An essential reference for all construction professionals, this book shows you how to use Dispute Review Boards (DRBs) to solve construction disputes on the job, avoid claims, and thereby reduce project costs. Prepared by members of the ASCE Task Committee on Dispute Review Boards and featuring contributions from 34 experts in the field, this definitive manual provides all the procedures required to employ the DRB process, and fully explains the benefits and pitfalls of DRBs. You'll find detailed coverage of the concept, function, and applicability of DRBs; the practice of DRBs, including member selection, operation of the board, conduct of the hearing, deliberation, and recommendation; case histories of how the DRB process works; and international DRB applications. A guide specification for including a DRB in the construction contract is also included. Whether you're an owner, contractor, construction manager, attorney, or construction lender, this time- and money-saving sourcebook offers you the most complete guidance now

available on the successful establishment and practice of a Dispute Review Board during construction. In recent years, there has been increasing interest from geoscientists in potassic igneous rocks. Academic geoscientists have been interested in their petrogenesis and their potential value in defining the tectonic setting of the terranes into which they were intruded, and exploration geoscientists have become increasingly interested in the association of these rocks with major epithermal gold and porphyry gold-copper deposits. Despite this current interest, there is no comprehensive textbook that deals with these aspects of potassic igneous rocks. This book redresses this situation by elucidating the characteristic features of potassic (high-K) igneous rocks, erecting a hierarchical scheme that allows interpretation of their tectonic setting using whole-rock geochemistry, and investigating their associations with a variety of gold and copper-gold deposits, worldwide. About two thirds of the book is based on a PhD thesis by Dr Daniel Muller which was produced at the Key Centre for Strategic Mineral Deposits within the Department of Geology and Geophysics at The University of Western Australia under the supervision of Professor David Groves, the late Dr Nick Rock, Professor Eugen Stumpf!, Dr Wayne Taylor, and Dr Brendon Griffin. The remainder of the book has been compiled from the literature using the collective experience of the two authors. The

book is dedicated to the memory of Dr Rock who initiated the research project but died before its completion.
