This magisterial reflection on the history and destiny of the West compares Greco-Roman civilization and the Judeo-Christian tradition in order to understand what both unites and divides them. Mediation, understood as a collective, symbolic experience, gives society unity and meaning, putting human beings in contact with a universal object known as the world or reality. But unity has a price: the very force that enables peaceful coexistence also makes us prone to conflict. As a result, in order to find a common point of convergence—of at-one-ment—someone must be sacrificed. Sacrifice, then, is the historical pillar of mediation. It was endorsed in a cosmic-religious sense in antiquity and rejected for ethical reasons in modernity, where the Judeo-Christian tradition plays an intermediate role in condemning sacrificial violence as such, while accepting sacrifice as a voluntary act offered to save other human beings. Today, as we face the collapse of all shared mediations, this intermediating solution offers a way out of our moral and cultural plight. How did human beings acquire imaginations that can conjure up untrue possibilities? How did the Universe become self-aware? In *The Runes of Evolution*, Simon Conway Morris revitalizes the study of evolution from the perspective of convergence, providing us with compelling new evidence to support the mounting scientific view that the history of life is far more predictable than once thought. A leading evolutionary biologist at the University of Cambridge, Conway Morris came into international prominence for his work on the Cambrian explosion (especially fossils of the Burgess Shale) and evolutionary convergence, which is the process whereby organisms not closely related (not monophyletic), independently evolve similar traits as a result of having to adapt to similar environments or ecological niches. In *The Runes of Evolution*, he illustrates how the ubiquity of convergence hints at an underlying framework whereby many outcomes, not least brains and intelligence, are virtually guaranteed on any Earth-like planet. Conway Morris also emphasizes how much of the complexity of advanced biological systems is inherent in microbial forms. By casting a wider net, *The Runes of Evolution* explores many neglected evolutionary questions. Some are remarkably general. Why, for example, are convergences such as parasitism, carnivory, and nitrogen fixation in plants concentrated in particular taxonomic hot spots? Why do certain groups have a particular propensity to evolve toward particular states? Some questions lead to unexpected evolutionary insights: If bees sleep (as they do), do they dream? Why is that insect copulating with an orchid? Why have sponges evolved a system of fiber optics? What do mantis shrimps and submarines have in common? If dinosaurs had not gone extinct what would have happened next? Will a saber-toothed cat ever re-evolve? Cona Morris observes: "Even amongst the mammals, let alone the entire tree of life, humans represent one minute twig of a vast (and largely fossilized) arborescence. Every living species is a linear descendant of an immense string of now-vanished ancestors, but evolution itself is the very reverse of linear. Rather it is endlessly exploratory, probing the vast spaces of biological hyperspace. Indeed this book is a celebration of how our world is (and was) populated by a riot of forms, a coruscating tapestry of life." *The Runes of Evolution* is the most definitive synthesis of evolutionary convergence to be published to date. " ... Following the footsteps of *The Elijah Task* and *The Eternal Church*, *Following the Cloud* presents a prophetic vision of the convergence of Science, the World, and the Church which reveals the Hand of God in all Creation." --Page 4 of cover; approximately mid page A scientist and author combines scientific research and biblical study to present a new paradigm of how to understand God. In the last hundred and fifty years the kingdom of God has emerged as one of the most important topics in theology, New Testament studies, and the life of the church. But what exactly is the kingdom of God? What does it mean for the people of God and what does it mean for how they live in the world? In *The Kingdom of God*, part of the *Biblical Theology for Life* series, Nicholas Perrin explores this dominant biblical metaphor, one that is paradoxically the meta-center and the mystery in Jesus' proclamation. After survey interpretations by figures from Ritschl to N. T. Wright, Perrin examines the "what, who, and how" questions of the kingdom. In his sweepingly comprehensive study, Perrin contends that the kingdom is inaugurated in Jesus' earthly ministry, but its final development awaits later events in history. In between the times, however, the people of God are called to participate in the reign of God by living out the distinctly kingdom-ethic through hope, forgiveness, love, and prayer. X Are you ready for the Grand Finale *The Ultimate Convergence*? Convergence has been a hot buzz-word in Kingdom streams for the past few years. Ben Peters believes that God is

