Advances in Distributed Computing and Machine Learning 2022 This book presents recent advances in the field of scalable distributed computing including state-of-the-art research in the field of Cloud Computing, the Internet of Things (IoT), and Blockchain in distributed environments along with applications and findings in broad areas including Data Analytics, AI, and Machine Learning to address complex real-world problems. It features selected high-quality research papers from the 2nd International Conference on Advances in Distributed Computing and Machine Learning (ICADCML 2021), organized by the Department of Computer Science and Information Technology, Institute of Technical Education and Research (ITER), Siksha 'O' Anusandhan (Deemed to be University), Bhubaneswar, India.

Multiple Classifier Systems Nov 14 2019 This book constitutes the refereed proceedings of the 10th International Workshop on Multiple Classifier Systems, MCS 2011, held in

Naples, Italy, in June 2011. The 36 revised papers presented together with two invited papers were carefully reviewed and selected from more than 50 submissions. The contributions are organized into sessions dealing with classifier ensembles; trees and forests; one-class classifiers; multiple kernels; classifier selection; sequential combination; ECOC; diversity; clustering; biometrics; and computer security.

Group Decision and Negotiation: Behavior, Models, and Support Systems 2021 This book constitutes the refereed proceedings of the 19th International Conference on Group Decision and Negotiation, GDN 2019, held in Loughborough, UK, in June 2019. The field of Group Decision and Negotiation focuses on decision processes with at least two participants and a common goal but conflicting individual goals. Research areas of Group Decision and Negotiation include electronic negotiations, experiments, the role of emotion in group decision and negotiations, preference elicitation and decision support for group decisions and negotiations, and conflict resolution principles. The 17 full papers presented in this volume were carefully reviewed and selected from 98 submissions. They were organized in topical sections named: preference modeling for group decision and negotiations; collaborative decision making processes; conflict resolution; behavioral and negotiation support systems and studies.

Introduction to Decision Analysis Feb 16 2020 "This book is the most practical and thought-provoking step-by-step guide to making better decisions that is available today. Proven techniques and solid experience are the foundation for this classic text, which is written for the manager and for the decision analysis practitioner!"--

Essentials for the Improvement of Healthcare Using Lean & Six Sigma Aug 24 2020 Essentials for the Improvement of Healthcare Using Lean & Six Sigma is all about real and immediate quality improvement. Written by D.H. Stamatis, a renowned expert in organizational development and quality, the book addresses concerns that can be ameliorated with minimal government intervention. Detailing immediate paths for improvement fundamental to primary care, hospitals, and managed care, the book: Introduces much-needed mechanics of change, including transitioning from hierarchical groups to interactive inclusionary teams Focuses on customer satisfaction as a key indicator of quality Explains how Lean and Six Sigma tools can be readily applied to healthcare Spotlights primary care, including how to define and redesign its process and develop better metrics Presents IT applications that will improve billing, documentation and patient care Examines Malcolm Baldrige National Quality Award criteria as it applies to healthcare Illustrates quality improvements and best practices through real world case studies Includes a companion CD with Six Sigma forms and formulas, Lean improvement tools, and other quality tools and worksheets Whether you think advances in technology and medicine, coupled with freedom of choice, makes the U.S. healthcare system the best in the world, or whether you believe growing costs, regulatory morass, and a tort-obsessed culture drop it to the bottom; it is evident that the processes currently employed and subsequent defensive medicine philosophy that has resulted will not be able to meet the future demands of our aging society. Through Six Sigma and Lean, this text moves the focus from reactive controls to the proactive efficiency required to implement real and

sustainable quality improvements that will allow us to forge a system that is all about wellness.

Kaleidoscopes And Quilts May 21 2020 Kaleidoscope - the very word promises surprise and magic, chance and change. Exploding with visual excitement, a kaleidoscope design organizes an abundance of light, color, form, and motion into a complex and coherent image, capturing a moment of infinity. This book is jammed with how-to's and why-not process and product, and an abundance of text and photos that explains elements of and technique for creating the multifaceted, luminous, and random nature of a kaleidoscope's interior on the flat surface of a quilt. The kaleidoscope configuration and symmetrical repetition allows the quiltmaker to explore a variety of design possibilities using intricately printed fabric. With Paula as your guide, you will find that making kaleidoscope quilts is like making magic with fabric.

