Century is a renowned manufacturer of runabout, utility, and water ski boats. Starting out in Milwaukee in 1926, Century continues to be a leader in the powerboat industry today. This book traces the company's humble beginnings to market prominence, focusing on the wooden-hulled inboard and outboard boats built from 1930 to 1968. In the wood era, the company offered utilities, triple cockpit speedboats, and streamlined runabouts that performed exceptionally well against the competition. A holiday filled with hope A Season for Grace by Linda Goodnight The moment they met, social worker Mia Carano knew Officer Collin Grace was the perfect mentor for a runaway teen in her care. Though a childhood spent in foster care had hardened Collin, Mia was determined to reveal the caring man she knew was inside. After all, breaking through his gruff exterior would fulfill a boy's Christmas wish...and maybe even her own. Heart of the Family by Margaret Daley A former foster child himself, Dr. Jacob Hartman is deeply committed to working with the kids at the Stone's Refuge home for children. But why is social worker Hannah Smith keeping him at such a distance? When he discovers just where their pasts intertwined, he wonders if they can ever hope for a future. But Christmas has a way of bringing hearts together. New York Times Bestselling Author Linda Goodnight USA TODAY Bestselling Author

mentor for a runaway teen in her care. After all, the boy looked up to him, and desperately needed a role model. Though a childhood spent in foster care had hardened Collin, Mia would reveal the caring man she knew was inside. After all, breaking through his gruff exterior would fulfill a boy's Christmas wish...and maybe even her own. The author's carefree life in a small midwestern town at the close of World War I, and his adventures with his pet raccoon, Rascal. Reviews and summarizes the experiences gained over the past few years by libraries involved in the mail delivery of books to individuals in isolated rural areas and metropolitan areas

Twice-jailed scoundrel and the people's champion, builder of hospitals and schools and shameless grafter, compelling orator and master of political farce, James Michael Curley was the stuff of legend long before his life became fiction in Edwin O'Connor's classic novel *The Last Hurrah*. As mayor of Boston, as congressman, as governor of Massachusetts, Curley rose from the Irish slums in a career extending from the Progressive Era of Teddy Roosevelt to the ascendancy of JFK. Beatty's spellbinding story of this remarkable man--and of his city, his people, and his times--is biography at its best. On a June morning in 1870, seventy-five Chinese immigrants stepped off a train in the New England factory town of North Adams, Massachusetts, imported as strikebreakers by the local shoe manufacturer. They threaded their way through a hostile mob and then--remarkably--their new employer lined them up along the south wall of his factory and had them photographed as the mob fell silent. So begins *A Shoemaker's Story*. Anthony Lee seeks to understand the social forces that brought this now-famous photograph into being, and the events and images it subsequently spawned. He traces the rise of photography as a profession and the hopes and experiences of immigrants trying to find their place in the years following the Civil War. He describes the industrialization of the once-traditional craft of shoemaking, and the often violent debates about race, labor, class, and citizenship that industrialization caused. Generously illustrated with many extraordinary photographs, *A Shoemaker's Story* brings 1870s America to vivid life. Lee's spellbinding narrative interweaves the perspectives of people from very different walks of life--the wealthy factory owner who dared to bring the strikebreakers to New England, the Chinese workers, the local shoemakers' union that did not want

them there, the photographers themselves, and the ordinary men and women who viewed and interpreted their images. Combining painstaking research with world-class storytelling, Lee illuminates an important episode in the social history of the United States, and reveals the extent to which photographs can be sites of intense historical struggle. Waiting at the airport of a Caribbean island for his homeward bound plane, Edward Ray—the bookman of the title—reflects on this week, which has changed his life. First, there was the cargo ship voyage to San Juan de Pinos, a journey shared by an odd assortment of fellow passengers whose lives impinge on his own, and who entertain one another—in the manner of the travellers in Chaucer’s *The Canterbury Tales* with stories of their own unusual experiences. Then there are his hopes for meeting Claudia—unseen for three decades—and for reviving the love they shared 30 years ago. Lastly there is Janet Tyner, a young woman who offers him a ride on the island and then gives him much more than he ever bargained for. *The Bookman’s Tale* is a lush and exotic novel, compact with the sights and smells of the Caribbean, of desire and passion, and with the mysterious ways of fate. It is a novel marked, as well, by the sensitive reflections of the Bookman himself, who, after his trip, has, perhaps, the most unusual tale of all those who made the journey. In the not too distant future, every researcher and professional in science and engineering fields will have to understand parallel and distributed computing. With hyperthreading in Intel processors, hypertransport links in AMD processors, multi-core silicon in today's high-end microprocessors from IBM and emerging cluster and grid computing, parallel and distributed computers have moved into the mainstream of computing. To fully exploit these advances in computer architectures, researchers and professionals must start to design parallel or distributed software, systems and algorithms for their scientific and engineering applications. Parallel and distributed scientific and engineering computing has become a key technology which will play an important part in determining, or at least shaping, future research and development activities in many academic and industrial branches. This book reports on the recent important advances in the area of parallel and distributed computing for science and engineering applications. Included in the book are selected papers from prestigious workshops such as PACT-SHPSEC, IPDPS-PDSECA and

ICPP-HPSECA together with some invited papers from prominent researchers around the world. The book is basically divided into five main sections. These chapters not only provide novel ideas, new experimental results and handful experience in this field, but also stimulate the future research activities in the area of parallel and distributed computing for science and engineering applications. For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce. The saga of how a widow from Minneapolis and her brother--soon to become the new teacher in a tiny Montana community in 1909--change lives in unexpected ways has all the charm of old-school storytelling, from Dickens to Laura Ingalls Wilder. Includes the Report of the Mississippi River Commission, 1881-19 .
