[The Neuroscience of Autism Spectrum Disorders](#) Sep 22 2020 Autism is no longer considered a rare disease, and the Center for Disease Control now estimates that upwards of 730,000 children in the US struggle with this isolating brain disorder. New research is leading to greater understanding of and ability to treat the disorder at an earlier age. It is hoped that further genetic and imaging studies will lead to biologically based diagnostic techniques that could help speed detection and allow early, more effective intervention. Edited by two leaders in the field, this volume offers a current survey and synthesis of the most important findings of the neuroscience behind autism of the past 20 years. With chapters authored by experts in each topic, the volume explores etiology, neuropathology, imaging, and pathways/models. Offering a broad background of ASDs with a unique focus on neurobiology, the volume offers more than the others on the market with a strictly clinical focus or a single authored perspective that fails to offer expert, comprehensive coverage. Researchers and graduate students alike with an interest in developmental disorders and autism will benefit, as will autism specialists across psychology and medicine looking to expand their expertise. Uniquely explores ASDs from a neurobiological angle, looking to uncover the molecular/cellular basis rather than to merely catalog the commonly used behavioral interventions Comprehensive coverage synthesizes widely dispersed research, serving as one-stop shopping for neurodevelopmental disorder researchers and autism specialists

Edited work with chapters authored by leaders in the field around the globe - the broadest, most expert coverage available
[Exceptional Minds Across the Autism Spectrum](#) Oct 12 2019 Exceptional Minds provides a powerful new way of thinking about autism and education, giving the reader the tools to see past student deficits and recognize the potential to learn and thrive. You will read about the practical and inexpensive techniques and strategies, along with profiles of leaders in autism education who have shaped the field.
[All Across the Spectrum](#) Jan 19 2023 **Parenting Across the Autism Spectrum** Mar 09 2022 Maureen F. Morrell and Ann Palmer are raising two very different children: Justin, a whirlwind of activity and mood swings, who is supervised in a residential farm community, and Eric, quiet and passive, who lives independently at college. The authors give an account of the striking similarities as well as the stark differences in their experiences of parenting children at opposite extremes of the autism spectrum. The two mothers speak openly about their children's diagnosis and early childhood through to adolescence, young adulthood and the day they leave home. They give a moving account of the challenges they faced and the surprising consolations they found along their sons' very different paths in life. Through their friendship and two decades of shared experiences of parenting an ASD child, each has gained a clear understanding of her own strengths and limitations, as well as those of her child. Parenting Across the Autism Spectrum offers a personal perspective and practical guidance for parents at the start of their journey with autism, especially those whose children are newly diagnosed. It also provides useful insights for professionals working with individuals across the autism spectrum and their families. The book was elected the 2007 Autism Society of America's Outstanding Literary Work of the Year.
Across the Spectrum of Women and Crime Mar 29 2021 This interdisciplinary volume explores various dimensions of female offending and the underlying gender assumptions inherent in this phenomenon. The readings are original research written for this book, incorporating various methodologies including case studies, in-depth interviews, and analyses of large state and national data sets. Grounded in feminist theory, the collection is divided into three sections. The first focuses on theoretical perspectives on women and crime from a feminist approach. The importance of investigating the intersection of race, class, gender, ability status, and sexual orientation is addressed in a number of the readings, as well as an examination of the ways society has failed these women. The second section focuses on varieties of female offending. These include an in-depth exploration of women who kill their children, as well as an examination of how women involved in the methamphetamine trade view themselves. Other readings include women who move from legal sex work into prostitution and women who become suicide bombers. The final section of the book is