preparing for the greatest convergence of natural and spiritual elements of all time, in preparation for His great harvest and the coming back to earth of His Beloved Son, Jesus Christ. Whenever God chose to inhabit an earthly dwelling place, He made significant preparations for His coming, giving detailed specifications for each chosen habitation, including the style of building, the style of worship, the financing of the structure and the way He manifested His presence. In *The Ultimate Convergence*, you will discover what can if a substantial number of these characteristics converged on the earth. "This is a book that will help launch you into the future. In it, Ben Peters gives us a fascinating look at the movement of the hand of God from the Garden of Eden until the present day. I agree that *The Ultimate Convergence* is imminent and I am excited with all that God is poised to do. You will love this book!" C. Peter Wagner, Apostolic Ambassador, Global Spheres, Inc. Examines atheism as a modern intellectual achievement that has motivated individuals to pursue invention and self-reliance, citing the accomplishments of secular philosophers, scientists, and artists who have worked in the absence of religious belief. *Convergence* has its finger on the pulse of the new move of God expected to sweep through the world any moment now. This book highlights a natural wonder in the sky, prophesied in the middle of Revelation about to align fully in God's perfect timing during the Jewish feast days this fall. The Revelation 12 sign also converges with rapture implications and expectations. *Convergence* exposes newly revealed details concerning the global demonic agenda. Darkness doesn't stand a chance. Jesus, with His Bride, will usher in the Father's Kingdom with a power we have never seen before, also known as the new thing, the awakening. All of these events are prophesied in the Song of Solomon which serves as an end-time guide to assist the Bride in her preparation for these exciting times. There is too much lining up already with the sign alone, never mind the current political, social and economic climate, not to explore what *Convergence* has to say about this imminent move of God. Everyone knows it is close but most prophetic headlines call for a more typical move of God, which would not be new. God is doing a new thing! You do not want to miss out! **WAKE UP! The 21 essays revolve around four different areas: I. New Testament Studies II. Vatican I, Vatican II, and Catholic Theology III. Fundamental Theology and Spirituality IV. Resurrection and Christology The rapid growth of the early church was the result of men and women being gripped by a vision. They were living witnesses to the Lordship of Jesus Christ and their lives were the result of celebrating Him. In order to mobilize others, we need to bring them into an encounter with God so they can bear witness of Him with an unshakable conviction. That is the key to making the good news a viral movement. The purpose of this book is not academic or theoretical. The object is to focus our attention on God's purpose for our lives and learn from Him how He wills to use our time on this planet. The stakes are high and God is calling ordinary people into an extraordinary plan. "We know that we are of God, and the whole world lies under the sway of the wicked one." 1 John 5:19 The threads of fate converge, mysteries unfold, and the clan's future is forever altered in the least expected way. **A RESEARCH PROJECT AND A DOCUMENTARY BOOK ON SCIENCE AND RELIGION OF 2015.** Do you have desires for your life—things you want to happen? If you do, and most people do, are they realistic, or do they seem just way too out there to ever materialize? But who's to say what's real or too farfetched to come true? You might be surprised by what God has in store for you. Author John Phillip Moore knows about dreams, desires, and working through ideas. And he knows about God's extraordinary role in their realization. In his book, *Convergence: The Spirit-led Journey*, he uses his experiences alongside those of others to show how God provides us all with glimpses into what lies ahead for us. Each chapter takes readers on an adventure into different aspects of people's Christian experiences. You will work through twelve spiritual considerations of your life and in that process interpret much more of God's desire for your life. Readers will also discover the importance of visions, dreams, ideas, and patterns, which form various aspects of God's unveiling will in your life. This guide book deals with seeds planted in the heart, unearths nurturing principles, and then promotes action for the sojourner. "Convergence"...the word best describes how John Moore loves living life. John's life has been one unique assignment after another, all of them "converging" together to play out God's plan. This is a great read! You'll relate to it, learn from it and be challenged to live it out. —Mark Evans Senior Pastor, The Church at Rock Creek, Little Rock Arkansas Must religions be locked houses, or could they be cherished but welcoming gardens? Judith Bruder discovered a different garden, Catholicism, yet still cherished the one where she grew, Judaism. At this time in history, can we allow such choice? **CONVERGENCE** is the story of a woman called by God, and her spiritual journey from the

