pragmatism received only a hostile reception in England when the ideas first travelled across the Atlantic. But this volume argues that the movement of pragmatist ideas in Britain was a strong and important current, cutting new channels to fruitful ways of thinking about philosophy's most profound problems. Its ideas have found a home in the work of Wittgenstein, Ramsey, Anscombe and, more recently, Simon Blackburn and Huw Price. Examines the intersections of power, culture and science that went into the struggle to overcome disease and improve people's health in Chinese regions of 20th century East Asia. An instant New York Times and Wall Street Journal bestseller from one of the world's leading economists, offering a grand narrative of the century that made us richer than ever, yet left us unsatisfied. "A magisterial history."—Paul Krugman Named a Best Book of 2022 by Financial Times * Economist * Fast Company Before 1870, humanity lived in dire poverty, with a slow crawl of invention offset by a growing population. Then came a great shift: invention sprinted forward, doubling our technological capabilities each generation and utterly transforming the economy again and again. Our ancestors would have presumed we would have used such powers to build utopia. But it was not so. When 1870–2010 ended, the world instead saw global warming; economic depression, uncertainty, and inequality; and broad rejection of the status quo. Economist Brad DeLong's *Slouching Towards Utopia* tells the story of how this unprecedented explosion of material wealth occurred, how it transformed the globe, and why it failed to deliver us to utopia. Of remarkable breadth and ambition, it reveals the last century to have been less a march of progress than a slouch in the right direction. Winner of the American Sociological Association PEWS Award (1995) for Distinguished Scholarship *The Long Twentieth Century* traces the epochal shifts in the relationship between capital accumulation and state formation over a 700-year period. Giovanni Arrighi masterfully synthesizes social theory, comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium. Borrowing from Braudel, Arrighi argues that the history of capitalism has unfolded as a succession of "long centuries"—ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world-economic space. The modest beginnings, rise and violent unraveling of the links forged between capital, state power, and geopolitics by hegemonic classes and states are explored with dramatic intensity. From this perspective, Arrighi explains the changing fortunes of Florentine, Venetian, Genoese, Dutch, English, and finally American capitalism. The book concludes with an examination of the forces which have shaped and are now poised to undermine America's world power. A panoramic vision of the Chinese literary landscape across the twentieth century. Award-winning literary scholar and poet Yunte Huang here gathers together an intimate and authoritative selection of significant works, in outstanding translations, from nearly fifty Chinese writers, that together express a search for the soul of modern China. From the 1912 overthrow of a millennia-long monarchy to the Cultural Revolution, to China's rise as a global military and economic superpower, the Chinese literary imagination has encompassed an astonishing array of moods and styles—from sublime lyricism to witty surrealism, poignant documentary to the ironic, the transgressive, and the defiant. Huang provides the requisite context for these revelatory works of fiction, poetry, essays, letters, and speeches in helpful headnotes, chronologies, and brief introductions to the Republican, Revolutionary, and Post-Mao Eras. From Lu Xun's *Call to Arms* (1923) to Gao Xinjiang's Nobel Prize-winning *Soul Mountain* (1990), this remarkable anthology features writers both known and unknown in its celebration of the versatility of writing. From belles lettres to literary propaganda, from poetic revolution to pulp fiction, *The Big Red Book of Modern Chinese Literature* is an eye-opening, mesmerizing, and indispensable portrait of China in the tumultuous twentieth century. A witty, psychedelic, and telling novel of the 1960s Richard Fariña evokes the Sixties as precisely, wittily, and poignantly as F. Scott Fitzgerald captured the Jazz Age. The hero, Gnosis Pappadopoulos, weaves his way through the psychedelic landscape, encountering—among other things—mescaline, women, art, gluttony, falsehood, science, prayer, and, occasionally, truth. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators. From the Trade Paperback edition. This book brings together recent and original work to illuminate comparisons and contrasts between two former colonies of the British Empire. The contributors include some of the top names in history and political science in Canada and Australia. They cover the entire twentieth century and examine different aspects of Canadian-Australian relations, including trade, civil aviation, and military, constitutional, imperial, and diplomatic relations. The comparisons include Aboriginal rights, nation building, middle powers, and attitudes toward the Empire. This timely volume is well situated in the field of comparative studies, a new and growing area. It will be of interest to students and scholars of foreign affairs, the British Commonwealth and its dismantling, constitutional history, and international relations. Since the nineteenth century, the development of international humanitarian law has been marked by complex entanglements of legal theory, historical trauma, criminal prosecution, historiography, and politics. All of these factors have played a role in changing views on the applicability of international law