International Relations (IR) is ironically not "international" at all. IR scholars are part of a global discipline with a single, shared object of study - the world, and yet theorizing gravitates around a number of concepts that have been conceived solely in the United States. The purpose of this book is to re-balance this "western bias" by examining the ways in which IR has evolved and is practiced around the world. The fifteen case studies offer fresh insights into the political and socioeconomic environments that characterize diverse geocultural sites and the ways in which these traits inform and condition scholarly activity in International Relations. By bringing together scholars living and working across the globe Tickner and Wæver provide the most comprehensive analysis of IR ever published. It is essential reading for anyone who is concerned about the history, development and future of international relations. This book provides a historical-sociological analysis of the history of sociology in Belgium from the late-nineteenth until the early-twenty-first century. It sheds new light on the social structures that shaped and shape the orientations and work of sociologists in Belgium. The impact of three structural factors is discussed in more detail: religion,

language and publication imperatives. Starting from analyses of these structural factors, this book presents a detailed analysis of the genesis and institutionalization of different sociologies in Belgium. It sheds light on the kinds of sociological knowledge that are or are not valued in Belgium. This book constitutes an important contribution to the sociological history of sociology and the development of a reflective historical sociology, and will appeal to students and scholars of social theory, as well as readers interested in the history of Contemporary Belgium. theoretical underpinnings of the field of transitional justice, something that has hitherto been lacking both in study and practice.