country of her birth to another land. It is about crossing boundaries and making choices, and it affirms the right and responsibility that each of us has to define our life for ourselves, as ourselves. A woman drawn to God through the mystery and adventure of faith, Judith Bruder is a story teller who ends up living her own wonder-filled story. This book of stories--about growing up in Brooklyn during World War Two, about watching a War between Men and Women staged by ill-matched parents, about being a woman in a sexist society--is ultimately a love story, about the love for God and the love of God, and how its grace transformed one woman's life. Gerald Schroeder, an MIT-trained scientist who has worked in both physics and biology, has emerged in recent years as one of the most popular and accessible apostles for the melding of science and religion. He first reconciled science and faith as different perspectives on a single whole in *The Science of God*. Now, in *The Hidden Face of God*, Schroeder takes a bold step forward, to show that science, properly understood, provides positive reasons for faith. Recent research in biology, chemistry, physics, and neuroscience contains unmistakable hints about the ultimate nature of reality. Simply put, we now know not only that behind matter lies energy, but also that behind energy lies wisdom. Scientists have touched on this wisdom in the laboratory, and its implications are awesome. From the wisdom encoded in DNA and analyzed by information science, to the wisdom unveiled in the fantastic complexity of cellular life, to the wisdom inherent in human consciousness, *The Hidden Face of God* offers a tour of the best of modern science. Schroeder makes no attempt to "prove" the existence of God. Yet his interpretations of the work of his fellow scientists touch on life's ultimate mysteries. His wise observations on the organization of organic life, on the power of humans to make sense of their sensory inputs, and on the complexities of the code of DNA all show that life has a direction and purpose that cannot be explained in purely physical terms. Throughout, he addresses three great themes: the question of first causes (i.e., where do the laws of nature come from?); the inseparability of mind and matter; and the philosophical problem of design. To believe that a designer must have been involved, he reminds us, we need not insist on perfection or on our view of perfection in the design. *The Hidden Face of God* will open a world of science to religious believers, and it will cause skeptics to rethink some of their deepest beliefs. Philosophy and theology are important concepts for Christians. This important work identifies how philosophy shapes theology, while also addressing various philosophical issues that arise within the Bible and theology. The hope is that this book will catapult the reader into critical thinking, while creating an appetite and appreciation for these separate yet similar disciplines. Provides a detailed exegetically based study of Biblical theology, showing the canonical basis for later historical, systematic, and dogmatic theologies. Many of us Christians and Ministry leaders think that much of what Jesus did on earth was because He was God. When we think this, we neglect Scripture where it tells us that Jesus, though always God, deliberately chose to limit His divine attributes and power. Jon Thompson, pastor and theologian, looks at Jesus' life and ministry asking the question of, "If Jesus chose to limit His divine attributes and power, how did He do all of this?" Jon discovers that Jesus is the ultimate example for us demonstrating the Convergence of three things: 1. Jesus used spiritual disciplines to walk with the Father, and develop and learn as we do: "Jesus grew in wisdom and stature and in favor with God and man" (Luke 2:52). 