SOFSEM 2010: Theory and Practice of Computer Science Sep 05 2021 This book constitutes the refereed proceedings of the 36th Conference on Current Trends in Theory and Practice of Computer Science, SOFSEM 2010, held in Špindleruv Mlýn, Czech Republic, in January 2009. The 53 revised full papers, presented together with 11 invited contributions, were carefully reviewed and selected from 134 submissions. SOFSEM 2010 was organized around the following four tracks: Foundations of computer science, principles of software construction, Data, knowledge, and intelligent systems and Web science.

Non-cooperative Air Target Identification Using Radar Oct 18 2022 Contains the unclassified papers presented at the Symposium. Novel solutions to the Non-Cooperative Target Identification (NCTI) Problem, using radar are proposed. The papers are presented under the following headings: System requirements -- Target characterisation Radar measurements and feature extraction -- Target classification -- Scattering techniques, target modelling and validation.

Advances in Computer Science and Engineering Feb 10 2022 It is our pleasure to welcome you to the proceedings of the 13th International Computer Society of Iran Computer Conference (CSICC-2008). The conference has been held annually since 1995, except in 1998, when it transitioned from a year-end to first-quarter schedule. It has been moving in the direction of greater selectivity (see Fig.1) and broader international participation. Holding it in Kish Island this year represents an effort to further facilitate and encourage international contributions. We feel privileged to participate in further advancing this strong technical tradition.

Advances in Multimedia Information Processing - PCM Jul 20 2023 The two-volume proceedings LNCS 9916 and 9917, constitute the proceedings of the 17th Pacific-Rim

Conference on Multimedia, PCM 2016, held in Xi'an, China, in September 2016. The total of 128 papers presented in these proceedings was carefully reviewed and selected from submissions. The focus of the conference was as follows in multimedia content analysis, multimedia signal processing and communications, and multimedia applications and services.

Strauss and Mayer's Emergency Department Management July 15 2022 Offers a real-world, pragmatic guide designed to help emergency department managers efficiently which handle the many complex issues that arise in this challenging clinical environment. This title delivers practical solutions to virtually any problem that may arise in running an emergency department or acute care center.

Operations and Supply Chain Management Jan 21 2020 Gain a clear understanding of the fundamental concepts and applications behind today's operations and supply chain management with the reader-friendly approach in Collier/Evans' popular OPERATIONS AND SUPPLY CHAIN MANAGEMENT, 2E. The authors present detailed, solved problems throughout this edition to illustrate key formulas and computations as you learn to complete both manual and digital calculations using Excel spreadsheet templates and other Excel models for optimization and simulation. New content examines process analysis and resource utilization, analytics in OM, capacity measurement, applications of linear optimization and other critical operations management (OM) and supply chain management (SCM) topics. In addition, new and proven review questions, experiential activities, problems and exercises as well as feature boxes teach you how to work with the latest OM and SCM concepts and tools. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Elements of Style Dec 16 2019 The Elements of Style William Strunk concentrated on specific questions of usage—and the cultivation of good writing—with the recommendation "Make every word tell"; hence the 17th principle of composition is the simple instruction "Omit needless words." The book was also listed as one of the 100 best and most influential books written in English since 1923 by Time in its 2011 list.

EuroPloP 2009 Proceedings Oct 14 2019

Exhibiting Photography Sep 17 2022 You have the camera, you have the skills, and you have the pictures. Now what? Author Shirley Read expertly leads you through the work of exhibiting your photography one minute detail at a time. From finding a space and designing the exhibition to actually constructing a show and publicizing yourself, every aspect of exhibiting your photography is touched upon and clarified with ample detail, anecdotes, and real life case studies. In this new and expanded second edition, Shirley further illuminates the world of social networking, exhibiting, and selling photography online so your work is always shown in the best light. Packed with photos of internationally successful exhibitions, check lists, and invaluable advice, this essential reference guide will help amateur and professional photographers alike successfully showcase their bodies of work with confidence and finesse.