focused on how the system responds to women who offend. Chapters include such intriguing topics as wrongful convictions, how women experience incarceration (including health treatment), second chance grandparenting, and a qualitative study focused on recidivism and reintegration. Each chapter contains discussion questions. PowerPoint slides are available upon adoption. Sample slides from the full 280-slide presentation are available to view here. [Epilepsy Across the Spectrum](#) Jun 12 2022 Although epilepsy is one of the nation's most common neurological disorders, public understanding of it is limited. Many people do not know the causes of epilepsy or what they should do if they see someone having a seizure. Epilepsy is a complex spectrum of disorders that affects an estimated 2.2 million Americans in a variety of ways, and is characterized by unpredictable seizures that differ in type, cause, and severity. Yet living with epilepsy is about much more than just seizures; the disorder is often defined in practical terms, such as challenges in school, uncertainties about social situations and employment, limitations on driving, and questions about independent living. The Institute of Medicine was asked to examine the public health dimensions of the epilepsies, focusing on public health surveillance and data collection; population and public health research; health policy, health care, and human services; and education for people with the disorder and their families, health care providers, and the public. In *Epilepsy Across the Spectrum*, the IOM makes recommendations ranging from the expansion of collaborative epilepsy surveillance efforts, to the coordination of public awareness efforts, to the engagement of people with epilepsy and their families in education, dissemination, and advocacy for improved care and services. Taking action across multiple dimensions will improve the lives of people with epilepsy and their families. The realistic, feasible, and action-oriented recommendations in this report can help enable short- and long-term improvements for people with epilepsy. For all epilepsy organizations and advocates, local, state, and federal agencies, researchers, health care professionals, people with epilepsy, as well as the public, *Epilepsy Across the Spectrum* is an essential resource.
[Coming Out Stories](#) Feb 25 2021 'Uplifting and triumphant, each story is a feat of bravery and courage.' - Juno Dawson 'A must-read for anyone grappling with coming out.' - Riyadh Khalaf 'He told me being gay was nothing to be ashamed of.' - Bill 'I put my hands over my eyes as I told her, as I couldn't bear to see her reaction.' - Olivia Based on the hugely popular *Coming Out Stories* podcast, this empowering, humorous and deeply honest book invites you to share one of the most important moments in many LGBTQ+ people's lives. coming out to their Mum over email, from Christine knowing she was trans as a young child, to Kerry coming out as a lesbian in her late thirties, all of the real life stories in this book show you there is no right or wrong way to come out, whatever your age and whatever your background. Whether you're gay, pan, queer, bi, trans, non-binary, or an ally, this uplifting go-to resource is filled with helpful advice and tips on what to expect, and inspirational quotes from leading LGBTQ+ figures, to help you live your life as your most authentic self. Welcome to the family!

Autism Works May 11 2022 People with autism are being left behind today, with only 16 per cent in full-time employment. This inspiring book addresses the lack of understanding of the wonderful contributions people across the autism spectrum can make to the workplace, drawing attention to this vast untapped human resource. Employers who create supportive workplaces can enhance their companies by making use of the talents of people with autism while also helping to produce a more inclusive and tolerant society, and people with autism can themselves benefit materially and emotionally from improved employment opportunities. Packed with real-life case studies examining the day-to-day working lives of people across the autism spectrum in a wide variety of careers, this book provides constructive solutions for both employers seeking to improve their workplaces and for individuals with autism considering their employment options. It dispels popular myths about autism, such as that everyone is good at IT, and crucially tackles the potential job opportunities available across the spectrum, including for those who have no language at all. It also highlights the neglected area of gender differences in the workplace and the costs of autistic females' ability to 'camouflage' their condition. This book is a must-read for parents, employers and adults with autism, and for anyone interested in the present and future of people with autism in the workplace who will benefit from the positive message that employing autistic people is not an act of charity but one that makes sound economic sense.

Autism in Heels Nov 24 2020 The face of autism is changing. And more often than we realize, that face is wearing lipstick. *Autism in Heels*, an intimate memoir, reveals the woman inside one of autism's most prominent figures, Jennifer O'Toole. At the age of thirty-five, Jennifer was diagnosed with Asperger's syndrome, and for the first time in her life, things made sense. Now, Jennifer exposes the constant struggle between carefully crafted persona and authentic existence, editing the autism script with wit, candor, passion, and power. Her journey is one of reverse-self-discovery not only as an Aspie but--more importantly--as a thoroughly modern woman. Beyond being a memoir, *Autism in Heels* is a love letter to all women. It's a conversation starter. A game changer. And a firsthand account of what it is to walk in Jennifer's shoes (especially those iconic red stilettos). Whether it's bad perms or body image, sexuality or self-esteem, Jennifer's is as much a human journey as one on the spectrum. Because autism "looks a bit different in pink," most girls and women who fit the profile are not identified, facing

years of avoidable anxiety, eating disorders, volatile relationships, self-harm, and stunted independence. Jennifer has been there, too. *Autism in Heels* takes that message to the mainstream. From her own struggles and self-discovery, she has built an empire of empowerment, inspiring women the world over to realize they aren't mistakes. They are misunderstood miracles.