2. Jesus also used spiritual gifts (not His inherent power) to actually carry out His ministry while on earth. And, 3. Jesus used the promptings He received from the Father and the Spirit to lead His disciples into moments of revival. As you read this book, you will come to realize that Jesus, as God come in flesh, isn't just our Savior and our Lord, He is also our model for Christian life and ministry. Through the convergence of spiritual disciplines, spiritual gifts, and spiritual experiences, Jesus demonstrates for us how we, and our local churches, can hear from the father, carry out our ministry, and lead people into revival. Convergence shows how Jesus, though always God, deliberately chose to limit His divine attributes and power in order not only to show us who God is, but also to demonstrate for us what the normal Christian life should look like. For the readers of *The Language of God*, another instant classic from "a sophisticated and original scholar" (Kirkus Reviews) that disputes the idea that science is contrary to religion. In *The Science of God*, distinguished physicist and Biblical scholar Gerald L. Schroeder demonstrates the surprising parallels between a variety of Biblical teachings and the findings of biochemists, paleontologists, astrophysicists, and quantum physicists. In a brilliant and wide-ranging discussion of key topics that have divided science and religion—free will, the development of the universe, the origin of life, and the origin of man—Schroeder argues that the latest science and a close reading of the Bible are not just compatible but interdependent. This timely reissue of *The Science of God* features a brand-new preface by Schroeder and a compelling appendix that addresses the highly publicized experiment in 2008 in which scientists attempted to re-create the chemical composition of the cosmos immediately after the Big Bang. It also details Schroeder's lucid explanations of complex scientific and religious concepts, such as the theory of relativity, the passage of time, and the definitions of crucial Hebrew words in the Bible. Religious skeptics, Biblical literalists, scientists, students, and physicists alike will be riveted by Schroeder's remarkable contribution to the raging debate between science and religion. What in the world happened in 1844? Followers of William Miller and the Millerite movement expected the Advent, the Second Coming of Jesus, in 1844. When the Advent did not happen as expected, the Great Disappointment ensued. Miller was wrong. But was he? Did the spirit of Christ return in 1844 in the Middle East? The dawn of God's Prophets of today's major religions had all arisen in the East. After the Great

Disappointment, the Millerite movement splintered into many Adventist sects, and the history of the three remaining today—the Advent Christian Church, the Church of God (Seventh-day), and the Seventh-day Adventist Church—is given. In the East, the year 1844 saw the emergence of the Báb, the Herald of Bahá'u'lláh, and the Bábí movement, and then the emergence of Bahá'u'lláh, the Prophet of the Baha'i Faith. These events are likewise presented. Miller followed biblical guidance as best he could, and he may well have been part of God's plan in the nineteenth century. Miller and other Adventist Bible scholars did accurately pinpoint the year 1844, but events unfolded a world away in Persia and they had no inkling of them. Today the world suffers increasingly from the divisive forces of strife and intolerance, armed with strident ideologies and weapons that could kill countless millions of people. What is the destiny of our global civilization? Has divine light once again risen from the East for our day? Explore the prophecies of Daniel and follow the events in nineteenth century East and West to an amazing conclusion that will affect everyone. This book is about the Convergence of the Generation within the Body of Christ. God has given you something to birth within the Millennial Generation, it may be time to pull an Ezekiel and speak to those dry bones. It may be time to pull an Elijah and raise it from the dead. It may be time to walk away from the Ishmael. Refuse to abort and just reposition the Next Generation to receive what God intended all along. They could just be in the wrong place or in the wrong time or with the wrong people. Have them listen to the Lord. These Millennials will become such great voices in our history, but will not come without some form of rejection. It is noteworthy that the great voices in history and those whose perspective proved true were almost always rejected by the majority, and often stood completely alone. We see this with the first apostles. Even so, if we know we are sent by God and that we have received our message from Him, then it really does not matter what men think about us. As Paul said, "If I [were] still [seeking to please] men, I would not be a bondservant of Christ" (see Galatians 1:10). Just the mentality of seeking our approval or encouragement from men can be the biggest stumbling block that keep a generation from being true messengers. Paul understood this well. When his apostolic authority was challenged, he pointed to his afflictions and persecutions as evidence that he was indeed an apostle. How different is that from most who claim to be apostles, prophets, evangelist, pastors or teachers, today? The Sons of thunder are the manifest