Performance Evaluation and Benchmarking Aug 23 2020 First established in August 1988,

the Transaction Processing Performance Council (TPC) has shaped the landscape of modern transaction processing and database benchmarks over two decades. Now, the world is in the midst of an extraordinary information explosion led by rapid growth in the use of the Internet and connected devices. Both user-generated data and enterprise data levels continue to grow exponentially. With substantial technological breakthroughs, Moore's law will continue for at least a decade, and the data storage capacities and data transfer speeds will continue to increase exponentially. These have challenged industry experts and researchers to develop innovative techniques to evaluate and benchmark hardware and software technologies. As a result, the TPC held its First Conference on Performance Evaluation and Benchmarking (TPCTC 2009) on August 24 in Lyon, France, in conjunction with the 35th International Conference on Very Large Data Bases (VLDB 2009). TPCTC 2009 provided industry experts and researchers with a forum to present and debate novel ideas and methodologies in performance evaluation, measurement and characterization for 2010 and beyond. This book contains the proceedings of this conference, including 16 papers and keynote papers from Michael Stonebraker and Karim Huppler.

Advances in Mergers and Acquisitions Nov 07 2021 This volume explores a range of issues that include: mergers waves, roll-up acquisitions, hostile takeovers, M&A experience, and decision-making, corporate governance, and innovation in mergers and acquisitions.

Modeling Decisions for Artificial Intelligence Dec 02 2021 This volume contains papers presented at the 2nd International Conference on Modeling Decisions for Artificial Intelligence (MDAI 2005), held in Tsukuba, Japan, July 25–27. This conference follows MDAI 2004 (held in Barcelona, Catalonia, Spain), the proceedings of which were also published in the LNAI series (Vol. 3131). The aim of this conference was to provide a forum for researchers to discuss about theory and tools for modeling decisions, as well as applications that encompass decision-making processes and information fusion techniques. In this second edition, special focus was given to applications related to risk, security and safety. The organizers received 118 papers, from 14 different countries, 40 of which are published in this volume. Each submission received at least two reviews from the Program Committee and a few external reviewers. We would like to express our gratitude to them for their work. The plenary talks presented at the conference are also included in this volume. The conference was supported by the Department of Risk Engineering of the University of Tsukuba, the Japan Society for Fuzzy Theory and Intelligent Informatics (SOFT), the Catalan Association for Artificial Intelligence (ACIA), the European Society for Fuzzy Logic and Technology (EUSFLAT) and the Generalitat de Catalunya (AGAUR 2004XT 0004).

Architecting A Knowledge-Based Platform for Design Engineering May 01 2021 "Design Engineering for Industry 4.0 (DE4.0) represents the 'human-cyber-physical view of the systems realization ecosystem "that is necessary to accommodate the drivers of Industry 4.0 (IoX) and provide an open ecosystem for the realization of complex systems. Seamless integration of digital threads and digital twins throughout the product design development and fulfillment lifecycle; the ability to accommodate diverse and rapidly