Across the Spectrum Aug 14 2022 "This accessible yet comprehensive primer helps readers understand the breadth of viewpoints on major issues in evangelical theology. Now updated and revised throughout"--

Innovative Investigations of Language in Autism Spectrum Disorder Apr 17 2020 In recent decades, a growing number of children have been diagnosed with autism spectrum disorder (ASD), a condition characterized by, among other features, social interaction deficits and language impairment. Yet the precise nature of the disorder's impact on language development is not well understood, in part because of the language variability among children across the autism spectrum. The contributors to this volume — experts in fields ranging from communication disorders to developmental and clinical psychology to linguistics — use innovative techniques to address two broad questions: Is the variability of language development and use in children with ASD a function of the language, such that some linguistic domains are more vulnerable to ASD than others? Or is the variability a function of the individual, such that some characteristics predispose those with ASD to have varying levels of difficulty with language development and use? Contributors investigate these questions across linguistic levels, from lexical semantics and single-clause syntax, to computationally complex phonology and the syntax-pragmatics interface. Authors address both spoken and written domains within the wider context of language acquisition. This timely and broadly accessible volume will be of interest to a broad range of specialists, including linguists, psychologists, sociologists, behavioral neurologists, and cognitive neuroscientists.

Clinical Assessment and Intervention for Autism Spectrum Disorders Jul 21 2020 Autism spectrum disorder has received increasing research in recent years, with more information on assessment and treatment than can be readily assimilated from primary literature by clinicians. *Clinical Assessment and Intervention for Autism Spectrum Disorders* summarizes evidence-based assessments and intervention for Autism across the life-span, providing clinicians with a practical overview of how best to assess and treat this disorder. The book begins with a discussion of what warrants a determination of being "evidence based" and a description of the disorder from a life span perspective. The book also provides a chapter on differential diagnosis of autism relative to other disorders. What follows are separate sections on assessment and intervention. These chapters discuss first how to assess and then separately how to treat behavioral problems, communication and social skills issues, academic and vocational skills, and the use of pharmacology and an assessment of possible pharmacological effects. Intended for practitioners assessing and treating children

with developmental delays, the book provides clinicians with best practices for assessing and treating delays associated with autism. Covers the full range of Autism Spectrum Disorders Covers the lifespan Focuses on evidence-based assessment and treatment

Spectrum Women Oct 24 2020 Barb Cook and 14 other autistic women describe life from a female autistic perspective, and present empowering, helpful and supportive insights from their personal experience for fellow autistic women. Michelle Garnett's comments validate and expand the experiences described from a clinician's perspective, and provide extensive recommendations. Autistic advocates including Liane Holliday Willey, Anita Lesko, Jeanette Purkis, Artemisia and Samantha Craft offer their personal guidance on significant issues that particularly affect women, as well as those that are more general to autism.

Contributors cover issues including growing up, identity, diversity, parenting, independence and self-care amongst many others. With great contributions from exceptional women, this is a truly well-rounded collection of knowledge and sage advice for any woman with autism.

Across the Spectrum: Mothers of Autistic Children Speak! Feb 08 2022 *Across the Spectrum* looks at six families with children on the autism spectrum over a 40 year period, from the early 1970s to the 21st century. The reader meets parents who raised their children without knowing the word "autism," to those caught in the uncertainties of labels forging ahead to blaze trails of their own, to young parents implementing modern-day therapies. Each story looks at a unique aspect of autism through the perspective of the mothers. Each story lays out the challenges presented by autism and the courage and love that the mothers demonstrate each day in meeting those challenges. The mothers speak with a directness and honesty, sharing stories of courage, love, perseverance and creativity - all while living lives with meaning and purpose. *Across the Spectrum* offers information, both practical and insightful, for anyone with a loved one on the autism spectrum - and provides inspiration through the telling of these unique stories.

Gender Identity, Sexuality and Autism Jan 07 2022 Bringing together a collection of narratives from those who are on the autism spectrum whilst also identifying as lesbian, gay, bisexual, transgender, queer, intersex and/or

asexual (LGBTQIA), this book explores the intersection of the two spectrums as well as the diverse experiences that come with it. By providing knowledge and advice based on in-depth research and personal accounts, the narratives will be immensely valuable to teenagers, adults, partners and families. The authors round these stories with a discussion of themes across narratives, and implications for the issues discussed. In the final chapter, the authors reflect on commonly asked questions from a clinical perspective, bringing in relevant research, as well as sharing best-practice tips and considerations that may be helpful for LGBTQIA and ASD teenagers and adults. These may also be used by family members and clinicians when counselling teenagers and adults on the dual spectrum. With each chapter structured around LGBTQIA and autism spectrum identities, Gender Identity, Sexuality and Autism highlights the fluidity of gender identity, sexual orientation and neurodiversity and provides a space for people to share their individual experiences.

