This invaluable guide explains everything readers need to know about finding and financing foreclosed and soon-to-be foreclosed residential properties with the highest potential return. Completely updated, this new edition reflects recent changes in the way banks and the government dispose of foreclosed properties, covers new laws, and advises how to steer clear of scams. ? First edition sold more than 30,000 copies in a year and a half ? The national residential foreclosure rate rose to from .75% to 1.16% (of all mortgages) by the end of 2006-the biggest jump in 30 years ? Foreclosures are expected to continue to increase as interest rates rise and monthly payments on short-term variable rate and interest-only loans make homes unaffordable Feedback is a rare commodity in day-to-day organizational life, but it is a key to ongoing effectiveness. One popular vehicle for getting feedback from one's boss, peers, subordinates, and customers is the multiple-perspective or 360-degree-feedback instrument. Whether part of a management-development course or used alone, this kind of instrument can enhance self-awareness by highlighting a leader's strengths and areas in need of further development. Selecting the right instrument from among the dozens that are available can be difficult, however. This new edition of Feedback to Managers, the fourth, updates and expands the popular 1998 edition. It guides the selection process with an in-depth analysis of 32 publicly available instruments that relate self-view to the views of others on multiple management or leadership domains. Each of the instrument reports includes descriptive information, a look at the research behind the instrument, and descriptions of support materials. This book is a fully revised and updated second edition of the only comprehensive guide to the mammals of South-east Asia, one of the world's richest regions in terms of mammal diversity, where species new to science are still being described regularly, though there is increasing pressure on all of its wild mammal populations. From large mammals such as the elephant, big cats, dolphins and whales through bears, monkeys and badgers to bats, civets, rats and shrews, more than 550 species are described in detail, including key identification characteristics, habitat, behaviour, distribution and status, accompanied by line drawings of footprints and details of anatomy, or other aspects of identification. Beautiful colour plates depict nearly all species and their variations, while accompanying range maps provide up-to-date information on distribution. This field guide is essential for any naturalist or traveller visiting this special corner of Asia.