and human-rights ideas to state-organized violence, which in turn have been largely driven by transnational responses to German state crimes. Here, Annette Weinke gives a groundbreaking long-term history of the political, legal and academic debates concerning German state and mass violence in the First World War, during the National Socialist era and the Holocaust, and under the GDR. "An important and much-needed introduction to this rich and fast-growing field. Her shatter has handled a daunting task with aplomb." —Susan L. Glosser, author of *Chinese Visions of Family and State, 1915–1953* The biological transformation of modern times -- The foundations of the modern global economy -- Reorganizing the global economy -- Localization and globalization -- The great explosion -- New world (dis)order -- High modernity -- Revolt and refusal -- Transformative modernity -- Democracy and capitalism triumphant Atlanta is often cited as a prime example of a progressive New South metropolis in which blacks and whites have forged "a city too busy to hate." But Ronald Bayor argues that the city continues to bear the indelible mark of racial bias. Offering the first comprehensive history of Atlanta race relations, he discusses the impact of race on the physical and institutional development of the city from the end of the Civil War through the mayorship of Andrew Young in the 1980s. Bayor shows the extent of inequality, investigates the gap between rhetoric and reality, and presents a fresh analysis of the legacy of segregation and race relations for the American urban environment. Bayor explores frequently ignored public policy issues through the lens of race—including hospital care, highway placement and development, police and fire services, schools, and park use, as well as housing patterns and employment. He finds that racial concerns profoundly shaped Atlanta, as they did other American cities. Drawing on oral interviews and written records, Bayor traces how Atlanta's black leaders and their community have responded to the impact of race on local urban development. By bringing long-term urban development into a discussion of race, Bayor provides an element missing in usual analyses of cities and race relations. A philosopher and art theorist extends the poststructuralist theory of revolution to the nexus of art and activism. Gerald Raunig has written an alternative art history of the "long twentieth century," from the Paris Commune of 1871 to the turbulent counter-globalization protests in Genoa in 2001. Meticulously moving from the Situationists and Sergei Eisenstein to Viennese Actionism and the PublixTheatreCaravan, *Art and Revolution* takes on the history of revolutionary transgressions and optimistically charts an emergence from its tales of tragic failure and unequivocal disaster. By eloquently applying Deleuze and Guattari's idea of the "machine," Raunig extends the poststructuralist theory of revolution through to the explosive nexus of art and activism. As hopeful as it is incisive, *Art and Revolution* encourages a new generation of artists and thinkers to refuse to participate in the tired prescriptions of marketplace and authority and instead create radical new methods of engagement. Raunig develops an indispensable, contemporary conception of political change—a conception that transcends the outmoded formulations of insurrection and resistance. Too much blood and ink has been shed for the art machines and the revolutionary machines to remain separate. Gerald Raunig is a philosopher and art theorist who lives in Vienna, Austria. Across the continent, Hitler's war of territorial expansion after 1938 detonated myriad "irregular wars, of culture as well as of politics, which took on a "cleansing" intransigence as those driving them sought to make "homogeneous" communities, whether ethnic, political, or religious. So much of this was prefigured with primal intensity in Spain in 1936, where, on 17-18 July, a group of army officers rebelled against the socially reforming Republic. Saved from almost certain failure by Nazi and Fascist military intervention, and by a British inaction amounting to complicity, these army rebels unleashed a conflict in which civilians became the targets of mass killing. The new military authorities authorized and presided over an extermination of those sectors associated with Republican change—especially those who symbolized cultural change and thus posed a threat to old ways of being and thinking: progressive teachers, self-educated workers, "new" women. #1 NEW YORK TIMES BESTSELLER • A "bracing" (Vox) guide for surviving and resisting America's turn towards authoritarianism, from "a rising public intellectual unafraid to make bold connections between past and present" (The New York Times) "Timothy Snyder reasons with unparalleled clarity, throwing the past and future into sharp relief. He has written the rare kind of book that can be read in one sitting but will keep you coming back to help regain your bearings."