sons/daughters of this Next Generation of God that are becoming visible within every city, every nation and every region. These are the one's God has hidden in plain view. Although the Church may not recognize them, they are visible to God in heaven and feared by demons in hell. This generation of Millennials will be known by the light that shines in their eyes, the love that exudes from their heart, and the fruit of their lips that will minister the Word of reconciliation (2 Corinthians 5:19). Not content with religious practices or agendas, their desire is for His fellowship and reaching, building and bringing together the Generational Bridge of the generation into a Convergence of the Ages. Sam Storms contends that nothing is more important than the CONVERGENCE of Word and Spirit, mind and affection, principle and passion in the life of the Christian and the Church. In this book he demonstrates from his own life and preeminently from Scripture itself how one can embrace both the centrality of the written Word and the charismatic power of the Holy Spirit. This volume of primary sources brings together letters, memoirs, petitions, tracts, and stories related to religion and reform around the globe from the fifteenth through the eighteenth centuries. The common subject of the sources is the Reformation, and these texts demonstrate the themes and impacts of religious reform in Europe and around the globe. Scholars once framed the Reformation as a sixteenth-century European dispute between Protestant and Catholic churches and states, but now look expansively at connections and entanglements between different confessions, faiths, time periods, and geographical areas. The Reformation coincided with Europeans' expanding reach across the globe as traders, settlers, and colonists, but the role that religion played in this drive has yet to be fully explored. These readings highlight these reformers' engagements with Judaism, Islam, Buddhism, and indigenous spirituality, and the entanglement of Christian reform with colonialism, trade, enslavement, and racism. Offering a sustained, comparative, and interdisciplinary exploration of religious transformations in the early modern world, this collection of primary sources is invaluable to both undergraduate and postgraduate students working on theology, the Reformation, and early modern society. Are you not the 'same internal person' throughout your life? Of course you are! Considering that, you will be the same 'unaltered being' until death. If so, who are you? The answer is: "I am the I-ness in me." If this 'I-ness' in you is a steady factor, what will your status be when you leave the physical body? Convergence is a book of factual findings based on scientific data that supports man's continuity after death. Learning about the 'I-ness' factor in us, will benefit our daily lives too. Through awareness, such knowledge will generate calmness, tranquility and peace in your internal world — the unsteady monkey mind. It will also empower you to deal with the tribulations of daily life. What about reincarnation? Is there any truth to this popular belief? Grab a copy and welcome a new perspective to your life and beliefs! Understanding Who the Holy Spirit is and how He impacts a person's life. Originally published in Great Britain in 2016 with different subtitle: Convergence: the deepest idea in the universe. A psychology paralyzed by fear. A mother propelled by love. A stalker bent on destruction. Psychology professor Dr. Denilyn Rossi contends that the past is

either a shadow that haunts us or a force that propels us. The choice is ours, she tells her students. What she doesn't tell them is that her own past is a shadow she can't seem to shake. Fear has immobilized her and is taking a costly toll. Adelia Sanchez, however, has embraced Dr. Rossi's teaching. She is ready to confront fear and render it powerless—using the trauma of her past to propel her to entrap the man who stalked and brutally attacked her. As Denilyn's past and Adelia's present converge at the Kaweah River, a dangerous man bent on destruction threatens them both. Will he uncover the secret Deni and Adelia have fought so hard to protect? The darkness that will come upon the people of God at the beginning of the day of the Lord shall not be the same as the affliction that came upon her when Jesus came the first time. The end of the age of grace will not be as dark as the end of the age of the law because the [Gentile] people that walked in darkness have seen a great light; those that dwell in the land of the shadow of death, upon them has the light shined. Yes, it's true that great apostasy has engulfed much of Western Europe and seems to be making quite a bit of headway in North America. But what about places (to name a few) such as China, Iran, Egypt, Venezuela, Cuba, Brazil, Colombia, Africa, and even India, where the gospel is surging? Most of the end-time harvest is