Recent radical changes in timecode technology, location shooting and post-production working practices have been brought about by the fragmentation of the television programme making industry and by a dramatic increase in affordable digital transmission and editing equipment and systems. With the expansion of non-traditional television service producers (cable, satellite and video-on-demand) almost anything goes as far as shooting and editing formats are concerned. *Timecode: A User's Guide* is an indispensable reference for anyone needing to get to grips with the many aspects of timecode, whether in-house or on location. Taking into account these changes this book has now been brought completely up to date to include:

- * timecode and DVD, LTC & VITC in HANC packets in the serial digital TV interfaces
- * timecode in IEEE1395 (Firewire)
- * timecode and digital video cassettes
- * new recording formats of DVD, DV mini cassettes and D6 are included
- * 4:3 scanning for wide-screen films - standards updated
- * new material to cover new working practices
- * new appendices to cover the global LF time data transmissions and time data embedded in BBC transmissions

Advice is also given on avoiding and remedying faults and errors. *GroupWise 5.5* is designed to handle all of today's core business communications including Intranet publication and Internet connections.
