Russia-Cyprus Relations May 21 2020 This study assesses Moscow's special bilateral relations with Cyprus since the mid-1950s, with particular emphasis on the post-Cold War years. Melakopides develops the theory of 'pragmatic idealism' when describing the way in which Moscow's Cyprus policies were meant to satisfy not only mutual interests but also international legal and ethical principles and norms. The book recalls Cyprus's dramatic vicissitudes since the 1950s and revisits the controversial 'political realist' policies of Washington, Ankara and London against the interests and needs of the Greek-Cypriot majority. Melakopides then goes on to analyse the regional geopolitical context; Turkey's hegemonic ambitions and its ongoing aggressiveness against Cyprus; Nicosia's current efforts to pursue a multidimensional foreign policy that also engages Greece, Israel and Egypt; the strong Russian-Cypriot diplomatic and political relations as well as their relations in trade, banking, energy, tourism, culture, energy and defence; and the origins of Russia's historical, religious and 'spiritual' sentiments and bonds towards Hellenism and Cyprus.

Rank Hypocrisies Jun 14 2022 "In crystalline text steeped in cold rage, Sayer takes aim at the REF's central claim, that it is a legitimate process of expert peer review. He critiques university and national-level REF processes against actual practices of scholarly review as found in academic journals, university presses, and North American tenure procedures. His analysis is damning. If the REF fails as scholarly review, how can academics and universities continue to participate? And how can government use its rankings as a basis for public policy?" - Tarak Barkawi, London School of Economics "Sayer makes a compelling argument that the Research Excellence Framework is not only expensive and divisive, but is also deeply flawed as an evaluation exercise. Rank Hypocrisies is a rigorous and scholarly evaluation of the REF, yet written in a lively and engaging style that makes it highly readable." - Dorothy Bishop, University of Oxford Few decisions are as consequential for the funding and reputation of Britain's universities as those of REF panels. Not only do REF rankings determine the levels of research funding universities receive from the state. They equally affect institutions' ability to attract external grants, top-flight faculty, and graduate students. Whatever benefit the UK's periodic research assessment exercises may have brought to research productivity, the REF has been widely criticized for its enormous costs in taxpayers' money and academics' time, its discouragement of innovative (and especially interdisciplinary) research, and its negative effects on collegiality and staff morale. Derek Sayer extends these arguments, notably through his discussion of the questionable staff selection processes used in REF2014 within his own university. Where Rank Hypocrisies goes beyond previous critiques is in its open challenge to the REF's claim to provide 'expert review of the outputs' - the very heart of its legitimacy. Examining the composition and operation of REF disciplinary subpanels in forensic detail, Sayer paints a picture in which overburdened assessors assign vaguely defined grades in fields that are frequently not their own while ignoring all external indicators of the academic influence of the publications they are appraising, and then shred all records of their deliberations. Judged against international norms of peer review, the REF is an elaborate charade - and an insult to the core values of the academy.

The Routledge Research Companion to Geographies of Sex and Sexualities Oct 18 2022 Comprehensive and authoritative, this state-of-the-art review both charts and develops the rich sub-discipline geographies of sexualities, exploring sex-gender, sexuality and sexual practices. Emerging from the desire to examine differences and exclusions as a key aspect of human geographies, these geographies have engaged with heterosexual and queer, lesbian, gay, bi and trans lives. Developing thinking in this area, geographers and other social scientists have illustrated the centrality of place, space and other spatial relationships in reconstituting sexual practices, representations, desires, as well as sexed bodies and lives. This book reviews the current state of the field and offers new insights from authors located on five continents. Terrorizing Gender Jun 21 2020 The increased visibility of transgender people in mainstream media, exemplified by Time magazine's declaration that 2014 marked a "transgender tipping point," was widely believed to signal a civil rights breakthrough for trans communities in the United States. In *Terrorizing Gender* Mia Fischer challenges this narrative of progress, bringing together transgender, queer, critical race, legal, surveillance, and media studies to analyze the cases of Chelsea Manning, CeCe McDonald, and Monica Jones. Tracing how media and state actors collude in the violent disciplining of these trans women, Fischer exposes the traps of visibility by illustrating that dominant representations of trans people as deceptive, deviant, and threatening are integral to justifying, normalizing, and reinforcing the state-sanctioned violence enacted against them. The heightened visibility of transgender people, Fischer argues, has actually occasioned a conservative backlash characterized by the increased surveillance of trans people by the security state, evident in debates over bathroom access laws, the trans military ban, and the rescission of federal protections for transgender students and workers. *Terrorizing Gender* concludes that the current moment of trans visibility constitutes a contingent cultural and national belonging, given the gendered and racialized violence that the state continues to enact against trans communities, particularly those of color.