changing technologies; and the mechanisms to facilitate the creation of new opportunities for the design of products, processes, services, and systems are some of the desired characteristics of DE4.0." Jiao, R., Commuri, S. Panchal, J., Milisavljevic-Syed, J, Allen, J.K., Mistree, F. and Schaefer, D., "Design Engineering in the Age of Industry 4.0," ASME Journal of Mechanical Design, 143(7), 070801, 25 pages. In keeping with the Design Engineering 4.0 construct the authors describe architecting a computer platform to support human designers make decisions associated with the realization of complex engineered systems. The platform is designed to facilitate end-to-end digital integration, customization and personalization, agile collaboration networks, open innovation, co-creation and crowdsourcing, product servitization and anything-as-a-service. Recognizing that simulation models are abstractions of reality the authors opt for a satisficing strategy instead of an optimization strategy. They include fundamentals and then describe tools for architecting a knowledge-based platforms for decision support. Challenges associated with developing a computational platform for decision support for the realization of complex engineered systems in the context of Design Engineering 4.0 are identified. Constructs for formulating design decisions (e.g., selection, compromise, and coupled decisions), knowledge modelling schemes (e.g., ontologies and modular templates), diagrams for designing decision workflows (e.g., the PEI-X diagram), and some analytical methods for robust design under uncertainty are presented. The authors describe integrating the knowledge-based platform to architect a cloud-based platform for decision support promoting co-design and cloud-based design communication essential for mass collaboration and open innovation for Design Engineering 4.0. This book is a valuable resource for researchers, design engineers, and others working on pushing the boundaries of digitized manufacturing to include Design Engineering 4.0 principles in designing products, processes, and services.

Visual Informatics: Bridging Research and Practice November 19 2022 Visual informatics is a field of interest not just among the information technology and computer science community, but also other related fields such as engineering, medical and health informatics and education starting in the early 1990s. Recently, the field is gaining more attention from researchers and industry. It has become a multidisciplinary and transdisciplinary field related to research areas such as computer vision, visualization, information visualization, real-time image processing, medical image processing, image information retrieval, virtual reality, augmented reality, expressive visual mathematics, 3D graphics, multimedia-fusion, visual data mining, visual ontology, as well as services and visual culture. Various efforts have been invested in different research, but operationally many of these systems are not prominent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated. It is for this reason that the Visual Informatics Research Group from Universiti Kebangsaan Malaysia (UKM) decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world, namely, Asia, Europe, Oceania, and USA. The

first International Visual Informatics Conference (IVIC 2009) was conducted collaboratively, by the visual informatics research community from the various public and private institutions of higher learning in Malaysia, and hosted by UKM.

Online Course Management: Concepts, Methodologies, Tools, and Applications

2020 The rapid growth in online and virtual learning opportunities has created culturally diverse classes and corporate training sessions. Instruction for these learning opportunities must adjust to meet participant needs. *Online Course Management: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on the trends, techniques, and management of online and distance-learning environments and examines the benefits and challenges of these developments. Highlighting a range of pertinent topics, such as blended learning, social presence, and educational online games, this multi-volume book is ideally designed for administrators, developers, instructors, staff, technical support, and students actively involved in teaching in online learning environments.

The Great Mental Models: General Thinking Concepts Feb 22 2023 The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job - and get it done right. The same is true when it comes to your thinking. The quality of your outcomes depends on the mental models in your head. And most people are going through life with little more than a hammer. Until now. *The Great Mental Models: General Thinking Concepts* is the first book in *The Great Mental Models* series designed to upgrade your thinking with the best, most useful and powerful tools so you always have the right one on hand. This volume details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making, productivity, and how clearly you see the world. You will discover what forces govern the universe and how to focus your efforts so you can harness them to your advantage, rather than fight with them or worse yet- ignore them. Upgrade your mental toolbox and get the first volume today. AUTHOR BIOGRAPHY Farnam Street (FS) is one of the world's fastest growing websites, dedicated to helping our readers master the best of what other people have already figured out. We curate, examine and explore the timeless ideas and mental models that history's brightest minds have used to live lives of purpose. Our readers include students, teachers, CEOs, coaches, athletes, artists, leaders, followers, politicians and more. They're not defined by gender, age, income, or politics but rather by a shared passion for avoiding problems, making better decisions, and lifelong learning. AUTHOR HOME Ottawa, Ontario, Canada

