VCRs, HiFi systems) and miscellaneous small appliances (such as vacuum cleaners, irons, toasters, hairdryers and power tools). The European Community SAVE Programme has promoted the efficient use of energy, in particular in domestic appliances. SAVE has sponsored a variety of studies to characterise the use of the main household appliances and lighting and to identify cost-effective technical options to improve the energy efficiency, as well as to identify the strategies to promote the penetration of efficient equipment in the market place. National energy agencies, independent experts and appliance manufacturers have participated in the SAVE activities and have done a remarkable job. While the energy efficiency of the main household appliances has been improved, at the same time it was possible

in most cases to improve the appliance performance, reliability and quality of service. "Dale Pendell reactivates the ancient connection between the bardic poet and the shaman."-- Terence McKenna In *Pharmako/Dynamis*, Dale

Pendell continues his exploration of psychoactive plants begun in *Pharmako/Poeia*. Pharmacognosy is the study of the composition, production, use, and history of drugs of natural origin. Pendell covers these topics and more in this volume, charting a voyage around the world of plant teachers. Through poetry, chemistry, and a generous sprinkling of arcane lore, Pendell weaves and twists the many threads of tradition into a singularly bewitching brew. Pendell's voyage is a true circumnavigation. It divulges what Gary Synder called "dangerous knowledge" that is a formidable weapon against "even more dangerous ignorance." Dale Pendell is a poet, software engineer, and longtime student of ethnobotany. His poetry has appeared in many journals, and he was the founding editor of *KUKSU: Journal of Backcountry Writing*. He has led workshops on ethnobotany and ethnopoetics for the Naropa Institute and the Botanical Preservation Corps. The death of a beautiful escort in a downtown hotel room appears to be a

In this scrapbook-style sticker book based on the popular Club Penguin Web site, kids can learn about puffles, the preferred pet on Club Penguin. Included are more than 100 reusable stickers. Contemporary Chinese Politics: Sources, Methods, and Field Strategies considers how new and diverse sources and methods are

changing the study of Chinese politics. Contributors spanning three generations in China studies place their distinct qualitative and quantitative methodological approaches in the framework of the discipline and point to challenges or opportunities (or both) of adapting new sources and methods to the study of contemporary China. How can we more effectively use new sources and methods of data collection? How can we better integrate the study of Chinese politics into the discipline of political science, to the betterment of both? This comprehensive methodological survey will be of immense interest to graduate students heading into the field for the first time and experienced scholars looking to keep abreast of the state of the art in the study of Chinese politics. The concept of Functional Patterns is a train of thought that has been building upon itself over the course of my entire lifetime. I was taught at a very young age to question authority and everything around me by my highly skeptical

parents. My parents were extremely hard workers who were very resourceful with the little money they had. They lived by the "practice what you preach" motto in every sense they could. The apple didn't fall very far from the tree and I have embodied (to the best of my ability) what I was fortunate enough to be taught at a very young age. The Functional Patterns method didn't start with the memorization of techniques. It started at a base of reasoning that has seemingly been missing from the industry of health today. When ego checking experiences of life mixed with the values I had already wired in from my childhood, a different approach towards looking at the human organism emerged. That his father is slipping into dementia—seems to embrace it, really—means that the past he would never talk about might be erased forever. Joel Kupperman became one of the most famous children in America during World War II as one of the young geniuses on the series Quiz Kids. With the uncanny ability to perform complex math problems in his head, Joel endeared himself to audiences across the country and became a national obsession. Following a childhood spent in the public eye, only to then fall victim to the same public's derision, Joel

deliberately spent the remainder of his life removed from the world at large. With wit and heart, Michael Kupperman presents a fascinating account of mid-century radio and early television history, the pro-Jewish propaganda entertainment used to counteract anti-Semitism, and the early age of modern celebrity culture. All the Answers is both a powerful father-son story and an engaging portrayal of what identity came to mean at this turning point in American history, and shows how the biggest stages in the world can overcome even the greatest of players.
