**Smaller Faster Lighter Denser Cheaper** Dec 19 2022 Manhattan Institute fellow Robert Bryce's personal, idiosyncratic style fuels an important argument. He celebrates innovation, technology and freedom as the answers to environmental concerns, repeatedly illustrating potential solutions that many of those forecasting climate calamity don't mention, while suggesting what humanity's future could and should be. In this urgent if reductive treatise, he proves an eccentric contrarian. His sort of random capitalization - things aren't faster, they are Faster - can irritate, and rather than answer objections or counterarguments, Bryce tends to just elude them, but he consistently remains intriguing. While always neutral politically, getAbstract suggests Bryce's optimistic look ahead to all those interested in the environment, the future and how innovation builds on itself.