taking place under great adversity and persecution. So, for now it can be said, As thou hast multiplied the nation [the people of God], thou hast not increased the joy. But the day of the Lord will be the biggest game-changer ever seen in human history. For those among the people of God who have clean hearts when Jesus returns, They shall rejoice before thee as they rejoice in the harvest and as men rejoice when they divide the spoil, even as all the kingdoms of this world crumble and come down. The vision of Isaiah is a prophetic hub placed in the middle of the Scriptures with ties to almost every book in the Bible (most are footnoted in this work). There are living parables of events that actually happened during the lifetime of Isaiah, prophecies regarding Judah and Jerusalem with both a near and a far fulfillment, all interwoven with messianic prophecy depicting events surrounding the first and second comings of Jesus Christ, the final judgment, and the new creation with new heavens and a new earth. A central theme of Isaiah relates to the day of the LORD (as does the book of Revelation). We know there is a special blessing on the seventh day (Genesis 2:3). Scripture also defines what some call a "prophetic day" mentioned in both the unique Psalm attributed to Moses: For a thousand years in thy sight are but as yesterday when it is past and as a watch in the night (Psalm 90:4), and by Simon Peter: But, beloved, be not ignorant of this one thing, that one day before the Lord is as a thousand years, and a thousand years are as one day (2 Peter 3:8). Human history has now entered into the beginning of the seventh millennium since the creation of Adam, according to the years and generations meticulously recorded in Scripture. There is, however, the possibility of two distinct timelines — one dating from the creation of Adam and the other dating from the fall of man when the present world system founded on lies devised by Satan began. Scripture does not specify exactly when the curse was pronounced, and Adam and Eve were expelled from the Garden of Eden. The original world created by God (and founded on truth) was pronounced "very good." It's clear, however, that Satan subverted the authority God had placed on Adam, and this sorry situation will not be corrected until the day of the Lord (the seventh millennium). We now appear to be in an ambiguous period in which it's clear (no matter what relatively minor discrepancies there may be in our calendar) that more than six thousand years have passed since the creation of Adam. However, it does not appear that six thousand years have gone by since the fall of man. If the seventh prophetic day begins with the demise of Satan and the promise he will be bound for a thousand years, the first resurrection of those who will reign and rule with Christ for a thousand years, and the return of Jesus Christ, then it's also clear that the prophesied day of the LORD has not yet begun — although it may be very close. This is when religion that has been contaminated by man (by humanism) and manipulated by the devil will all come down. The pure and undefiled religion before God and the Father is this, To visit the fatherless and widows in their tribulation and to keep thyself unspotted by the world (James 1:27). As we enter the end-time events described by Isaiah, it's good to keep in mind that there is a substantial godly remnant containing true ministers (servants) of God who, like Isaiah, have been cleansed by the fire of God and commissioned from the throne, and who have authority to represent God according to his will. They desire to see the people entrusted to their care joined to the Lord Jesus, so that all of God's people may have intimate communion with him and with the Father, by the Holy Spirit. This is the only covering that will provide secure protection. How much time do we have left? I think we probably do have a little time, but not a lot. The world situation around us is not improving. It is, in fact, degenerating rapidly (even though some countries are experiencing spiritual revival). We can expect things to continue to polarize as the bride of Christ is cleansed and purified and as Babylon the Great continues to degenerate. The evil in the world will soon pass a threshold that will trigger the indignation and wrath of God the Father, and Jesus will soon return for a bride without spot or wrinkle or any such thing. These two things seem to happen in very close succession on the day of the Lord. There are other prophetic markers that may bear watching. The two thousandth anniversaries of the beginning of the ministry of Jesus, of his death and resurrection, of the outpouring of the Holy Spirit on the day of Pentecost, and of the destruction of Jerusalem and the temple are all coming up within what many of us can expect to be our lifetime. Even if the coming of the Lord should be delayed (so that more people can be given the opportunity to be saved), we are told to always be ready. None of us knows when our own death will take place and when we could be suddenly thrust into the presence of God. Russell M. Stendal December 17, 2020 Bogotá,