Rough Sets in Knowledge Discovery Jul 203 2021 The papers on rough set theory and its applications placed in this volume present a wide spectrum of problems representative of the present stage of this theory. Researchers from many countries reveal their recent results on various aspects of rough sets. The papers are not confined only to mathematical theory but also include algorithmic aspects, applications and information about software designed for data analysis based on this theory. The volume contains also list of selected publications on rough sets which can be very useful to every one engaged in research

applications in this domain and sometimes perhaps unaware of results of other authors. The book shows that rough set theory is a vivid and vigorous domain with serious respect to its credit and bright perspective for future developments. It lays on the crossroads of fuzzy sets, theory of evidence, neural networks, Petri nets and many other branches of logic and mathematics. These diverse connections seem to be a very fertile feature of rough set theory and have essentially contributed to its wide and rapid expansion. It is worth mentioning that its philosophical roots stretch down from Leibniz, Frege and Russell up to Popper. Therefore many concepts dwelled on in rough set theory are not entirely new, nevertheless the theory can be viewed as an independent discipline on its rights. Rough set theory has found many interesting real life applications in medicine, banking, industry and others.

Neural Information Processing Jan 17 2020 The three-volume set of LNCS 11953, 11954 and 11955 constitutes the proceedings of the 26th International Conference on Neural Information Processing, ICONIP 2019, held in Sydney, Australia, in December 2019. The 173 full papers presented were carefully reviewed and selected from 645 submissions. The papers address the emerging topics of theoretical research, empirical studies, and applications of neural information processing techniques across different domains. The first volume, LNCS 11953, is organized in topical sections on adversarial networks and learning; convolutional neural networks; deep neural networks; feature learning and representation; human centred computing; human centred computing and medicine; hybrid models; and artificial intelligence and cybersecurity.

Decisions of the Commissioner of Patents and of the United States Courts in Patent, Trade-mark and Copyright Cases May 13 2022 "Compiled from Official gazette. Beginning with 1876, the volumes have included also decisions of United States courts, decisions of Secretary of Interior, opinions of Attorney-General, and important decisions of state courts in relation to patents, trade-marks, etc. 1869-94, not in Congressional set." Checklist of U. S. public documents, 1789-1909, p. 530.

Decisions of Commissioner of Patents and U.S. Courts in Patent and Trademark and Copyright Cases Jun 14 2022

Algebraic Structures of Neutrosophic Triplets, Neutrosophic Duplets, or Neutrosophic Multisets Dec 08 2021 Neutrosophy (1995) is a new branch of philosophy that studies triads of the form $\langle x, \text{neut}(x), \text{anti}(x) \rangle$, where x is an entity {i.e. element, concept, idea, theory, logical proposition, etc.}, $\text{neut}(x)$ is the opposite of x , and $\text{anti}(x)$ is the neutral (or indeterminate) between them, i.e., neither nor. Based on neutrosophy, the neutrosophic triplets were founded, which have a similar form $(x, \text{neut}(x), \text{anti}(x))$, that satisfy several axioms, for each element x in a given set. This collective book presents original research papers by many neutrosophic researchers from around the world, that report on the state-of-the-art and recent advancements of neutrosophic triplets, neutrosophic duplets, neutrosophic multisets and their algebraic structures – that have been defined recently in 2016 but have gained interest from world researchers. Connections between classical algebraic structures and neutrosophic triplet / duplet / multiset structures are also studied. And numerous neutrosophic applications in various fields, such as: multi-criteria decision making, image

[segmentation, medical diagnosis, fault diagnosis, clustering data, neutrosophic probability, human resource management, strategic planning, forecasting model, multi-granulation, supplier selection problems, typhoon disaster evaluation, skin lesion detection, mining algorithm for big data analysis, etc.](#)

[Encyclopedia of Decision Making and Decision Support Technologies 11 2022](#) As effective organizational decision making is a major factor in a company's success, a comprehensive account of current available research on the core concepts of the decision support agenda is in high demand by academicians and professionals. Through 110 authoritative contributions by over 160 of the world's leading experts the Encyclopedia of Decision Making and Decision Support Technologies presents a critical mass of research on the most up-to-date research on human and computer support of managerial decision making, including discussion on support of operational, tactical, and strategic decisions; human vs. computer system support structure, individual and group decision making, and multi-criteria decision making.

