Tax-Advantaged Wealth Aug 22 2020 Grow your wealth with NO taxes or commissions. Use 10 mutual funds that have earned over 10%. Use a special tax haven for your earnings and gains. "My wealth has come from a combination of living in America, some lucky genes, and compound interest." Warren Buffett, billionaire investor. He pays only 17% total tax on his income:

<http://www.youtube.com/watch?v=Cu5B-2LoC4s>. Many wealthy people pay less than we do. How can that be? No matter how much we earn, it is better to

pay NO taxes and NO commissions so our money can compound at over 10% per year. Compounding high investment earnings is “the most powerful force in the universe.” Compounding is money earning money on its earnings over time. Simple but powerful and no tax. When you invest \$250 a month, \$3,000 a year, in successful businesses, you earn more than a bank CD. After 10 years, you have more than the \$30,000 because the businesses paid dividends and the market bid up the value of your shares of the businesses. See chart below. After 20 years, you could have over \$200,000 and after 40 years, over \$2,000,000. Over time, stocks of growing businesses are the safest investment. Compounding is key.

Only 2.5% of the Street's "professionals," who hand-pick a bunch of stocks (a mutual fund), are successful over time. Your funds with "that little 2 percent fee will erode 63 percent of what you would have had," according to John Bogle. Accumulating wealth requires that you avoid high fees, commissions, loads and taxes-the Wealth Killers. If your high-fee 401k has no match, you may double your nest egg by using low-fee tax-FREE account. We avoid fees by buying ONLY the financial services we need at a discount. We avoid state and federal taxes by using an IRS-approved tax-FREE account. We reinvest ALL our earnings. We accumulate \$1,000,000 by leveraging the Miracle of Compounding over time. This is the strategy Warren Buffett recommends: "A very low-cost index is going to beat a majority of the amateur-managed money or professionally-managed money." Tax-FREE low-cost growth can provide more to

Someone must pay off the three wars, tax cuts and bank bailouts since 1990. The wealthy have learned how to avoid taxes. They stay wealthy by paying lower tax rates than we do. Warren Buffett pays only 17% total tax, Mitt Romney only 14%, and John Kerry only 13%. Most of us pay 32.9%. Most corporations pay under 20%. The wealthy stay wealthy by paying lower fees, charges and commissions. Their fee schedule is 0.01-0.05% not 1.5-3%. They buy only what they need so their costs-commissions, fees, etc. are less. The Index Funds Launchpad Sep 15 2022 If you are just an average person who is new to investment, you might be terrified of losing what little saving you have. But investment does not have to be that intimidating and complicated. Life would be so much easier if you can invest in something that guarantees your return. While that saying might be impossible, Index Funds are considered very close to it if you invest in the long-term. In fact, Index Funds outperform actively-managed funds most of the time. The reasons why; first of all, when you purchase an "index", the cost of buying the index is equal to the value of the stocks therein, as a result, an index performs in tandem with the stocks it is tracking. Not to mention the cost of passive funds is cheaper than actively managed funds, you can find out later. But now, let's take a look at the latest S&P Dow Jones Indices annual report released earlier in

March (2019). After 10 years, the S&P 500 index has outperformed 85 percent of large-cap funds, and after 15 years, nearly 92 percent. This is just one index we are looking at, but it is a good proof of how powerful Index funds can be. There are many high-performance indices out there which you can choose to achieve your financial goals in the next 10 years. Are you ready to learn more about Index Funds now? Here are just a few things you will discover in this book; Why Index Funds outperform the majority of the actively managed funds and yet the cost of index funds is cheaper How to get started with Index Funds How to choose the right index and company to invest in When is the best time to purchase Index Funds A practical list of the best Index Funds included but not only exclusive to S&P 500 Why you should never disregard taxes Possible downsides of Index Funds to take into consideration Warren Buffet himself has given advise time and time again to invest long-term in Index Funds. He mentioned that the trick was not to pick the right company and buy its shares but instead, to invest in indexes consistently. In other words, you can invest in Index Funds and let the time work itself. Investing is not as complex as it may seem. If you are a first-time investor looking to grow your nest egg, and your aim is for the modest goal of getting the same return as the market, then Index Funds are a great choice to outperform all the complicated product bombarding by the Wall Street. The Mutual Funds Book May 31 2021 Over the past decade, American investors increasingly have turned to mutual funds to save for retirement and meet other financial goals. Mutual funds can offer the advantages of diversification and professional management. It pays to understand both the upside and the downside of mutual fund investing and how to choose products that match your goals and tolerance for risk. As with other investment choices, investing in mutual funds involves risk, fees, and taxes. This book explains the basics of mutual fund investing how mutual funds work, what factors to consider before investing, and how to avoid common pitfalls. Mutual funds are not guaranteed or insured by the FDIC or any other government agency. Even if you buy through a bank, and the fund carries the bank's name you can lose money investing in mutual funds. In addition, there are more than 10,000 mutual funds to choose from. Why should you consider investing in a mutual fund? One reason is simply the high potential returns. Many funds have earnings in the triple digits. This all sounds great, but what is the catch? There really is none, except you must know what you are doing! This book will provide everything you need to know to get you started generating high investment returns with low risk from start to finish. You will learn what mutual funds are,

