This book tells the story of one of the six alloy-bodied XK 120s that were prepared by Jaguar in 1950 for racing and rallying. This one, known as JWK 651 because of the registration number, was owned by Leslie Johnson and raced by him in some of the most prestigious events of the time, including the Le Mans 24 Hours, the Mille Miglia (twice) and the Tourist Trophy at Dundrod. Beyond that, Johnson and up-and-coming racing driver Stirling Moss visited the speed bowl at Montlhery for a record-breaking attempt, and Johnson also took part in the RAC Rally. In 1950, the car lay in second place in the Le Mans 24 Hours after 15 hours and was gaining on the leaders when the clutch failed. Besides this diverse and distinguished period competition career, the book tells the story of the later life of this most significant XK 120. The book includes a wealth of period photographs as well as a portfolio of magnificent studio images. The sleek and stylish Jaguar has been admired for decades for its luxury as well as its performance. This volume profiles models from throughout the history of this sports-car brand. Chronicles the entire production history of the Jaguar XK, providing roadtest reports, worldwide racing statistics, advice on buying and restoring the classic sports car, and anecdotes from XK owners throughout the world. Research on driver behaviour over the past two decades has demonstrated that driver characteristics, goals and motivations are important determinants of driving behaviour. We are now in a position to apply this knowledge to driver training programs and evaluate their effectiveness in improving safety. The main objective for the First International Conference on Driver Behaviour and Training and this book, is to describe and discuss recent advances in this field. The book bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines. It will encourage research in driver training to combat erroneous or deviant driving behaviour and/or reduce the effects of human error at source. This book will be of interest to road safety researchers and road safety practitioners in the private and public sector. Los Angeles magazine is a regional magazine of national stature. The original edition of this book covered just the X-100 (original series) XKs from 1996 through to 2005. This edition, now in paperback, brings the story up to date with the X-150 alloy-bodied cars, from 2006 through to the end of production in 2014. It was the XK8 - a sleek, purposeful grand tourer in the Jaguar tradition. Graham Robson, one-time Jaguar apprentice and a motoring historian with several other Jaguar books to his credit, tells the story of one of the twentieth century's most beautiful sports car, from its conception to the end of the line for both it and the factory it was built in. Full details on camshafts, camshaft timing, valve springs and cylinder head options and modifications. Carburation chapters cover: 1 3/4 and 2 inch twin SU setups; triple 2 inch SUs; and triple Weber and Dellorto setups. The Jaguar XK8 was launched to great acclaim in 1996 as the successor to the XJS, and the model range has been built on ever since. Nearly 10 years after its launch, the styling remains virtually unchanged, which says a lot for the original concept. Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020 (currently more than 20 million deaths and injuries p.a.). The objective of this second edition, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of different perspectives and related disciplines. A major focus is to consider how driver training needs to be adapted, to take into account driver characteristics, goals and motivations, in order to raise awareness of how these may contribute to unsafe driving behaviour, and to go on to promote the development of driver training courses that

considers all the skills that are essential for road safety. As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour, the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills-based approach. Readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from regulatory authorities and professional driver training organizations such as the police service, and private and public sector personnel who are concerned with improving road safety.
