Large Rivers Jan 15 2020 Large Rivers: Geomorphology and Management explores an important topic in geomorphology and sedimentology: the form and function of major rivers. Our knowledge of the big rivers of the world is limited. It is currently difficult to recognise large rivers of the past from relict sedimentary deposits or to structure management policies for long international rivers. This exciting book brings together a set of papers on large rivers of the world, as a unique introduction to a demanding subject. The book includes thirty chapters and is organised into three sections. The first part is on the environmental requirements for creating and maintaining a major river system. The second is a collection of case studies on 14 large rivers from different continents, covering a range of physical environments. The third section includes chapters on the measurement and management of large rivers. First book to offer in a single volume state-of-the-art knowledge on management and geomorphology of large rivers of the world A pioneering study, pushing the boundaries of our knowledge related to big rivers Includes comprehensive case studies covering the major large rivers of the world including Amazon, Mississippi, Nile, Congo, Indus, and Mekong Written by a leading team of distinguished, international contributors Large Rivers: Geomorphology and Management is essential reading for postgraduate students and researchers in fluvial geomorphology, hydrology, sedimentary geology, and river management. It is also of relevance to engineers and environmental consultants in

the private and public sectors working on major rivers of the world.

Personal Finance Oct 04 2021 The treatment of vertical intra-brand restraints is one of the most controversial issues of contemporary competition law and policy, and there are substantial differences between the world's two

leading regimes in this regard. In the US, resale price fixing merits an effects-analysis, while in the EU it is prohibited outright. Likewise, territorial protection is treated laxly in the US, while in the EU absolute territorial protection - due to the single market imperative - is chased with fire and sword.
