Anatomy & Physiology May 17 2022 Anatomy & Physiology , Fourth Edition answers the demand for a leaner version of Elaine Marieb and Katja Hoehn's top-selling Human Anatomy & Physiology. This streamlined text has removed coverage of pregnancy, heredity, and the developmental aspects of various body systems, while keeping basic themes such as homeostatic imbalances strategically in place. Marieb draws on her career as an A&P professor and her experience as a part-time nursing student, while Hoehn relies on her medical education and classroom experience to explain concepts and processes in a meaningful and memorable way. The most significant revision to date, the Fourth Edition makes it easier for you to learn key concepts in A&P. The new edition features a whole new art program that is not only more visually dynamic and vibrant than in previous editions

but is also much more pedagogically effective for today's students, including new Focus figures, which guide you through the toughest concepts in A&P. The book has been edited to make it easier than ever to study from and navigate, with integrated objectives, new concept check questions, and a new design program. Note: This is the standalone book if you want the book/CD order the ISBN below 0321615875 / 9780321615879 Anatomy & Physiology with Interactive Physiology 10-System Suite Package consists of 0321616405 / 9780321616401 Anatomy & Physiology 0805361170 / 9780805361179 Interactive Physiology 10-System Suite CD-ROM 080537373X / 9780805373738 Brief Atlas of the Human Body, A

Physiology Coloring Workbook Aug 20 2022 Physiology Coloring Workbook is a breakthrough approach to learning and remembering the body's processes. Written and illustrated by experts who are both research scientists and teachers, it features 250 striking, original illustrations that will give students a clear and enduring understanding of physiology. Learning interactively, through coloring, thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks. Physiological processes are fully explained, and complex subjects are approached through the gradual introduction of simple drawings. The authors employ a logical and consistent use of color to convey information; for example, arterial blood is always red, whereas venous blood is blue, and capillary blood is violet. Each lesson includes clearly displayed labels and specific coloring instructions. This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology, biology, nursing, physical therapy and rehabilitation, medical technology, nutrition, physical education, allied health and health sciences. The 250 plates in the book are organized in the following sections: Homeostasis The Cell Transport Mechanisms Nervous System Muscle Cardiovascular System Renal System Respiratory System Gastrointestinal System Metabolism Endocrine System Reproduction
