In Detail
Vue.js is a frontend web framework which makes it easy to do just about anything, from displaying data up to creating full-blown web apps, and has become a leading tool for web developers. This book puts Vue.js into a real-world context, guiding you through example projects that helps you build Vue.js applications from scratch. With this book, you will learn how to use Vue.js by creating three Single Page web applications. Throughout this book, we will cover the usage of Vue, for building web interfaces, Vuex, an official Vue plugin which makes caching and storing data easier, and Vue-router, a plugin for creating routes and URLs for your application. Starting with a JSON dataset, the first part of the book covers Vue objects and how to utilize each one. This will be covered by exploring different ways of displaying data from a JSON dataset. We will then move on to manipulating the data with filters and search and creating dynamic values. Next, you will see how easy it is to integrate remote data into an application by learning how to use the Dropbox API to display your Dropbox contents in an application In the final section, you will see how to build a product catalog and dynamic shopping cart using the Vue-router, giving you the building blocks of an e-commerce store.
Style and approach This book takes you three projects, with step-by-step instructions to help you understand the concepts of Vue and put it into practice. This two-volume set presents the conference papers from the 1st International Conference on Economics, Development and Sustainability (EDESUS 2019), organized by the University of Economics and Business, Vietnam National University, Hanoi. The collection addresses global changes and sustainable development in Vietnam and other emerging market economies in Asia, and covers wider topics such as economics and business

(e.g. economic theory, national and international income distribution, macroeconomic policies, sectors of economy, productivity developments, financial market, business governance, bank financing), development and sustainability (e.g. developing process, development policy, public policy, sustainable growth, sustainability tools, sustainable livelihood, sustainable tourism, green growth), and resources and global change (e.g. human resources, natural resources, climate change, globalization, global challenges). The books are of interest to professors, researchers, lecturers, and students in economics and geography, consultants, and decision makers interested in global changes and sustainable development. Volume 2 focuses on global changes and sustainable development in Vietnam and other emerging market economies in Asia. CoCo: The Colorful History of Tandy's Underdog Computer is the first book to document the complete history of the Tandy Color Computer (CoCo), a popular 8-bit PC series from the 1980s that competed against the era's biggest names, including the Apple II, IBM PC, and Commodore 64. The book takes you inside the interesting stories and people behind this unique, underdog computer. Both noted computer science and technology advocates, authors Pitre and Loguidice reveal the story of a pivotal period in the home computing revolution from the perspective of Tandy's CoCo. As these computers were sold in Radio Shack stores throughout the United States and other countries, they provide a critical point of reference for key events in the unprecedented evolutionary period for the PC industry in the 1980s. The book also features first-hand accounts from the people who created and promoted the CoCo, from the original Tandy executives and engineers to today's active product creators and information keepers. The CoCo impacted many lives, and this book leaves no stone unturned in recounting this fascinating slice of the PC revolution that is still in play today. From early telecommunications experiments to engineering and budgetary challenges, it covers all the aspects that made the CoCo a truly personal, useful computing experience in as small and inexpensive a package as possible. Covers all U.S. and Canadian models of Saturn Vue 2002 through 2007. Does not include information specific to hybrid models. The book investigates the relationship between ecosystem services (ES) and spatial planning, and explores potential means of integrating the two concepts to support the decision-making process. In addition, it presents case studies demonstrating the outcomes, limitations, opportunities and further new developments in ES assessment/mapping for planning support. Then it describes the "Restart from Ecosystem Services" (RES) methodology, which is aimed at integrating ES into the planning process using an ecological balance, and at promoting new planning parameters for the transformation areas. RES ensures the inclusion of ES in planning processes using the incremental measures of limiting, mitigating and compensating soil sealing and land take process promoting operational strategies in applying it. The implementation of RES is associated with strategic environmental assessment and provides valuable support in the definition of strategies across the entire planning process, especially for the evaluation of alternative scenarios.
