According to Dun & Bradstreet, 90% of all business failures analyzed can be traced to poor management. This is backed up by my own experience. In my 31 years as a business coach and consultant to small businesses, I've seen practically dozens of small business owners go under and lose their businesses -- not because they weren't talented

or smart enough -- but because they were trying to re-invent the wheel rather than rely on proven, tested methods that work. And that is where this book can help, it will teach you how to avoid the common traps and mistakes and do everything right the first time. There is a world of relevant information and opportunities out there for anyone who would like to own a home based business. The world's recession is having a negative effect on many bank accounts, and this book provides a list of opportunities available to make some money with very little capital. It discusses business start ups and how to write a business plan. It also includes a skill profile template that allows you research into how your skills and experience can help you start your own home business. Finally, a Comprehensive Guide to Starting a Food Business! Do your insides jump for joy when you see a perfectly frosted cupcake or cookie? Or are you more of a savory person and melt when you see a jar of homemade salsa or seasoned nuts with just the right amount of spices? If food excites you as much as it does me, you just might be a foodie. And in today's food-centered world, there is serious money to be made with your passion. Food consumption has really changed in the past decade, and now more than ever, people want to know what's in their food, where it came from and who made it. That's bad news for businesses that mass produce food, but great news for those in the cottage food industry. You see, in the past individuals who wanted to sell food were

required to involve state health inspectors and lease commercial kitchens in order to sell to the public. Obviously, that prevented a lot of people from pursuing their food dreams. But now many states have passed cottage food laws that are designed to give home chefs and bakers the right to produce products from their homes and sell them to the public. If you've read my other books, you know I'm a serial entrepreneur. I've opened and closed many businesses in my lifetime, and there's nothing I love more than taking an idea and turning it into a smoothly run, profitable business. And this book was born of that desire. Let me explain. I bake. There--it's out in the open. I'm a guy and I bake. Specifically, I bake specialty brownies that are so good local stores approach me and ask to buy them wholesale, and I get phone calls from friends begging me to bake a batch. Yeah, my brownies are that good. So when I heard about the changes in the law allowing people to start home-based food businesses, my entrepreneurial mind starting spinning. I have a great product, and there is no reason why I couldn't create a profitable business. I should just open one, right? Fortunately, that's not the way I roll. I have never simply opened a business and learned as I go--instead I conduct so much research that I know absolutely everything there is to know before I begin. In other words, I leave no room for error. I want the information up front so I can make the best decisions and build a successful business. Otherwise, what's the point? So, when the idea

of opening a cottage food business occurred to me, I began researching and I didn't stop for months. That's where this book comes in. There is a lot to know about this type of business, and one thing I learned is that there is simply nowhere that you can get all of the information in one place. Until this book. Don't believe me? Take a look at the other books on the subject and just see if the author provides a state-by-state index of all the cottage food laws. Let me save you some time. They don't. And recipes that fit into the guidelines of the laws? Nope, you won't find them in other books. How about serious insight into how to best brand, package and market your home-based food business? You'll only find that in this book. So, let my obsessive research into business ideas, along with my entrepreneurial skills, help you in your own business. I've done the hard work for you, so all you have do is follow the plan I've outlined in this book and you'll be on your way to building your very own food business. And all the newbie questions you have but are too embarrassed to ask? I had them, too and I've included the answers to them in this book. If you're ready to pursue your foodie dreams, download the book and get started!
