A long-awaited new edition of the seminal text on the spiritual system that is a convergence of Gnosticism and Haitian voodoo,
The Voudon Gnostic Workbook is a singular sacred work that is comprehensive in scope -- from "how to be a lucky Hoodoo" to
how magick and voodoo intersect energetically, to esoteric time travel. Complete with charts and graphs and instructive
interdimensional physics, The Voudon Gnostic Workbook is an "object of desire" among students of the occult. Weiser's
long-anticipated republication of this rare text will be an event in the annals of esoteric publishing, as the book itself
is somewhat of an "unholy grail." There are listservers devoted to it and much discussion of the mysteries held within
its pages. While The Voudon Gnostic Workbook has remained a controversial book considered important for masters of
metaphysics, it recently came into popular culture and renewed popularity when Grant Morrison revealed it had been the
inspiration for his cult comics The Invisibles, using the cribbed time travel from Bertiaux' s masterwork. Voodoo is

not an evil religion and is much misunderstood. It derives from the Dahomean Gods called the "Loa." Esoteric voodoo is actually a highly practical procedure for leading us into making contact with the deepest levels of our being and most ancient modes of consciousness. Michael Bertiaux's Voudon Gnostic Workbook is the most comprehensive and illuminating contemporary book on the subject. Launched out of a correspondence course and series of classes for students and followers of Voudon Gnosticism and the OTO, this seminal text is at once one of the most mysterious and magnificent of all esoteric books. The symposium and workshop OC Continuous Advances in QCD / ArkadyfestOCO was the fifth in the series of meetings organized by the William I Fine Theoretical Physics Institute at the University of Minnesota. This meeting brought together leading researchers in high-energy physics to exchange the latest ideas in QCD and gauge theories at strong coupling at large. It honored the 60th birthday of Professor Arkady Vainshtein, and the papers included in this proceedings volume also look back on the history of the subjects in which Arkady played such a central role: applications of PCAC, penguins, invisible axions, QCD sum rules, exact beta functions, condensates in supersymmetry, powerful heavy quark expansions, and new anomalies in 2D SUSY theories. The current status of these subjects was summarized in several excellent

presentations that also outlined a historical perspective. A number of papers from leading researchers in the field present new developments and ideas in modern areas of study, such as the cosmological constant problem in extra-dimension theories, supersymmetric monopoles, solitons and confinement, AdS/CFT correspondence, and high density QCD. Contents: Perturbative and Nonperturbative QCD: Electromagnetic Form Factor of the Pion (H Leutwyler); Multiple Uses of the QCD Instantons (E V Shuryak); CP-Violation and Mixing in Charmed Mesons (A A Petrov); General Aspects of QCD and the Standard Model: Probing New Physics: From Charm to Superstrings (M K Gaillard); Dynamics of QCD in a Strong Magnetic Field (V A Miransky); On Mixed Phases in Gauge Theories (V L Chernyak); Gauge Dynamics at High Temperature and Density: What QCD Tells Us About Nature (F Wilczek); Domain Walls and Strings in Dense Quark Matter (A R Zhitnitsky); Topological Field Configurations, Dynamics in Supersymmetric Models, and Theoretical Issues: Non-Abelian Monopoles, Vortices and Confinement (K Konishi); Nonperturbative Solution of Supersymmetric Gauge Theories (J R Hiller); Testing ADS/CFT Correspondence with Wilson Loops (K Zarembo); Cosmology and Axions: Axions: Past, Present, and Future (M Srednicki); QCD Vacuum and Axions: What's Happening? (G Gabadadze & M Shifman); Arkadyfest: Arkady in Siberia (E Shuryak); Of a Superior Breed (V Zelevinsky); Reminiscences in Pastels (M Shifman); and other papers.