[Man-Machine Interactions 06 2021](#) This volume reflects a number of research streams on the development of computer systems and software that makes it possible to employ them in a variety of human activities ranging from logic studies and artificial intelligence, rule-based control of technological processes, image analysis, expert systems and decision support, to assistance in creative works. In particular, the volume points to a number of new advances in man-machine communication, interaction between visualization and modeling, rough granular computing in human-centric information processing and the discovery of affinities between perceptual granules. The topical subdivisions of this volume include human-computer interactions, decision support, rough fuzzy investigations, advances in classification methodology, pattern analysis and signal processing, computer vision and image analysis, advances in algorithmics, databases and data warehousing, and embedded system applications.

[Beyond Databases, Architectures and Structures. Advanced Technologies for Data Mining and Knowledge Discovery 04 2021](#) This book constitutes the refereed proceedings of the 12th International Conference entitled Beyond Databases, Architectures and Structures, BDAS 2016, held in Ustroń, Poland, in May/June 2016. It consists of 57 carefully reviewed papers selected from 152 submissions. The papers are organized in topical sections, namely artificial intelligence, data mining and knowledge discovery; architectures, structures and algorithms for efficient data processing; data warehousing and OLAP; natural language processing, ontologies and semantic Web; bioinformatics and biomedical data analysis; data processing tools; novel applications of database systems.

[Plan & Implement Projects with Success 19 2020](#) What the 3rd edition brings you: You support climate protection, receive compact information and checklists from experts (overview and press reviews in the book preview) as well as advice proven in practice, which leads step by step to success - also thanks to add-on. Because who wants to realize ideas and implement projects, there is no way around efficient project management. But every project consists of several tasks, which together lead to a common goal. These are subject to certain restrictions. These include, for example, the time, employees and

[resources required to complete the project. Therefore, there are numerous project tool and agile methods in project management that help to make projects a success. We give you the best possible help on the topics of career, finance, management, personnel work and life assistance. For this purpose, we gather in each book the best experts in their field as authors - detailed biographies in the book - , who give a comprehensive overview of the topic and additionally offer you success planner workbooks in printed form. Our guidebooks are aimed primarily at beginners. Readers who are looking for more in-depth information can get it for free as an add-on with individual content in German and English as desired. This concept is made possible by a particularly efficient, innovative digital process and Deep Learning, AI systems that use neural networks in translation. Moreover, we give at least 5 percent of our proceeds from book sales to social and sustainable projects. For example, we endow scholarships or support innovative ideas as well as climate protection initiatives and in some cases also receive government funding for them. With our translations from German into English we improve the quality of neural machine learning and thus contribute to international understanding. You can find out more on our website of our Berufebilder Yourweb Institute. Publisher Simone Janson is also a bestselling author as well as one of the 10 most important German bloggers according to the Blogger-Relevance-Index, furthermore she was a columnist and author of renowned media such as WELT, Wirtschaftswoche or ZEIT - more about her in Wikipedia.](#)

[Document Analysis Systems](#) Dec 28 2020 This book constitutes the refereed proceedings of the 5th International Workshop on Document Analysis Systems, DAS 2002, held in Princeton, NJ, USA in August 2002 with sponsorship from IAPR. The 44 revised full papers presented together with 14 short papers were carefully reviewed and selected for inclusion in the book. All current issues in document analysis systems are addressed. The papers are organized in topical sections on OCR features and systems, handwriting recognition, layout analysis, classifiers and learning, tables and forms, text extraction, indexing and retrieval, document engineering, and new applications.

[Algebraic Structures of Neutrosophic Triplets, Neutrosophic Duplets, or Neutrosophic Multisets, Volume 1](#) Jan 09 2022 Neutrosophy (1995) is a new branch of philosophy that studies triads of the form $(x, \text{neut}(x), \text{anti}(x))$, where x is an entity (i.e., element, concept, idea, theory, logical proposition, etc.), is the opposite of $\text{anti}(x)$ and $\text{neut}(x)$ is the neutral (or indeterminate) between them, i.e., neither x nor $\text{anti}(x)$. Based on neutrosophy, the neutrosophic triplets were founded; they have a similar form: $(x, \text{neut}(x), \text{anti}(x))$, that satisfy some axioms, for each element in a given set. This book contains the successful invited submissions to a special issue on Symmetry, reporting on state-of-the-art and recent advancements of neutrosophic triplets, neutrosophic duplets, neutrosophic multisets, and their algebraic structures—that have been defined recently in 2016, but have gained interest from world researchers, and several papers have been published in first rank international journals.

