Even though Ricky was just a small riding mower, he would sit in the Hardware Store and dream of doing something great like the larger Tractors in his family. But when a kind gentleman finally purchased him, Ricky was disappointed to learn what his new job would be. Ricky didn't think his work was very important at all, and he just knew that the Lord had bigger, more important things for him to do. But when the chance finally came to do something great, Ricky learned that the Lord had never designed him to do the things he had dreamed of doing. Read along and follow the adventures of Ricky as he discovers what makes him the happiest, and as he learns what his real purpose is! The idea of this study came one day while I was riding on a riding lawn mower, mowing our yard. I use the time I ride to pray. This one particular day I was thanking God for teaching me so much about things I believe each person struggles with. I asked him if I was to write about what he has taught me what would be the title, right then, He gave me this title. HEALTHY In the flesh WEATHY In love WISE In the word I was thrilled! But I wanted more than to share my life. I wanted the Holy Spirit to have the opportunity to teach each individual the truth for themselves. That's when God through the Holy Spirit directed me to make this a bible study. I have lead ladies bible studies before, and I've seen women purchase bible studies, and never complete them. So again I prayed and believe God said, keep it simple and short. I pray you will be blessed. The N.I.V. version is recommended. "Ted Steinberg proves once again that he is a master storyteller as well as our foremost environmental historian."—Mike Davis The rise of the perfect lawn represents one of the most profound transformations in the history of the American landscape. American Green, Ted Steinberg's witty exposé of this bizarre phenomenon, traces the history of the lawn from its explosion in the postwar suburban community of Levittown to the present love affair with turf colorants, leaf blowers, and riding mowers. First invented in 1830, the early lawn mower was hampered by the inadequacy of materials and machine tools available and its development and speed did not pick up until the introduction of chains and small lightweight petrol engines. This book traces the progress of the lawn mower from the early hand or animal powered mowers, through to steam, petrol and electric-powered modern machines. Age 2-6 Boys & Girls. This illustrated children's book is for all the little boys and girls that love lawn mowers. You'll encounter a riding mower, a push mower, an old-fashioned reel mower, and the most modern and colorful mower out there. In this delightful spin on a beloved classic, a little ball gets stuck in the tall grass. After asking several lawn mowers to help the ball, a green electric mower agrees to help. Even though he is small and not the toughest model, the kind mower tries his best to cut his way through the thick grass to get to the little ball. Bits of facts about each type of lawn mower have been beautifully woven into the story, providing little gardening-tool enthusiasts with a story that lets their love for mowers come to life. "This is the summer that Zander had his first big mystery to solve. Every Wednesday afternoon, Grandpa took Grandma to the grocery store to buy food for the week." ... "But this Wednesday would turn out a little different than any other Wednesday before. When they arrived back at home, they noticed that the front yard had been mowed. Grandpa always mowed the lawn on Thursdays. They all got out of the truck and helped Grandma bring in the groceries before Grandpa would sit back in his recliner chair to finish reading his daily newspaper and rest up from the shopping trip. Zander went out the front door to look at the mowed grass. The mowed grass puzzled him. His detective mind went to work. He came back inside to get his detective hat, magnifying glass, and detective notepad and pencil that Grandma had bought him a few months before. He dashed back out the front again and started observing his surroundings. The first thing he noticed was that the grass was cut much shorter and there were no grass shavings on the ground."