Teaching Dance Feb 14 2020 Teaching dance is an activity that is both a rigorous discipline which involves many years of study and a deeply personal expression. Throughout the years, from the time I first encountered the Spectrum, I've realized more and more what an amazing pedagogical tool it is for dance as an art form. The Spectrum will help dance teachers address many issues, including the following: - For the beginning teacher, "Did I meet my objectives? How can I judge how well I did?" - For the advanced teacher, "How can I encourage initiative and make students more self-motivated?" - For the college or university teacher, "How do I help my colleagues in other disciplines (and administration) understand dance as an academic discipline? What do I put in my tenure and promotion portfolio?" - For teachers with adult beginner classes, "How do I introduce my adult learners to basic movement material without 'teaching down' to them, to recognize their cognitive level and maturity?" - For teachers in private studios, "How can I teach so that I reach every student, keep students coming back for more classes, and thus keep enrollment (and my business) up?" - When teaching large classes, "How can I provide feedback for every student in the class and still keep the class moving?" Whether you are facing a class of students for the first time or are an experienced teacher, whether you teach children or adults, whether in a recreational setting or college, you will find useful information here. Supported by illustrations, examples, sample lesson plans, criteria sheets, activity suggestions and discussion questions, this work is designed for use as a textbook for student teachers and a resource for the professional teacher. It includes practical tips and application suggestions, with additional material downloadable from the author's website.

Sensory: Life on the Spectrum May 19 2020 A colorful and eclectic comics anthology exploring a wide range of autistic experiences—from diagnosis journeys to finding community—from autistic contributors. From artist and curator Bex Ollerton comes an anthology featuring comics from thirty autistic creators about their experiences of living in a world that doesn't always understand or accept

them. **Sensory: Life on the Spectrum** contains illustrated explorations of everything from life pre-diagnosis to tips on how to explain autism to someone who isn't autistic, to suggestions for how to soothe yourself when you're feeling overstimulated. With unique, vibrant comic-style illustrations and the emotional depth and vulnerability of memoir, this book depicts these varied experiences with the kind of insight that only those who have lived them can have.

Face Recognition Across the Imaging Spectrum Oct 04 2021 This authoritative text/reference presents a comprehensive review of algorithms and techniques for face recognition (FR), with an emphasis on systems that can be reliably used in operational environments. Insights are provided by an international team of pre-eminent experts into the processing of multispectral and hyperspectral face images captured under uncontrolled environments. These discussions cover a variety of imaging sensors ranging from state-of-the-art visible and infrared imaging sensors, to RGB-D and mobile phone image sensors. A range of different biometric modalities are also examined, including face, periocular and iris. This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

Building Communication and Independence for Children Across the Autism Spectrum Dec 06 2021 Expert author Elizabeth Ives Field combines over four decades of working in the autism field to provide functional, in-depth teaching strategies for children on the spectrum who struggle with communication. Incorporating descriptions of composite children at different developmental stages, this book sets out individual goals and therapy approaches for children who may have no speech, moderately functional speech or echolalia, as well as for highly verbal individuals who may not always use appropriate language. Covering a wide range of interventions that address communication and the related areas of independence and social behavior, the purpose of each goal is to make progress toward the child's maximum potential. This book sets out skills that are developmentally appropriate and that will be immediately useful to help children express themselves more effectively and build relationships with others.

Spectrum Mar 17 2020 A fast-paced thriller from the author of the international bestselling Shepherd series. The gruesome killing of more than 300 white squatters in a South African village is still unsolved when the alleged assassin enters a storage facility in the US and takes several hostages. No demands and an obvious play for time leave hostage negotiators on edge. When the FBI is called in, they bring Dr. August Burke, a young man with James Dean looks and a brilliant mind capable of seeing behavioral patterns where others can't. Unfortunately, Burke hates being around people. Can he put his social anxieties aside and solve the mystery before it's too late? Together with FBI Special Agent Carter, Burke finds the door to a secret laboratory beneath the storage facility. Is this what the culprits are really after? Soon Burke realizes they are dealing with an enemy who is willing to kill thousands without batting an eye. Across the

globe, Constable Isabel Price picks up her gun and starts the hunt for the killer behind the village massacre, even if that means losing everything. She has no intention on bringing him back alive. Her thirst for revenge leads her to the US, and her path intertwines with the hostage takers. Between Isabel Price's quest for bloody vengeance and August Burke's uneasy gift, *Spectrum* weaves a web of intrigue and complex characters into an action-packed crime novel.