Colombia The Eucharist goes back to the Last Supper of Jesus with his disciples. It is based on the prayer of thanksgiving that Jesus pronounced over the bread and wine at that meal. "Eucharist" means thanksgiving, praise and blessing. The Church celebrates the Eucharist as a memorial of the death and Resurrection of Jesus Christ. The memorial of the Eucharist is more than a remembrance of the Last Supper of Jesus with his disciples. In the Eucharist the sacrifice of our redemption becomes present sacramentally. In the past, dogmatic theology has treated the meaning of the Eucharist while disregarding the form of its liturgical celebration, whereas liturgical studies have been content with the latter. Yet the two cannot be separated, however, any more than liturgy and dogma or pastoral practice and doctrine can. For the Church's liturgy is not about something external to Christian revelation, but rather about "revelation accepted in faith and prayer" (Joseph Ratzinger). In this work Helmut Hoping combines the approaches of dogmatic theology and liturgy while examining the Eucharist from an historical and systematic perspective. The second German edition of this major work, which this new English translation is taken from, was revised and expanded, adding a comparative analysis of the Second Eucharistic Prayer and a chapter on the theology of the words of institution. We are at the dawn of something spectacular: cutting-edge discoveries are rewriting the boundaries between modern science and ancient spirituality. There is a clear convergence that demonstrates spiritual abilities and the divine are Real. Ancient teachers and yogis millennia ago taught us the art of living in the present moment; connecting with our higher selves; feeling the interconnectedness of the whole universe; bonding with all people; and developing stillness and mindfulness to heal our body and spirit. Today, all these skills have proven beneficial to millions of people. Moreover, ancient philosophical parallels with modern discoveries in consciousness studies, quantum non-locality, and inseparability have been known since the seventies. Now, after two decades of pioneering discoveries in science, breathtaking and observable parallels with our world and universe are also emerging. This makes sense. If the ancients genuinely experienced the philosophy, they should also have known our world and universe, too. And here's the amazing evidence. An extraordinary new porthole into their ancient beliefs has opened. They are not generalized, stretched, or speculative. They are specific and objective. Anyone - theist, agnostic, skeptic, and atheist - all can easily verify. And you don't require a background in science to do so. The findings are meticulous and many have appeared in mainstream, peer-reviewed scientific journals. Also remarkable, new studies reveal a possible ancient connection between Yoga and the Bible. About Convergence Many of us Christians and Ministry leaders think that much of what Jesus did on earth was because He was God. When we think this, we neglect Scripture where it tells us that Jesus, though always God, deliberately chose to limit His divine attributes and power. Jon Thompson, pastor and theologian, looks at Jesus' life and ministry asking the question of, "If Jesus chose to limit His divine attributes and power, how did He do all of this?" Jon discovers that Jesus is the ultimate example for us demonstrating the Convergence of three things: 1. Jesus used spiritual disciplines to walk with the Father, and develop and learn as we do: "Jesus grew in wisdom and stature and in favor with God and man" (Luke 2:52). 2. Jesus also used spiritual gifts (not His inherent power) to actually carry out His ministry while on earth. And, 3. Jesus used the promptings He received from the Father and the Spirit to lead His disciples into moments of revival. As you read this book, you will come to realize that Jesus, as God come in flesh, isn't just our Savior and our Lord. He is also our model for Christian life and ministry. Through the convergence of spiritual disciplines, spiritual gifts, and spiritual experiences, Jesus demonstrates for us how we, and our local churches, can hear from the father, carry out our ministry, and lead people into revival. Convergence shows how Jesus, though always God, deliberately chose to limit His divine attributes and power in order not only to show us who God is, but also to demonstrate for us what the normal Christian life should look like. Sam Storms demonstrates from Scripture and his own spiritual journey how the convergence of Word and Spirit, of principle and passion, is not only desirable but essential for the life and growth of the kingdom of God.
