This book offers a novel and parsimonious framework to help understand Hong Kong's lengthy democratic transition by analyzing the electoral dynamics of the city's competitive authoritarian political system, where pro-Beijing and pro-democracy parties have struggled to keep each other in check. The author demonstrates how a relatively liberal media environment has shaped the electoral incentives of the opposition and the pro-establishment elite differently, which has helped the latter improve its basis of electoral support. The political explanation the book puts forward seeks to shed new light on why many autocracies are interested in regularly holding elections that are considered somewhat competitive. This book will be of great interest not only to specialists in comparative studies of democratization, but also to all those concerned with Hong Kong's democratic transition. This book adopts an integrative research framework that primarily combines industrial and discourse analysis to investigate the company Milkyway Image, drawing upon literature that studies film studios and the practices of film production, distribution, and reception. The history of the Hong Kong-based film production company Milkyway Image from its founding in 1996 to the present exemplifies the metamorphosis of the post-return Hong Kong film industry to an era characterised by Hong Kongs integration into a Chinese national context and the transnationalisation of world cinema. It shows that contemporary Hong Kong cinema transition resists a monolithic chronicle and instead represents a narrative combining the perspectives of different interest groups and a complex process of compliance and resistance, negotiation and contestation. The meaning of Milkyways films shifts as they are circulated across cultures and viewed within diverse frameworks, and our understanding of Hong Kong cinema is subject to varying contexts and historical configurations. For researchers in film and media studies and those who have a general interest in Hong Kong cinema, Asian cinema, or contemporary film culture, this book reveals how a variety of industry and cultural bodies have become co-creators of meaning for a film production house, and how the company operates as a co-creator of the discourse that surrounds it. . This book introduces the concept of 'healthy healthcare' and posits that this new concept is necessary in light of a shortage of healthcare staff in the near future. Healthy healthcare implies that healthcare systems are designed, managed and financed in balance with the available resources to improve workers' health and performance. Ultimately, a balanced perspective taking

into account the patient, the staff and the complex healthcare system will lead to a more resource-efficient delivery of high-quality healthcare services. The book synthesizes evidence-based practice and research on the links between healthcare services, employee health and wellbeing, and quality of healthcare from an interdisciplinary perspective. Written by leading experts in this rapidly expanding field of inquiry, this is the first book ever compiled on the subject with such scope and breadth. It discusses how to conduct interventions and research on healthy healthcare with different populations and settings. The chapters critically examine the links between these pillars; and identify research gaps in both methodology and content from the perspectives of psychology, medicine, nursing, economy, law, technology, management and more. Featuring contributions from renowned scholars, A Companion to European Union Law and International Law presents a comprehensive and authoritative collection of essays that addresses all of the most important topics on European Union and international law. Integrates the fields of European Union law and international law, revealing both the similarities and differences Features contributions from renowned scholars in the fields of EU law and international law Covers a broad range of topical issues, including trade, institutional decision-making, the European Court of Justice, democracy, human rights, criminal law, the EMU, and many others How do states overcome problems of collective action in the face of human atrocities, terrorism and the threat of weapons of mass destruction? How does international burden-sharing in this context look like: between the rich and the poor; the big and the small? These are the questions Marina E. Henke addresses in her new book Constructing Allied Cooperation. Through qualitative and quantitative analysis of 80 multilateral military coalitions, Henke demonstrates that coalitions do not emerge naturally. Rather, pivotal states deliberately build them. They develop operational plans and bargain suitable third parties into the coalition, purposefully using their bilateral and multilateral diplomatic connections—what Henke terms diplomatic embeddedness—as a resource. As Constructing Allied Cooperation shows, these ties constitute an invaluable state capability to engage others in collective action: they are tools to construct cooperation. Pulling apart the strategy behind multilateral military coalition-building, Henke looks at the ramifications and side effects as well. As she notes, via these ties, pivotal states have access to private information on the deployment preferences of potential coalition participants. Moreover, they facilitate issue-linkages and side-payments and allow states to overcome problems of credible commitments. Finally, pivotal states can use common institutional contacts (IO officials) as cooperation brokers, and they can convert common institutional venues into fora for negotiating coalitions. The theory and evidence presented by Henke force us to revisit the conventional wisdom on how cooperation in multilateral military operations comes about. The author generates new insights with respect to who is most likely to join a given multilateral intervention, what factors influence the strength and capacity of individual coalitions, and what diplomacy and diplomatic ties are good for. Moreover, as the Trump administration promotes an "America First" policy and withdraws from international agreements and the United Kingdom completes Brexit, Constructing Allied Cooperation is an important reminder that international security cannot be delinked from more mundane forms of cooperation; multilateral military coalitions thrive or fail depending on the breadth and depth of existing social and diplomatic networks.