[Noise](#) Mar 31 2021 From the Nobel Prize-winning author of Thinking, Fast and Slow and the coauthor of Nudge, a revolutionary exploration of why people make bad judgments and how to make better ones—"a tour de force" (New York Times). Imagine that two doctors in the same city give different diagnoses to identical patients—or that two ju

[the same courthouse give markedly different sentences to people who have committed the same crime. Suppose that different interviewers at the same firm make different decisions about indistinguishable job applicants—or that when a company is handling customer complaints, the resolution depends on who happens to answer the phone. Now imagine the same doctor, the same judge, the same interviewer, or the same customer service representative makes different decisions depending on whether it is morning or afternoon, or Monday rather than Wednesday. These are examples of noise: variability in judgments that should be identical. In *Noise*, Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein show the detrimental effects of noise in many fields, including medicine, law, economic forecasting, forensic science, bail, child protection, strategy, performance reviews, and personnel selection. Wherever there is judgment, there is noise. Yet, most of the time, individuals and organizations alike are unaware of it. They neglect noise. With a few simple remedies, people can reduce both noise and bias, and so make far better decisions. Packed with original ideas, and offering the same kinds of research-based insights that made *Thinking, Fast and Slow* and *Nudge* groundbreaking New York Times bestsellers, *Noise* explains how and why humans are so susceptible to noise in judgment—and what we can do about it.](#)

[Advances in Biometric Identification](#)
Oct 26 2020 This book constitutes the refereed proceedings of the International Conference on Biometrics, ICB 2006, held in Hong Kong, China in January 2006. The book includes 104 revised full papers covering such areas of biometrics as face, fingerprint, iris, speech and signature, biometric fusion and performance evaluation, gait, keystrokes, and more. In addition the results of the Face Authentication Competition (FAC 2006) are also announced in this volume.

[Proceedings of the 6th CIRP-Sponsored International Conference on Digital Enterprise Technology](#)
Feb 27 2021 This Proceedings volume contains articles presented at the CIRP-Sponsored International Conference on Digital Enterprise Technology (DET2009) that takes place December 14–16, 2009 in Hong Kong. This is the 6th DET conference in the series and the first to be held in Asia. Professor Paul Maropoulos initiated, hosted and chaired the 1st International DET Conference held in 2002 at the University of Darmstadt. Since this inaugural first DET conference, the DET conference series has been successfully held in 2004 at Seattle, Washington USA, in 2006 at Setúbal Portugal, in 2007 at Bath England and in 2008 at Nantes France. The DET2009 conference continues to bring together international expertise from the academic and industrial fields, pushing forward the boundaries of research knowledge and best practice in digital enterprise technology for design and manufacturing, and logistics and supply chain management. Over 120 papers from over 10 countries have been accepted for presentation at DET2009 and inclusion in this Proceedings volume after stringent refereeing process. On behalf of the organizing program committees, the Editors are grateful to the many people who have made DET2009 possible: to the authors and presenters, especially the keynote speakers, to those who have diligently reviewed submissions, to members of the International Scientific Committee, Organizing Committee and Advisory Committee, and to colleagues for their hard work in sorting out all the arrangements. We would also like to extend our gratitude to DET2009 sponsors, co-organizers, and supporting organizations.