Nursing Case Studies in Caring May 31 2021 Uncovers the art and science of nursing grounded in caring for all nursing situations Grounded in the belief that caring is the central domain of nursing, this innovative book presents a new approach to "nursing situations." These are case studies depicting shared lived experiences between the nurse and patient that are studied from various theoretical perspectives. They are designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. **KEY FEATURES:** Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families **Across the Spectrum** Apr 29 2021 This accessible yet comprehensive primer helps readers understand the breadth of viewpoints

on major issues in evangelical theology. Now in a new edition.

Worlds of Autism Sep 15 2022 Since first being identified as a distinct psychiatric disorder in 1943, autism has been steeped in contestation and controversy. Present-day skirmishes over the potential causes of autism, how or even if it should be treated, and the place of Asperger's syndrome on the autism spectrum are the subjects of intense debate in the research community, in the media, and among those with autism and their families. Bringing together innovative work on autism by international scholars in the social sciences and humanities, *Worlds of Autism* boldly challenges the deficit narrative prevalent in both popular and scientific accounts of autism spectrum disorders, instead situating autism within an abilities framework that respects the complex personhood of individuals with autism. A major contribution to the emerging, interdisciplinary field of critical autism studies, this book is methodologically and conceptually broad. Its authors explore the philosophical questions raised by autism, such as how it complicates neurotypical understandings of personhood; grapple with the politics that inform autism research, treatment, and care; investigate the diagnosis of autism and the recognition of difference; and assess representations of autism and stories told by and about those with autism. From empathy, social circles, and Internet communities to biopolitics, genetics, and diagnoses, *Worlds of Autism* features a range of perspectives on autistic subjectivities and the politics of cognitive difference, confronting society's assumptions about those with autism and the characterization of autism as a disability. Justification Aug 02 2021 "Therefore, since we have been justified by faith, we have peace with God through our Lord Jesus Christ" (Rom 5:1). When Paul wrote these words he seemed confident he had made himself clear. But for centuries the Pauline doctrine of justification has been a classic point of interpretation and debate in Christian exegesis and theology. And while in recent decades there have been moments of hopeful convergence among the various traditions of the Western church, the fine print often reveals more facets and distinctions than ever before. This volume focuses on five views of justification and calls on representative proponents to set forth their case and then respond to each other. The five views are: Traditional Reformed (Michael S. Horton) Progressive Reformed (Michael F. Bird) New Perspective (James D. G. Dunn) Deification, or Theosis (Veli-Matti Kärkkäinen) Roman Catholic (Gerald O Collins and Oliver Rafferty) In addition, editors James Beilby, Paul R. Eddy and Steven E. Enderlein provide an

extensive introduction to the issues informing this important debate. This distinguished forum of biblical interpreters and theologians offers a lively and informative engagement with the biblical, historical and contemporary understandings of justification. **Justification: Five Views** is not only a fascinating probe into Paul's meaning, it is also a case book in theological method.

Autism Spectrum Disorder in the Canadian Context Aug 22 2020 With a unique focus on Canada-wide practices and research, this text offers a comprehensive introduction to autism spectrum disorder (ASD). Covering the clinical, educational, and community perspectives of ASD, the authors highlight how educators, direct support professionals, and communities at large can support people with ASD across their lifespan: from early years, to school years, to adulthood. Additionally, the authors emphasize the emerging nature of the field and the importance of evidence based interventions. The resource is divided into four thematic sections. Section one gives an overview of ASD, including prominent researchers in the field and changes in its diagnostic criteria. Section two looks at evidence-based interventions and the newer sensory theories and frameworks. The third section examines ASD across the lifespan, as well as the experiences of parents and families. The final section looks at additional critical issues, including media, sexuality, peer relationships, and immigration. Beyond being a vital asset for ASD programs and resource centres across the country, *Autism Spectrum Disorder in the Canadian Context* has broad applications suitable for courses on ASD in behavioural science, education, and health studies programs.