—Masha Gessen The Founding Fathers tried to protect us from the threat they knew, the tyranny that overcame ancient democracy. Today, our political order faces new threats, not unlike the totalitarianism of the twentieth century. We are no wiser than the Europeans who saw democracy yield to fascism, Nazism, or communism. Our one advantage is that we might learn from their experience. On *Tyranny* is a call to arms and a guide to resistance, with invaluable ideas for how we can preserve our freedoms in the uncertain years to come. No Marketing Blurb Are homecoming games and freshman composition, Twitter feeds and scholarly monographs really mortal enemies? *Media U* presents a provocative rethinking of the development of American higher education centered on the insight that universities are media institutions. Tracing over a century of media history and the academy, Mark Garrett Cooper and John Marx argue that the fundamental goal of the American research university has been to cultivate audiences and convince them of its value. *Media U* shows how universities have appropriated new media technologies to convey their message about higher education, the aims of research, and campus life. The need to create an audience stamps each of the university's steadily proliferating disciplines, shapes its structure, and determines its division of labor. Cooper and Marx examine how the research university has sought to inform publics and convince them of its value to American society, from the rise of football and Great Books programs in the early twentieth century through a midcentury communications complex linking big science, New Criticism, and design, from the co-option of 1960s student activist media through the early-twenty-first-century reception of MOOCs and the latest promises of technological disruption. The book considers the ways in which universities have used media platforms to reconcile national commitments to equal opportunity with corporate capitalism as well as the vexed relationship of democracy and hierarchy. By exploring how media engagement brought the American university into being and continues to shape academic labor, *Media U* presents essential questions and resources for reimagining the university and confronting its future. This pathbreaking book documents the transformation of reproductive practices and politics on Indian reservations from the late nineteenth century to the present, integrating a localized history of childbearing, motherhood, and activism on the Crow Reservation in Montana with an analysis of trends affecting Indigenous women more broadly. As Brianna Theobald illustrates, the federal government and local authorities have long sought to control Indigenous families and women's reproduction, using tactics such as coercive sterilization and removal of Indigenous children into the white foster care system. But Theobald examines women's resistance, showing how they have worked within families, tribal networks, and activist groups to confront these issues. Blending local and intimate family histories with the histories of broader movements such as WARN (Women of All Red Nations), Theobald links the federal government's intrusion into Indigenous women's reproductive and familial decisions to the wider history of eugenics and the reproductive rights movement. She argues convincingly that colonial politics have always been—and remain—reproductive politics. By looking deeply at one tribal nation over more than a century, Theobald offers an especially rich analysis of how Indigenous women experienced pregnancy and motherhood under evolving federal Indian policy. At the heart of this history are the Crow women who displayed creativity and fortitude in struggling for reproductive self-determination. Offers eleven essays on federal Indian policy. This volume critically examines the notion of a 'new' India by acknowledging that India is changing remarkably and by indicating that in the overzealous enthusiasm about the new India, there is collective amnesia about the other, older India. The book argues that the increasing consolidation of capitalist markets of commodity production and consumption has unleashed not only economic growth and social change, but has also introduced new contradictions associated

with market dynamics in the material and social as well as intellectual spheres. This is a comprehensive history of political violence during Europe's incredibly violent twentieth century. Leading scholars examine the causes and dynamics of war, revolution, counterrevolution, genocide, ethnic cleansing, terrorism and state repression. They locate these manifestations of political violence within their full transnational and comparative contexts and within broader trends in European history from the beginning of the dissolution of the Ottoman Empire in the late nineteenth-century, through the two world wars, to the Yugoslav Wars and the rise of fundamentalist terrorism. The book spans a 'greater Europe' stretching from Ireland and Iberia to the Baltic, the Caucasus, Turkey and the southern shores of the Mediterranean. It sheds new light on the extent to which political violence in twentieth-century Europe was inseparable from the generation of new forms of state power and their projection into other societies, be they distant territories of imperial conquest or ones much closer to home. Health patterns in Southeast Asia have changed profoundly over the past century. In that period, epidemic and chronic diseases, environmental transformations, and international health institutions have created new connections within the region and the increased interdependence of Southeast Asia with China and India. In this volume leading scholars provide a new approach to the history of health in Southeast Asia. Framed by a series of synoptic pieces on the "Landscapes of Health" in Southeast Asia in 1914, 1950, and 2014 the essays interweave local, national, and regional perspectives. They range from studies of long-term processes such as changing epidemics, mortality and aging, and environmental history to detailed accounts of particular episodes: the global cholera epidemic and the hajj, the influenza epidemic of 1918, WWII, and natural disasters. The writers also examine state policy on healthcare and the influence of organizations, from NGOs such as the China Medical Board and the Rockefeller Foundation to grassroots organizations in Thailand, Indonesia, and the Philippines.