[Rough Set Methods and Applications](#) Nov 26 2020 [Rough set approach to reasoning under uncertainty is based on inducing knowledge representation from data under constraints expressed by discernibility or, more generally, similarity of objects. Knowledge derived from this approach consists of reducts, decision or association rules, dependencies, template classifiers. This monograph presents the state of the art of this area. The reader will find here a deep theoretical discussion of relevant notions and ideas as well as rich inventories of algorithmic and heuristic tools for knowledge discovery by rough set methods. An extensive bibliography will help the reader to get an acquaintance with this rapidly growing area of research.](#)

[Decide now! Make the Right Choice under Stress](#) Apr 19 2020 [What the 3rd edition brings you: You support climate protection, receive compact information and checklists from experts \(overview and press reviews in the book preview\) as well as advice proven in practice, which leads step by step to success - also thanks to add-on. Because it is always difficult to make good decisions when you have time to think and weigh up. But how do you make the right decision spontaneously and under stress and time pressure? How do you get all the necessary information in the shortest possible time to avoid wrong decisions? And how can you control intuitive decision-making processes in such a way that they are actually optimal and fact-based? This book gives answers to all questions and helps to make noticeably better decisions. We give you the best possible help on the topics of career, finance, management, personnel work and life assistance. For this purpose, we gather in each book the best experts in their field as authors - detailed biographies in each book - , who give a comprehensive overview of the topic and additionally offer you success planner workbooks in printed form. Our guidebooks are aimed primarily at beginners. Readers who are looking for more in-depth information can get it for free as an add-on with individual content in German and English as desired. This concept is made possible by a particularly efficient, innovative digital process and Deep Learning, AI systems that use neural networks in translation. Moreover, we give at least 5 percent of our proceeds from book sales to social and sustainable projects. For example, we endow scholarships to support innovative ideas as well as climate protection initiatives and in some cases also receive government funding for this. With our translations from German into English we improve the quality of neural machine learning and thus contribute to international understanding. You can find out more on the website of our Berufebilder Yourweb Institute. Publisher Simone Janson is also a bestselling author as well as one of the 100 most important German bloggers according to the Blogger-Relevance-Index, furthermore she was a columnist and author of renowned media such as WELT, Wirtschaftswoche or ZEITUNG - more about her in Wikipedia.](#)

[A Universal Template for Research Position and Life Experience](#) Aug 16 2022 [The self-descriptive title, A Universal Template For Research Position and Life Experience Papers, implies that there is a position that writers take in even the simplest of essays. Such a template provides an opportunity to accomplish two tasks at once: consider the definitive differences between Research, Position, and Experience papers, and explore the issues that impound and empower contemporary urban education. Dale Benjamin](#)

[Drakeford provides an interactive workshop to guide student writing on any social science subject. Agreeing with many scholars that public and free pedagogy is indispensable, the author also argues that there is no wrong or right in scholastic debate, only correct presentation of objective thoughts or non-objective attitudes. This the author says, is sometimes forgotten in the heat of getting ideas on paper. Hence, Template provides structure for planning papers, and in-process cues for staying on task to complete the with proper formality.](#)

[Software Architecture Knowledge Management April 2022](#) A software architecture manifests the major early design decisions, which determine the system's development, deployment and evolution. Thus, making better architectural decisions is one of the largest challenges in software engineering. Software architecture knowledge management is a capturing practical experience and translating it into generalized architectural knowledge and using this knowledge in the communication with stakeholders during all phases of software lifecycle. This book presents a concise description of knowledge management in the software architecture discipline. It explains the importance of sound knowledge management practices for improving software architecture processes and products, and makes clear the role of knowledge management in software architecture and software development processes. It presents many approaches that are in use in software computing today, approaches that have been used in other domains, and approaches under development in academia. After an initial introduction by the editors, the contributions are grouped in three parts on "Architecture Knowledge Management", "Strategies and Approaches for Managing Architectural Knowledge", and "Tools and Techniques for Managing Architectural Knowledge". The presentation aims at information technology and software engineering professionals, in particular software architects and software architecture researchers. For the industrial audience, the book gives a broad and concise understanding of the importance of knowledge management for improving software architecture process and building capabilities in designing and evaluating better architectures for their mission- and business-critical systems. For researchers, the book will help to understand the applications of various knowledge management approaches in an industrial setting and to identify research challenges and opportunities.