FEATURES: - Each chapter features figures, definitions, examples, and questions designed to deepen understanding and elicit reflection - Includes feature boxes with interesting perspectives provided by varied members of Canada's ASD community - Unlike other textbooks on ASD, this text focuses on ASD across the lifespan, covering infancy, early childhood and school years, as well as adulthood, in the Canadian context

The Spectrum of Addiction Jan 27 2021 Reflecting the latest content in the DSM-5, *The Spectrum of Addiction: Evidence-Based Assessment, Prevention, and Treatment Across the Lifespan* presents a comprehensive overview of addictive behaviors and habits from early use through risky use, severe-risk use, and addiction. Authors Laura Veach and Regina Moro draw from their experience in both teaching and counseling to provide real-world knowledge and evidence-based practices for working with clients who fall within the spectrum of addiction ranging from experimentation to physical addiction and recovery. With a unique focus on neuroscience, integration of CACREP standards, and extensive coverage of addictions across the lifespan, the book serves as a practical resource for future addiction counselors.

Loving Your Place on the Spectrum Jan 15 2020 *Loving Your Place on the Spectrum: A Neurodiversity Blueprint* provides answers to many of your questions about autism, helping you to embrace neurodiversity and love your autistic self and the autistic people in your life. Jude Morrow speaks from personal experience

when he says that he has learned to be proud to be autistic and he wants you to be proud too. Browse through the many books available on autism and you might notice a trend: too many of them are written by neurotypical professionals who aim to "fix" autism or help autistic people appear "normal." Jude Morrow noticed this problem and decided that something needed to change. *Loving Your Place on the Spectrum* is a guide for living a happy and successful autistic life. Jude combines his own experiences as an autistic man with the stories of others to provide a handbook to help autistic individuals navigate life's major changes, from childhood to college, jobs, and relationships. Each chapter identifies common issues faced by autistic people of a particular age or social group and explains how educators, teachers, parents, and professionals can be supportive through all these life stages. The world needs a new perspective on autism, and Jude Morrow's *Loving Your Place on the Spectrum* provides parents, workplaces, individuals, and society an alternative, strengths-based viewpoint, where autistic people are accepted, embraced, and loved.

Drugs Across the Spectrum Jul 13 2022 Up-to-date and student-oriented, *DRUGS ACROSS THE SPECTRUM*, encourages students to examine the motivation for drug use, the social implications of drug use, legal ramifications and factors affecting how drugs interact with the human body. The eighth edition looks at the history and culture surrounding drug use and abuse, provides key information regarding specific types of drugs and reviews drug treatment, education and prevention approaches and programs. Using active learning features like Fact or Fiction and Thinking Critically questions, authors Goldberg and Mitchell engage and educate students about the topics and issues related to drugs in society. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Trauma Treatment Handbook: Protocols Across the Spectrum Sep 03 2021 The therapist's go-to source for treating a range of traumatized patients. With so many trauma treatments to choose from, how can a therapist know which is best for his or her client? In a single, accessible volume, Robin Shapiro explains them all, making sense of the treatment options available, their advantages and disadvantages, and how to determine which treatments are best suited to which clients.

The Autistic Brain Oct 16 2022 Offers the latest research and science on autism, including new neuroimaging and genetic research that provide new theories on what causes autism spectrum disorders as well as new ways to treat and diagnose them.

Across the Spectrum Apr 10 2022 Autism spectrum disorder (ASD) presents itself in many different ways, and teachers must be able to identify individual and shared characteristics to provide proper support. This can often present problems for teachers who lack experience of working with children across the entire spectrum, which ranges from supporting those with severe learning difficulties to working with highly able young people. Using real-life examples from their decades of

experience, Francine Brower and Keith MacKenzie Cox explain how to identify diverse characteristics of autism and explore key challenges that individuals and schools face. With an emphasis on practical solutions, they offer a wealth of creative strategies and interventions perfect for any setting, from tapping into special interests and establishing routines to developing social skills. Covering a range of autism presentations, including sensory differences, communication, behaviour and socialisation, this is the ideal book for mainstream and special school teachers looking to improve their special educational needs provision, and develop the best possible learning outcomes for all pupils on the autism spectrum.

