Birding Without Borders Oct 18 2019 The story of how the associate editor of Birding magazine set himself a lofty goal: to become the first person to see half the world's birds in one year. In 2015, for 365 days, with a backpack, binoculars, and a series of one-way tickets, Noah Strycker traveled across forty-one countries and all seven continents, eventually spotting 6,042 species—by far the biggest birding year on record. This is no travelogue or glorified checklist. Noah ventures deep into a world of chronic sleep deprivation, airline snafus, breakdowns, mudslides, floods, war zones, ecologic devastation, conservation triumphs, common and iconic species, and scores of passionate bird lovers around the globe. By pursuing the freest creatures on the planet, he gains a unique perspective on the world they share with us—and offers a hopeful message that even as many birds face an uncertain future, more people than ever are working to protect them. “Birding Without Borders is light-hearted and filled with stories of exotic birds, risky adventures, and colorful birding companions.”—New York Times Book Review “Highly recommended for anyone interested in travel, natural history, and adventure.”—Library Journal “Even readers who wouldn't know a marvellous spatuletail from a southern ground hornbill will be awed by Strycker's achievement and appreciate the passion with which he pursues his interest.”—Publishers Weekly

The Camera as Actor Sep 09 2021 Looking beyond the impact photographs have on the perpetuation and expression of social norms and stereotypes, and the influence of the act of taking a photograph, this new collection brings together international scholars to examine the camera itself as an actor. Bringing the camera back into view, this volume furthers our understanding of how, and in what ways, imaging technology shapes us, our lives, and the representations out of which we fashion knowledge, base our judgments and ultimately act. Through a broad range of case studies, the authors in this collection make the convincing claim that the camera is much more than a mechanical device brought to life by the photographer. This book will be of interest to scholars in photography, visual culture, anthropology and the history of photography.
