The Complete Book of Pontiac GTO Aug 07 2021 The Complete Book of Pontiac GTO gives you a year-by-year, model-by-model exploration of the world's first muscle car, all in full color photography, most of which has never been published. When Pontiac created the original muscle car—the GTO—it reshaped the automotive world like a four-inch piston going through a three-inch cylinder bore. Everything changed the moment John Zachery DeLorean and his crew of hot-rodding miscreants bolted a big engine into a smaller car and created the 1964 GTO. Make no mistake: DeLorean and his partners in crime were genuine outlaws. The GTO broke so many of General Motors' corporate rules that the people responsible should have been fired. And they would have been, except the car was a hit. The Complete Book of Pontiac GTO explores every iteration of the first car created specifically for baby boomers. With rare photography from the archives of Hot Rod and Motor Trend magazines, this book is the complete resource for fans of of the world ' s first muscle car.

GTO Feb 01 2021 In 1963 Pontiac's Chief Engineer John DeLorean and his two favorite staff engineers, Bill Collins and Russ Gee, came up with an inspired way to keep Pontiac cars in the performance limelight: bolt a big engine into Pontiac's upcoming Tempest intermediate body. Thus was the GTO born. Through cunning, resourcefulness, and outright trickery the minds of Pontiac managed to get this rocket into dealerships and out onto America's highways, and to introduce that most iconic of American automobiles, the muscle car, to the nation ' s most discriminating drivers. This is the story of the GTO, of the people who made it a reality and a sales sensation, of those who owned and loved the cars. And it is, above all, a story of the cars themselves, from the initial option package offered for the 1964 model year through the high-performance late-model standouts. With color photographs, drawings, and detailed stats, this book is not so much the story of a historic car as an illustrated biography of American muscle.

American Muscle Cars May 16 2022 This is the muscle car history to own--a richly illustrated chronicle of America's greatest high-performance cars, told from their 1960s beginning through the present day! In the 1960s, three incendiary ingredients--developing V-8 engine technology, a culture consumed by the need for speed, and 75 million baby boomers entering the auto market--exploded in the form of the factory muscle car. The resulting vehicles, brutal machines unlike any the world had seen before or will ever see again, defined the sex, drugs, and rock 'n' roll generation. American Muscle Cars chronicles this tumultuous period of American history through the primary tool Americans use to define themselves: their automobiles. From the street-racing hot rod culture that emerged following World War II through the new breed of muscle cars still emerging from Detroit today, this book brings to life the history of the American muscle car. When Pontiac's chief engineer, John Z. DeLorean, and his team bolted a big-inch engine into the division's intermediate chassis, they immediately invented the classic muscle car. In those 20 minutes it took Bill Collins and Russ Gee to bolt a 389 ci V-8 engine into a Tempest chassis they created the prototype for Pontiac's GTO--and changed the course of automotive history. From that moment on, American performance cars would never be the same. American Muscle Cars tells the story of the most desirable cars ever to come out of Detroit. It's a story of flat-out insanity told at full throttle and illustrated with beautiful photography.

Boss Mustang Mar 22 2020 The Ford Boss Mustang is the most iconic pony car ever created, and this book covers it more extensively than any other. Boss Mustang: 50 Years—a fully expanded version of Mustang Boss 302—includes the complete history of its creation; racing and street histories of both the 302 and 429 models; and photos and interviews with Boss Mustang designers, engineers, racers, and more. Of all the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine and option

package for SCCA Trans-Am racing, the Mustang Boss 302 debuted for the 1969 model year and was built in limited numbers for the street through 1970. This book features never-before-seen production and racing photography, interviews with designers and engineers, and keen insight from author Donald Farr, a renowned Ford historian and Ford hall-of-fame inductee. Designed by the legendary Larry Shinoda, the Boss cars were easily distinguished from their less potent stablemates by their race-bred powerplant, standard front spoiler, and bold graphics. In 2012, Ford at long last revived this most revered of all Mustang models. With a new racing counterpart and a modern street version that delivers more than 440 horsepower, the Boss was truly back! In 2013, Ford rolled out the Boss one more time. In *Boss Mustang: 50 Years*, Mustang historian Donald Farr offers a complete history of the car—from its late 1960s origins in Ford's boardrooms through its Trans-Am successes and untimely demise in 1970, up to the conception and development of the spectacular, limited-edition 2012 and 2013 Boss Mustangs. Packed with brilliant photography and firsthand accounts from the people who created the original Boss, as well as the team that resurrected Ford's most iconic Mustang for the 21st century, this is the story every Mustang enthusiast has been waiting to read.

American Cars, 1973-1980 Nov 29 2020 The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.
