Accelerated Testing and Validation Methods is a cross-disciplinary guide that describes testing and validation tools and techniques throughout the product development process. Alex Porter not only focuses on what information is needed but also on what tools can produce the information in a timely manner. From the information provided, engineers and managers can determine what data is needed from a test and validation program and then how to select the best, most effective methods for obtaining the data. This book integrates testing and validation methods with a business perspective so readers can understand when, where, and how such methods can be economically justified. Testing and validation is about generating key information at the correct time so that sound business and engineering decisions can be made. Rather than simply describing various testing and validation techniques, the author offers readers guidance on how to select the best tools for a particular need, explains the appropriateness of different techniques to various situations and shows how to deploy them to ensure the desired information is accurately gathered. Emphasizes developing a strategy for testing and validation Teaches how to design a testing and validation program that deliver information in a timely and cost-effective manner For a girl like Melody and a dog like Mo, life can be both sticky and sweet. Many students continue to struggle with acquiring the necessary skills to become successful readers. The most commonly used software for teaching reading is the Accelerated Reader (AR) program. The purpose of this study was to investigate the impact of the Accelerated Reader program on elementary students' reading TAKS scores in an urban predominantly Hispanic Title I school. Namely, the study investigated the relationship among the amount of time spent reading, amount of reading, average AR test scores, and students' reaching AR goal in the Accelerated Reader Program, and students' reading achievement, as measured by the state high stakes standardized test, Texas Assessment of Knowledge and Skills (TAKS) test. Archival data contained AR reading records and TAKS reading scores for 300 elementary students in an urban predominantly Hispanic Title I school during 2007- 2008 and 2008-2009 school years was analyzed. A correlation design was utilized for this ex-post facto study to determine if a correlation exists between the reading achievement of the students, as measured by the Texas Assessment of Knowledge and Skill reading tests and the implementation of Accelerated Reader Program as measured by Engaged time in reading, AR points, AR average scores, and AR goal. The results showed there are low to moderate correlation between the Accelerated Reader program's major components AR Engaged Time, AR points, AR average correct, AR goal, and The TAKS reading test. Surprisingly, we found very 1 provocative results; 100% of the students who did not pass TAKS-Reading also did not reach their AR Goal; 100% of the students who reach their AR goals also passed TAKS reading tests. In addition, the researchers found limited empirical support for "Matthew effect" in reading, as evidenced by low to moderate correlations and small amount of variance explained. Importantly, there was significant variation in program implementation by teacher and grade level. Practical implications for elementary school reading instruction are discussed. big, lovable Clifford when he was a very small puppy. **Readicide**: The systematic killing of the love of reading, often exacerbated by the inane, mind-numbing practices found in schools. Reading is dying in our schools. Educators are familiar with many of the factors that have contributed to the decline--poverty, second-language issues, and the ever-expanding choices of electronic entertainment. In this provocative new book, Kelly Gallagher suggests, however, that it is time to recognize a new and significant contributor to the death of reading: our schools. In *Readicide*, Kelly argues that American schools are actively (though unwittingly) furthering the decline of reading. Specifically, he contends that the standard instructional practices used in most schools are killing reading by: - valuing the development of test-takers over the development of lifelong readers; - mandating breadth over depth in instruction; - requiring students to read difficult texts without proper instructional support; - insisting that students focus solely on academic texts; - drowning great books with sticky notes, double-entry journals, and marginalia; - ignoring the importance of developing recreational reading; and - losing sight of authentic instruction in the shadow of political pressures. Kelly doesn't settle for only identifying the problems. *Readicide* provides teachers, literacy coaches, and administrators with specific steps to reverse the downward spiral in reading--steps that will help prevent the loss of another generation of readers. For use in schools and libraries only. **Howl with laughter with Dog Man**, the #1 New York Times, USA Today, and Wall Street Journal bestseller! A dark family secret prompts a ghost to seek revenge in this spooky novel in the spirit of Mary Downing Hahn. The only life 12-year-old Emily has ever known is the cold, unloved existence of being an orphan. But everything changes when the Thorntons, a young couple from London, adopt Emily, whisking her away to a new life at their grand estate. At first, life at Blackthorn Manor is wonderful. But as Emily explores the grounds and rooms, she stumbles upon a mysterious girl named Kat, who appears to be similar in age, and the two become fast friends. That's when things take a turn for the worse. Kat seems to know a curious amount about the estate, and strange things happen whenever she's around. In one case, Emily narrowly avoids getting toppled by a bookcase in the library; in another, the fire erupts in the fireplace, nearly burning Emily's hands. It's almost as if someone -- or something -- wants Emily dead. Emily must find out what happened to the Thorntons and, more important, how Kat is connected to these strange goings-on at Blackthorn Manor before it's too late! This study addresses the effects of previewing reading tests on the reading scores of four English Language Learners (ELLs) with different reading abilities. After the pre-reading strategy of previewing the literature on the computer, the ELLs read the book and then took an Accelerated Reader test on the computer. The results of their tests were immediately calculated. The ELLs then read an Accelerated Reader book at the exact same reading level, but this time without the pre-reading strategy. The book was read, and then the Accelerated Reader test was taken and test results were charted. A comparison between the two scores were tabulated and found. The results showed that the pre-reading strategy helped students' reading scores as well as providing motivation to the students to read the text. A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.
