How he got on the wrong side of the negotiating table. And how much sexier he is in real life... Zane is a battle-hardened warrior, used to command and solitude. But Janie has drawn him from the minute they met. His need for her could destroy everything he's worked for, but the risk is too sweet not to take it. They call her the Chosen One. But when it comes down to the questions of peace or war, life or death, safety or passion, it will be Janie who makes the choice..."--Page 4 of cover. It took an author of Caitlin Rother's caliber to bring it into sharp focus. A riveting read." —Gregg Olsen, #1 New York Times bestselling author "I got a girl, hung herself in the guest house." The call came on the morning of July 13, 2011, from the historic Spreckels Mansion, a lavish beachfront property in Coronado, California, owned by pharmaceutical tycoon and multimillionaire Jonah Shacknai. When authorities arrived, they found the naked body of Jonah's girlfriend, Rebecca Zahau, gagged, her ankles tied and her wrists bound behind her. Jonah's brother, Adam, claimed to have found Rebecca hanging by a rope from the second-floor balcony. On a bedroom door in black paint were the cryptic words: SHE SAVED HIM CAN YOU SAVE HER. Was this scrawled message a suicide note or a killer's taunt? Rebecca's death came two days after Jonah's six-year-old son, Max, took a devastating fall while in Rebecca's care. Authorities deemed Rebecca's death a suicide resulting from her guilt. But who would stage either a suicide or a murder in such a bizarre, elaborate way? Award-winning investigative journalist Caitlin Rother weaves stunning new details into a personal yet objective examination of the sensational case. She explores its many layers—including the civil suit in which a jury found Adam Shacknai responsible for Rebecca's death, and the San Diego County Sheriff's Department bombshell decision to reconfirm its original findings. As compelling as it is troubling, this controversial real-life mystery is a classic American tragedy that evokes the same haunting fascination as the JonBenet Ramsey and O.J. Simpson cases. "Rother's meticulous journalism shines through in this authoritative account of the Rebecca Zahau death incident. If you think you know this case, think again. And read this book." —Katherine Ramsland, professor of forensic psychology and author of *The Psychology of Death Investigations* Communities around the United States face the threat of being underwater. This is not only a matter of rising waters reaching the doorstep. It is also the threat of being financially underwater, owning assets worth less than the money borrowed to obtain them. Many areas around the country may become economically uninhabitable before they become physically unlivable. In *Underwater*, Rebecca Elliott explores how families, communities, and governments confront problems of loss as the climate changes. She offers the first in-depth account of the politics and social effects of the U.S. National Flood Insurance Program (NFIP), which provides flood insurance protection for virtually all homes and small businesses that require it. In doing so, the NFIP turns the risk of flooding into an immediate economic reality, shaping who lives on the waterfront, on what terms, and at what cost. Drawing on archival, interview, ethnographic, and other documentary data, Elliott follows controversies over the NFIP from its establishment in the 1960s to the present, from local backlash over flood maps to Congressional debates over insurance reform. Though flood insurance is often portrayed as a rational solution for managing risk, it has ignited recurring fights over what is fair and valuable, what needs protecting and what should be let go, who deserves assistance and on what

terms, and whose expectations of future losses are used to govern the present. An incisive and comprehensive consideration of the fundamental dilemmas of moral economy underlying insurance, Underwater sheds new light on how Americans cope with loss as the water rises. But even so, the Christian faith includes many controversial beliefs that non-Christians find hard to accept. This book explores 12 issues that might cause someone to dismiss orthodox Christianity—issues such as the existence of suffering, the Bible's teaching on gender and sexuality, the reality of heaven and hell, the authority of the Bible, and more. Showing how the best research from sociology, science, and psychology doesn't disagree with but actually aligns with claims found in the Bible, these chapters help skeptics understand why these issues are signposts, rather than roadblocks, to faith in Christ. Examining the science of stream restoration, Rebecca Lave argues that the neoliberal emphasis on the privatization and commercialization of knowledge has fundamentally changed the way that science is funded, organized, and viewed in the United States. Stream restoration science and practice is in a startling state. The most widely respected expert in the field, Dave Rosgen, is a private consultant with relatively little formal scientific training. Since the mid-1990s, many academic and federal agency-based scientists have denounced Rosgen as a charlatan and a hack. Despite this, Rosgen's Natural Channel Design approach, classification system, and short-course series are not only accepted but are viewed as more legitimate than academically produced knowledge and training. Rosgen's methods are now promoted by federal agencies including the Environmental Protection Agency, the U.S. Forest Service, the U.S. Fish and Wildlife Service, and the Natural Resources Conservation Service, as well as by resource agencies in dozens of states. Drawing on the work of Pierre Bourdieu, Lave demonstrates that the primary cause of Rosgen's success is neither the method nor the man but is instead the assignment of a new legitimacy to scientific claims developed outside the academy, concurrent with academic scientists' decreasing ability to defend their turf. What is at stake in the Rosgen wars, argues Lave, is not just the ecological health of our rivers and streams but the very future of environmental science. Anger and self-preservation are the only motivations Abby Miller needs or wants right now. From the 1950s to the digital age, Americans have pushed their children to live science-minded lives, cementing scientific discovery and youthful curiosity as inseparable ideals. In this multifaceted work, historian Rebecca Onion examines the rise of informal children's science education in the twentieth century, from the proliferation of home chemistry sets after World War I to the century-long boom in child-centered science museums. Onion looks at how the United States has increasingly focused its energies over the last century into producing young scientists outside of the classroom. She shows that although Americans profess to believe that success in the sciences is synonymous with good citizenship, this idea is deeply complicated in an era when scientific data is hotly contested and many Americans have a conflicted view of science itself. These contradictions, Onion explains, can be understood by examining the histories of popular science and the development of ideas about American childhood. She shows how the idealized concept of "science" has moved through the public consciousness and how the drive to make child scientists has deeply influenced American culture. #1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa

cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences. Furthermore, many women with chronic medical problems do not obtain adequate preconception and contraception care. Despite published guidelines by the Centers for Disease Control and Prevention, there is a substantial gap in medical practice regarding the use of contraception in women with co-existing medical problems. Contraception for the Medically Challenging Patient fills the gap that currently exists in the knowledge of correct contraceptive prescribing practice and shows that inappropriate contraindications can easily become a barrier to effective contraception use among women. Chapters highlight obsolete views about appropriate candidates for contraception and address the complex contraceptive needs of today's medically challenging patients with HIV/AIDS, uterine fibroids or cardiac, neurologic or thyroid disease. The book gives attention to recommendations on the use of contraception in women with medical problems such as diabetes, obesity, epilepsy, and lupus, among others and provides comprehensive information regarding the effects that certain drugs may have on contraceptive hormone levels. While national guidelines do exist for contraceptive eligibility, this book discusses in more detail the evidence behind the guideline recommendations and the nuances that clinicians confront in daily practice. Drawing on centuries of wisdom from the Christian ethical tradition, this book takes readers on a journey of self-examination, exploring why our hearts are captivated by glittery but false substitutes for true human goodness and happiness. The first edition sold 35,000 copies and was a C. S. Lewis Book Prize award winner. Now updated and revised throughout, the second edition includes a new chapter on grace and growth through the spiritual disciplines. Questions for discussion and study are included at the end of each chapter. He's all male, all rough power—and all interference in her damn investigation. Maybe he's one of the good guys. Maybe not. Lex knows an affair with an immortal like him would risk everything. Lester takes us behind the walls of a Roman Catholic convent in central Mexico to explore the lives, training, and experiences of a group of postulants--young women in the first stage of religious training as nuns. Lester, who conducted eighteen months of fieldwork in the convent, provides a rich ethnography of these young women's journeys as they

wrestle with doubts, fears, ambitions, and setbacks in their struggle to follow what they believe to be the will of God. Gracefully written, finely textured, and theoretically rigorous, this book considers how these aspiring nuns learn to experience God by cultivating an altered experience of their own female bodies, a transformation they view as a political stance against modernity. Lester explains that the Postulants work toward what they see as an "authentic" femininity--one that has been eclipsed by the values of modern society. The outcome of this process has political as well as personal consequences. The Sisters learn to understand their very intimate experiences of "the Call"--and their choices in answering it--as politically relevant declarations of self. Readers become intimately acquainted with the personalities, family backgrounds, friendships, and aspirations of the Postulants as Lester relates the practices and experiences of their daily lives. Combining compassionate, engaged ethnography with an incisive and provocative theoretical analysis of embodied selves, *Jesus in Our Wombs* delivers a profound analysis of what Lester calls the convent's "technology of embodiment" on multiple levels--from the phenomenological to the political. He's her darkest fantasy. . . . After years of struggling, Haven Daly has finally accepted that she's nuttier than a fruitcake. Why else would she see visions of a beautiful but tormented male every night . . . and actually believe she can talk to him, even feel his touch? But thanks to those dream journeys, she can paint images nobody else on earth can duplicate. In each brush stroke, she captures the blatant masculinity and raw desire in his eyes that promise he's coming for her...and soon. She's the light that keeps him going. . . . Quade Kayrs has already suffered a lifetime of pain and torture. Completely isolated, he kept his sanity thanks to one beautiful female, a vision with kind emerald eyes. In the end, her soft voice led him out of hell. Now, naked and alone, he's in a strange world that bears little resemblance to the one he left behind. All he knows is Haven. All he wants is Haven. His final mission? To protect her from the evil hunting them both—whether she likes it or not . . . If anyone had a reason to harbor hatred and seek personal revenge, it would be Rebecca. Yet *The Devil in Pew Number Seven* tells a different story.