Full-Spectrum Thinking Jul 01 2021 Leading futurist Bob Johansen shows how a new way of thinking, enhanced by new technologies, will help leaders break free of limiting labels and see new gradients of possibility in a chaotic world. The future will get even more perplexing over the next decade, and we are not ready. The dilemma is that we're restricted by rigid categorical thinking that freezes people and organizations in neatly defined boxes that often are inaccurate or obsolete. Categories lead us toward certainty but away from clarity, and categorical thinking moves us away from understanding the bigger picture. Sticking with this old way of thinking and seeing isn't just foolish, it's dangerous. Full-spectrum thinking is the ability to seek patterns and clarity outside, across, beyond, or maybe even without any boxes or categories while resisting false certainty and simplistic binary choices. It reveals our commonalities that are hidden in plain view. Bob Johansen lays out the core concepts of full-spectrum thinking and reveals the role that digital media—including gameful engagement, big-data analytics, visualization, blockchain, and machine learning—will play in facilitating and enhancing it. He offers examples of broader spectrums and new applications in a wide range of areas that will become possible first, then mandatory. This visionary book provides powerful ways to make sense of new opportunities and see the world as it really is.

Women and Girls with Autism Spectrum Disorder Jun 19 2020 The difference that being female makes to the diagnosis, life and experiences of a person with an Autism Spectrum Disorder (ASD) has largely gone unresearched and unreported until recently. In this book Sarah Hendrickx has collected both academic research and personal stories about girls and women on the autism spectrum to present a picture of their feelings, thoughts and experiences at each stage of their lives. Outlining how autism presents differently and can hide itself in females and what the likely impact will be for them throughout their lifespan, the book looks at how females with ASD experience diagnosis, childhood, education, adolescence, friendships, sexuality, employment, pregnancy and parenting, and aging. It will provide invaluable guidance for the professionals who support these girls and women and it will offer women with autism a guiding light in interpreting and understanding their own life experiences through the experiences of others.

The Subtle Spectrum: An Honest Account of Autistic Discovery, Relationships and Identity Nov 12 2019 Am I autistic, or is autism something I suffer from? Should I come out, to my friends, to my family, to the people I work with? Should I drop the mask? How can I explain my experience to a neurotypical world? The Subtle Spectrum offers an exploration into the postdiagnostic landscape of autism and the transformative journey of one woman, from her awareness of difference, through acceptance, to an embracing of autistic identity and beyond as she questions the cultural identity of autism. Joanna's narrative is enriched with insights from a range of diverse contributors, creating a reflective opportunity for people to gain a better understanding of the experience of being autistic. With a focus on relationships built across a neurodiverse divide, the book considers topics as broad as mental health, work opportunities and abuse, weaving theory and research with lived experience to give true insight into the life of an autistic person, both pre- and post-diagnosis. Written with a raw and engaging honesty, this is a crucial read for anybody who identifies as autistic as an adult or teenager, or anyone looking to support somebody exploring diagnosis. It will also provide an invaluable insight for social workers, educators and relationships counsellors working with autistic people.

Across the Spectrum Feb 20 2023 This accessible yet comprehensive primer helps readers understand the breadth of viewpoints on major issues in evangelical theology, with chapters using the popular multiple-views format. This third edition of a well-received textbook (over 60,000 copies sold) has been updated and revised throughout. It examines positions taken by evangelical scholars on seventeen seminal issues. In addition, it offers end-of-chapter "For Further Reading" sections, an extensive glossary, and an appendix that addresses contrasting views on fifteen additional issues in contemporary evangelicalism.

On the Spectrum Nov 05 2021 Nearly everyone knows someone on the autism spectrum, whether it's a niece or nephew, a student in their classroom, a coworker, or a sibling, spouse, or child. One in 54 children has autism, according to the CDC, and autism is reported across racial, ethnic, and socioeconomic groups. Yet most of what people think they know about autism is wrong. On the Spectrum debunks myths with a realistic yet

hope-filled deep dive into the heart, mind, and life of a Christian. Daniel Bowman, a novelist, poet, and professor, received an autism diagnosis at age thirty-five after experiencing crises in his personal and professional life. The diagnosis shed light on his experience in a new, life-giving way. In this captivating book, Bowman reveals new insights into autism, relationships, faith, and the gift of neurodiversity. Rather than viewing autism as a deficiency, Bowman teaches readers--through stories of his heartbreaks and triumphs--authentic ways to love their neighbors as themselves, including their autistic neighbors who are fearfully and wonderfully, if differently, made.