the various types and advantages of each, how to evaluate their risk against other types of investments, how to and how not to invest in them, how to allocate your assets, how to set up your account online, how to choose when to sell, and how to cash them in. You will pick up the language of mutual fund investing and what the lingo means to you: net asset value, load versus no load, turnover, expenses and total expense ratios, capitalization, share classes, growth versus value, dollar cost averaging and many more. We have also included a history of mutual funds (including their scandals), and we have disclosed the mysteries of documents you will encounter in mutual fund investing, such as their ratings, share classes, fees, annual reports, and indexes. We show you how to compare your fund to the competition, how to compare it to other types of investments, and how to compare various funds on an after-tax basis. We make it easy for you to grasp strategies for expanding your investments into different market sectors and among various classes of stocks, such as small and micro-cap stocks, mid cap and large cap companies, defensive stocks, and mixtures of stock types. You will develop your own expertise in reading the economy both nationally and globally, handling taxes, devising investment tactics for portfolio allocation whether interest rates are rising or falling, with down-to-earth instructions to help you bring in a high and steady income, all the while evading losses and

Updated with a new introduction by expert John Bogle, this comprehensive book provides investors with the wisdom of the pioneer of mutual funds to help you identify and execute the ideal mutual fund investment choices for your portfolio. The former Vanguard Chief Executive, Bogle has long been

Consider the risks and rewards of investing in mutual funds Learn how to choose between the four basic types of funds Choose the lower-cost, more reliable investment structure See through misleading advertising, and watch out for pitfalls Take a look into this timeless classic and let Bogle On Mutual Funds show you how to invest in mutual funds the right way, with the expert perspective of an industry leader.

Buy Your First Mutual Fund for Free Nov 17 2022 Warren Buffett is your 'advisor' Pay no trading commissions or fees No chance of picking the wrong stocks Yes, you can earn 11% on your long-term money and end up with HALF a million dollars or more with one phone call. You do not need an advisor or learn how to pick stocks. That is the fastest way to lose money. The average advisor-assisted investor earned just 3.79% instead of

the market rate of 11%. Instead of paying commissions and high fees, we use the strategy proven by Warren Buffett, the greatest investor of our time. Playing the market by trading stocks and timing the market gyrations is the loser's game according to Buffett. We beat Wall Street at their own game by using Warren Buffett's strategy: buy and keep buying the largest mutual funds run at cost and owned by us, the investors. We can't afford hedge funds, offshore tax shelters, and expensive Wall Street money managers taking 2-3% a year. A plain market index fund beat 92-95% of the returns of "professional" managers, including hedge funds. Stock picking by geniuses works only for a short time. Insiders may have an edge but it is illegal and you could get caught like Martha Stewart. To earn more, we pay as little as we can. We own stocks of companies with certain characteristics. We pay less and get more. We use a special investment account to eliminate all future income and capital gains taxes. It is IRS approved for workers. This is the strategy our 'advisor' Warren Buffett recommends. We beat the 'professionals' at their own game. Instead of trading stocks, we buy more of them when the price is low and fewer when it is high. No one can time the market successfully over time. We don't pay Wall Street owners the \$1.3 Trillion per year revenues they take from their clients. You can set up your account in 1 hour FREE.
